

Keerthi Chirrapu | Data Analyst

WI, USA | +1 (414)-246-7121 | keerthi2675@gmail.com | [LinkedIn](#)

SUMMARY

Data professional with over 5+ years of experience in statistical analysis, data engineering, and advanced analytics. Skilled in Python, R, and SQL for building predictive models, automating workflows, and delivering insights from large-scale datasets. Experienced in developing interactive dashboards with Power BI, Tableau, and Looker to support data-driven decision-making. Proficient in cloud platforms including AWS, Azure, and GCP with expertise in data pipelines, ETL processes, and containerized deployments using Docker and Kubernetes. Strong background in big data technologies such as Spark, Hadoop, and Kafka, with hands-on experience in CI/CD, automation, and real-time analytics.

TECHNICAL SKILLS

Programming & Analytics: Python (Pandas, NumPy, SciPy, Scikit-learn, XGBoost, Matplotlib, Seaborn), R, SAS, SQL, Java, JavaScript, TypeScript, Scala, MATLAB, Stata

Data Visualization & BI: Power BI (DAX, Dataflows, RLS), Tableau, Looker/LookML, QlikView/Qlik Sense, Spotfire, Google Data Studio, Excel (Pivot Tables, Macros, VBA)

Databases & Warehousing: SQL Server (SSAS, SSIS), MySQL, Oracle, Snowflake, Redshift, BigQuery, MongoDB, Cassandra, Teradata, Erwin Data Modeler (Star & Snowflake Schema)

ETL & Big Data: Informatica, Alteryx, Apache Airflow, Kafka, Apache Spark (PySpark, MLlib), Hadoop (HDFS, MapReduce, Hive, Pig), Denodo, Custom Python ETL Pipelines

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, SageMaker, Athena, EMR), Azure (Data Lake, Data Factory, SQL DW), GCP (BigQuery, Kubernetes, App Engine, DialogFlow), Docker, Kubernetes, Terraform, Ansible, Jenkins, GitLab

Data Science & AI/ML: Predictive Analytics, Forecasting, Recommendation Engines, NLP, Fraud Detection, Risk Modeling, Anomaly Detection, Churn Analysis, Scenario Planning

Other Tools: Datadog, Prometheus, Grafana, SharePoint, SAP Integration, Web Development (ASP.NET, ReactJS, AngularJS, Node.js, HTML, CSS, jQuery)

EXPERIENCE

Senior Data Analyst | Baird, Milwaukee | WI, USA

Jan 2024 – Present

- Partner with finance and business teams to translate raw financial, clinical, and operational data into insights using Python, R, and advanced statistical methods.
- Built automated dashboards in Power BI, Looker, and Tableau that track portfolio performance and KPIs, cutting reporting time from days to hours.
- Designed scalable data pipelines in Spark, Hadoop, and Snowflake, bringing together data from AWS, APIs, and MongoDB to create a reliable foundation for analytics.
- Introduced real-time analytics using Kafka and Flink to monitor transactions, enabling faster fraud detection and risk monitoring.
- Delivered predictive models and simulations with MATLAB, Stata, and Mahout to support investment decisions, portfolio optimization, and customer behavior analysis.
- Improved system performance and reliability by containerizing analytics tools with Docker/Kubernetes and automating deployments through Terraform and Jenkins.

Data Analyst | Ashley Furniture Industries | Arcadia, WI

Nov 2022 – Dec 2023

- Developed forecasting and churn prediction models using Scikit-learn, XGBoost, and R, helping leadership anticipate demand shifts and reduce churn risk.
- Streamlined reporting by designing efficient data pipelines in Azure Data Factory, SQL, BigQuery, and Redshift, ensuring stakeholders always had accurate and timely insights.
- Created interactive Tableau and Power BI dashboards, enabling leadership to track operations in real-time and make informed strategic decisions.
- Combined statistical analysis in Python with Google Data Studio visualizations to deliver executive-ready presentations on performance trends.
- Established data governance and MDM practices, improving data quality and compliance across enterprise reporting systems.
- Automated document creation and reporting workflows with Python and Google Apps Script, eliminating repetitive manual tasks for the operations team.

Data Analyst | Adons Softech | India

Jul 2021 – Jul 2022

- Worked with large datasets in SQL and Python to clean, transform, and prepare data for reporting, helping teams make better, faster decisions.
- Created dashboards in Power BI and Tableau that gave managers a clear view of KPIs and cut down manual reporting time by nearly 40%.
- Designed and maintained ETL pipelines to pull data from multiple sources into cloud and relational databases, making sure information stayed accurate and up to date.
- Used Python and R for data analysis, spotting trends and running statistical tests that supported process improvements and strategy discussions.
- Handled ad-hoc reporting needs with custom SQL queries, reducing the time stakeholders waited for answers by about 30%.
- Kept detailed documentation of data models and governance practices so reporting stayed consistent and compliant across projects.

Programmer Analyst | Aster DM Healthcare, Bangalore | India

Mar 2020 – Jun 2021

- Led the development of ETL pipelines using Informatica, Alteryx, and Python to bring together healthcare data from multiple systems into Hadoop and Spark platforms.
- Applied predictive analytics with Spark MLlib, Python, and BigQuery ML to forecast patient behavior and market demand, improving model accuracy with ensemble methods.
- Created BI dashboards in Power BI, Qlik Sense, and Looker that tracked financial and operational KPIs, giving decision-makers better visibility into trends.
- Integrated SAP data into Snowflake models, optimizing fact and dimension tables for more efficient reporting.
- Automated reporting workflows with AWS, Kafka, and Python, improving scalability and reducing downtime for analytics teams.
- Worked closely with business stakeholders in Agile/Scrum settings to refine requirements & deliver BI and predictive modeling solutions on time.

EDUCATION

Masters in Computer and Information Science | Concordia University Wisconsin, USA

Dec 2023

Bachelors in Computer Science | Anurag Group of Institutions, India

May 2022
