

Keval Makadiya

Full Stack Developer

makadiyakeval248@gmail.com | +1 (7477) 772-151 | Seattle, WA | [LinkedIn](#) | [GitHub](#)

SUMMARY

- Results-driven Java Full Stack Developer with 5+ years of experience building scalable, high-performance web applications using React.js, Spring Boot, and PostgreSQL, focused on delivering seamless user experiences and optimized backend performance.
- Proficient in AWS, Docker, Kubernetes, and CI/CD pipelines (GitHub Actions, Jenkins) to streamline deployments, ensure system reliability, and maintain consistency across development and production environments.
- Strong advocate for clean code, collaboration, and Agile best practices, skilled in RESTful and GraphQL API development, secure coding, and mentoring peers to drive team success and project efficiency.
- Experienced in integrating microservices, caching (Redis), and API security frameworks to improve system scalability, reduce latency, and enhance overall product performance and stability.

PROFESSIONAL EXPERIENCE

Full Stack Developer, Shopify

07/2023 – Present | USA

- Led end-to-end development of high-performance web applications using Java, Spring Boot, React.js, and TypeScript, improving page load speed by 30% and enhancing user engagement metrics.
- Designed and deployed RESTful and GraphQL APIs supporting over 1M transactions per week, ensuring seamless data flow between microservices and front-end applications.
- Integrated AWS services (EC2, RDS, S3, Lambda) to scale backend workloads and optimize data processing, resulting in 25% cost efficiency and improved system reliability.
- Migrated legacy monolithic modules into Dockerized microservices orchestrated via Kubernetes, cutting release downtime by 40% and improving scalability.
- Implemented Spring Security with JWT-based authentication and role-based authorization, strengthening application security and ensuring compliance with internal audit standards.
- Enhanced CI/CD processes using GitHub Actions and Jenkins, enabling automated build, test, and deployment workflows across environments with 98% deployment success.
- Collaborated with product managers and UX teams to develop dynamic, responsive React components and dashboards that improved data visualization for business analytics.
- Optimized database queries and indexing on PostgreSQL and MongoDB, reducing API latency by 35% and boosting performance under heavy traffic loads.
- Built custom monitoring and logging pipelines using ELK Stack and Prometheus, improving incident response time by 45% through proactive alerting and traceability.
- Mentored junior developers, conducted code reviews, and facilitated Agile sprint ceremonies, contributing to consistent sprint delivery and team performance improvements.

Full Stack Developer, Fiserv

05/2020 – 06/2023 | USA

- Collaborated with senior developers to build scalable web applications using Java, Spring Boot, and React.js, helping modernize legacy financial tools into modular components.
- Assisted in implementing microservice-based architecture, which enhanced fault isolation and reduced maintenance overhead across multiple fintech projects.
- Collaborated with UI/UX teams to create intuitive front-end interfaces in React and Redux, improving overall usability scores by 22% based on user testing sessions.
- Contributed to developing and maintaining secure REST APIs integrated with MySQL and MongoDB, improving data consistency and retrieval speed by 20%.
- Supported the migration of on-premises applications to AWS Cloud (EC2, S3, CloudWatch), streamlining infrastructure and reducing system downtime during releases.
- Participated in optimizing build pipelines through Maven, Jenkins, and Docker, reducing deployment cycle time by 35% and improving developer productivity.
- Collaborated on the implementation of unit and integration testing using JUnit and Postman, increasing test coverage by 40% and reducing production defects.
- Contributed to performance tuning by identifying slow queries and applying caching strategies with Redis, improving transaction processing speed across APIs.
- Assisted in introducing logging and monitoring systems with Splunk and ELK, enabling proactive incident management and faster issue resolution.
- Supported Agile processes using Jira and Confluence, participating in sprint planning, peer reviews, and retrospectives to maintain steady delivery momentum.

SKILLS

Languages & Frameworks: Java, Spring Boot, JavaScript (ES6+), TypeScript, React.js, Node.js, Express.js, GraphQL, HTML5, CSS3

Frontend & UI: React 18, Redux, Responsive Design, REST API Integration, Component-Based Architecture, Cross-Browser Compatibility, Webpack, Babel, Figma Collaboration, Performance Optimization

Backend & Server-Side: Spring Boot 3, RESTful API Development, Microservices Architecture, JWT/OAuth2 Authentication, Server-Side Rendering, WebSockets, Redis Caching, JSON Data Handling

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis; Skilled in Query Optimization, Indexing, Transactions, and Database Performance Tuning

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, GitHub Actions, Terraform, Linux Administration, CI/CD Pipelines, Serverless Deployments

Testing & Quality Assurance: JUnit, Mockito, Postman, Cypress, Jest; Skilled in Unit, Integration, and End-to-End Testing with Test-Driven Development (TDD) Practices

Security & Best Practices: Spring Security, OAuth 2.0, JWT, Role-Based Access Control (RBAC), OWASP Secure Coding Standards, Input Validation, XSS & SQL Injection Prevention

Version Control & Collaboration: Git, GitHub, GitLab, Bitbucket, Agile (Scrum/Kanban), Jira, Confluence; Code Reviews, Cross-Functional Collaboration, and Continuous Improvement

Soft Skills & Problem Solving: Analytical Thinking, Attention to Detail, Adaptability, Strong Communication, Team Mentorship, Agile Collaboration, and Effective Time Management
