CAREER SUMMARY

Data professional with 5+ years of experience in SQL development, Python scripting, and BI engineering. Skilled in building ETL pipelines, automating workflows, developing Power BI/Tableau dashboards, and creating custom Power Apps to support strategic decision-making. Strong in database querying, optimizing data workflows, and transforming raw data into compelling stories that drive insight and action. Proven ability to partner with stakeholders to ensure reporting delivers clarity, impact, and results.

SKILLS

- SQL & Data Engineering:** SQL Development, Window Functions, CTEs, Joins, ETL Pipelines, Stored Procedures, Query Optimization, Data Warehousing, Oracle, BigQuery
- Python Development:** Python (Pandas, NumPy), Data Wrangling, Automation Scripts, Batch Processing
- Data Analytics & Strategy:** Ad Hoc Reporting, KPI & Trend Analysis, Data Cleaning, Business Insights, Excel (VLOOKUPS, PivotTables)
- Business Intelligence & Reporting:** Power BI, Tableau, Power Apps, Qlik, Excel Dashboards, Data Storytelling
- Tools & Collaboration:** Jira, Confluence, SAS, AWS (Foundational Knowledge)
- Stakeholder Engagement:** Cross-functional Collaboration, Requirements Gathering, Project Coordination

WORK EXPERIENCE

Data Analyst

Johnson & Johnson

Remote

July 2022- December 2024

- Developed and maintained SQL-based ETL pipelines in Oracle and BigQuery using window functions, CTEs, and joins to ensure accurate, high-performance reporting.
- Automated workflows with Python, SQL, and Excel (VLOOKUPS) and developed Tableau and Power BI dashboards that improved product safety tracking, reducing issue response time by 25%.
- Created custom Microsoft Power Apps integrated with BI tools for real-time complaint tracking, reducing manual reporting delays.
- Partnered with stakeholders across compliance and operations, managing project tracking and documentation in Jira and Confluence.

Chemist

ACM Chemistries

Norcross, GA

June 2021- July 2022

- Conducted in-depth chemical analyses to ensure the quality, consistency, and performance of raw materials and finished products.
- Integrated data tracking into lab workflows using Excel, improving accuracy and reporting efficiency.
- Built visual reports to monitor production trends and proactively identify bottlenecks in operations.
- Collaborated with R&D and production teams to refine formulations, leading to a \$1.3M cost savings and enhanced product performance.

R&D Chemist

Sherwin Williams

Grove City, OH

June 2018-March 2021

- Formulated and optimized over 500+ powder coating formulations for industrial and consumer applications, enhancing product durability, adhesion, and environmental compliance.
- Analyzed experimental data to improve coating performance, reduce defects, and cut material waste by 30%.
- Developed and implemented color-matching techniques using spectrophotometry, achieving a 98% accuracy rate in custom color formulations and reducing reformulation time by 40%.

PROJECTS

Business App Development with Power Apps

- Designed low-code business apps using Microsoft Power Apps to streamline complaint intake, audit tracking, and safety reporting workflows.
- Integrated Power Apps with SQL, SharePoint, and Power BI for real-time compliance visibility, reducing manual reporting delays.
- Utilized context variables and collections to manage form state, control navigation, and dynamically filter data across multiple app screens.

Data Integration and Process Optimization

- Led initiatives to integrate and clean large datasets across systems, ensuring accurate and reliable reporting.
- Developed Python automation scripts that eliminated 20+ hours of manual processing weekly and improved scalability.
- Standardized data workflows across teams to ensure consistent formatting, reduce errors, and improve collaboration.

EDUCATION

The Ohio State University

Bachelor of Science in Chemistry

Columbus, OH

2016-2018

Howard University

Completed Coursework in Chemistry before transferring

Washington, DC

2014-2015
