Professional Summary

Experienced Data Analyst and Statistical Programmer with 5 years of expertise in SAS, SQL, and data management, including relational databases and data warehousing. Skilled in data visualization, dashboard development, and statistical analyses. Possesses a solid understanding of clinical study data structures and FDA guidance on Clinical Report Form and define.xml files. Actively seeking a Statistical Analyst or Data Analyst role.

Technical Expertise

- **Statistical Programming:** SAS, R
- **Data Management:** MSSQL Server, MySQL
- **EHR:** Meditech, e-CW

Professional Experiences

Statistical Programmer

FDA/ Office of Clinical Pharmacology/ Center of Drug Evaluation and Research

Position: Statistical Programmer

2020.02 – Present

Data Analyst Responsibilities:

- Analyzed complex healthcare and clinical trial datasets to uncover patterns, and insights supporting drug reviews.
- Cleaned, managed, and validated datasets by identifying missing data and implementing imputation strategies per Statistical Analysis Plans (SAPs), ensuring high data quality and integrity.
- Ensured compliance with clinical data submission standards, and clinical report form specifications, while addressing data anomalies and discrepancies with professional judgment.
- Performed advanced statistical analyses—including logistic regression, survival analysis, Mixed Model for Repeated Measures for longitudinal data, and ANOVA/ANCOVA for bioequivalence and bioavailability assessments.
- Created comprehensive statistical tables, figures, and summaries to translate complex modeling results into accessible insights for review teams and researchers.
- Served as a consultant on data analytics techniques, contributing to the development of robust methodologies and coding standards for integrating and analyzing pooled data from diverse clinical studies.

Canton Potsdam Hospital

2018.04 – 2019.02

Position: System/ Data Analyst

Building data marts, automating analyses, performing Ad-Hoc reports for different clinical departments, update and expand analytics data to the existing dashboards.

- Automate monthly hospital wide clinical statistical reports.

- Successfully implement analytical and real-time dashboards (Dimensional Insight) for laboratory and radiology department to track turnaround times and working capacity.
- Work with process improvement team creating real time workload dashboards, analyzing real time numbers, and providing process improvement suggestions.
- Authorize and control access of different data assets, audit sensitive data access, ensure data integrity, and optimize data structure.

Raymond Internship

2017.06 – 2017.08

Analyze folk lifts operation data and present the insights to customers and implement basket analysis to predict the collisions/ damages within customers' warehouses (using R).

Manufacturing and Logistics Engineer

FAW Car Co., Ltd (Mazda OEM) – Chang Chun, China

2009 – 2014

Production Preparation Process Analysis, Workflow Analysis, Warehouse Layout Design, Operation Standard Design, Material Handling Equipment Contract Negotiation, and 3PL Service Contract Negotiation.

Educational Experiences

- **Clarkson University**, US: MS in Data Analytics, 2016–2017 (GPA: 3.9)
- **Clarkson University**, US: MBA, 2015–2017 (GPA: 3.9)
- **University of Warwick**, UK: MSc in Supply Chain & Logistics Management, 2014–2015
- **Ji Lin University**, China: Bachelor's in Automotive Engineering, 2005–2009
- **Ji Lin University**, China: Minor in Business Administration Management, 2007–2009

Achievement & Honor

- **Coauthor of Real-Time Analysis Repository system poster**,
<https://www.fda.gov/media/171093/download?attachment>
- **Coauthor of Automated tool to identify Pharmacokinetics Anomaly poster**
<https://www.fda.gov/media/141988/download>
- **Member of International Honor Society Beta Gamma Sigma.**
