Profile Highlights

- Ph.D. candidate in Disease Ecology with strong quantitative skills in epidemiology and public health research. Excellent writing and verbal communication skills; currently writing four manuscripts, presented in five scientific conferences, reviewed manuscripts for eight scientific journals, and published 14 peer-reviewed papers.
- Managed six CDC-funded projects with a total grant exceeding \$500000.
- Expert in research design development (quant and qual), data management, linking large datasets, multi-level analysis, complex survey design analysis, predictive modeling, and ecological niche modeling.
- Proficient in advanced-level statistical analysis, particularly regression, latent class, discrete-time survival, Bayesian, and spatial analysis. Expert in Stata and SAS programming language, intermediate in R.

Work Experience

- Graduate Teaching Assistant** Jan 2021-Jul 2025
 - Facilitated and Taught Undergrad Courses in Disease Ecology, Evolutionary Biology, and General Biology
- Research Intern** Jun 2022-Aug 2022
 - Research Intern, Development of Educational Materials for COVID-19 Prevention at University of Tennessee Extension
- Assistant Scientist** Jan 2020-Dec 2020
 - Program for Emerging Infections, International Centre for Diarrheal Disease Research, Bangladesh (ICDDR,B)
- Research Investigator** May 2015-Dec 2019
 - Program for Emerging Infections, Infectious Diseases Division, ICDDR,B
- Field Research Officer** Jun 2013-Apr 2015
 - Center for Communicable Diseases, Program on Infectious Diseases & Vaccine Science, ICDDR,B
- Officer, Sales & Technical Services** Dec 2012-May 2013
 - Chareon Pokhphand Groups Bangladesh Limited
- Product Executive** Mar 2011-Nov 2012
 - The ACME Laboratories Limited, Dhaka

Academic Training

Ph.D. in Disease Ecology, Expected Jul 2025

Ph.D. (First Gen), Department of Ecology & Evolutionary Biology, University of Tennessee, Knoxville, TN
Dissertation Title: Understanding how social, environmental, and etiological factors shape (re)emerging infectious disease outbreaks. Advisor: Nina Fefferman

Master of Public Health (Epidemiology), 2012

American International University Bangladesh, Dhaka, Bangladesh

Doctor of Veterinary Medicine, 2010

Chittagong Veterinary and Animal Sciences University, Chattogram, Bangladesh

Transferable Skills

Data Analysis (Quantitative)
Research Design
Report writing

Data Merging and Validation
Evaluation Research
Presentation Skill

Data Preparation
Qualitative Data Analysis
Scientific Writing
