Education

Lewis & Clark College | Portland, Oregon USA

Graduating May 2025

Bachelor of Arts in Computer Science and Mathematics

Overall GPA: 3.461, Major GPA: 3.410

Skills: JavaScript, Java, Python, C, PHP, PSQL, R Studio, Git, HTML, CSS

Academic Scholarships & Awards: Davis United World College Scholarship, Dean's List Spring 2023

Relevant coursework: Cybersecurity, AI and ML, Statistical Methods and Concepts, Computer and Network Security, Simulation-Based Statistics, Network and Web Development

Experience

HiddenLayer Inc. | Austin, TX (Remote)

May 2024 - August 2024

Machine Learning Engineering Intern

- **Enhanced ML Team's Toolkit:** Developed and optimized functions in the common code toolkit using Python, improving efficiency and usability for the ML team.
- **Model Inference and Security:** Conducted inferences on over 10 deep learning models using PyTorch and TensorFlow, and conducting model scanning through internal tools to help detect malware in models.
- **Data Preprocessing:** Cleaned and transformed more than 10 diverse datasets (image, video, audio, and text) using Python libraries, ensuring high-quality data for model training and evaluation, before uploading to the cloud.
- **Code Refactoring and Standardization:** Collaborated with team members to refactor and standardize the existing codebase, resulting in a more organized and maintainable repository.

Easy Event Planning | Henderson, NV USA (Remote)

September 2023 - December 2023

Database Management / Analyst Intern

- **Search Engine Optimization (SEO):** Utilized Excel to filter and select relevant keywords and popular searches related to the company's products, contributing to improved page rankings on Google.

SmartOne | Antananarivo, Madagascar

June 2023 - August 2023

Software Development and Data Science Intern

- **Automatic Quality Assurance Scripting:** Wrote Python scripts to automate initial quality assurance evaluation, using Pandas to process sheets with over 10,000 data points for Computer Vision-related projects
- **Internal Tool Development:** Developed and Deployed a small full-stack application to transform json files into csv files with a frontend.
- **Database Maintenance:** Updated and modified database and website content to ensure relevance and accuracy.
- **Data Analysis:** Analyzed user data to identify trends and patterns, providing actionable insights to improve website content.

Projects

National Cyber League Participation (Individual Games)

Fall '23 & Spring '24

- **Skills Learned:** Open Source Intelligence, Cryptography, Password Cracking, Web App Exploitation, Log Analysis,
- *Noteable Scores (Fall):* Cryptography: **86th Percentile**, Password Cracking **83rd Percentile**.
- *Notable Scores (Spring):* Exploitation and Enumeration : **99th Percentile**.

American Statistical Association(ASA) Datafest | Portland, OR USA

April 2023

- Collaborated with a team to analyze and process over 1,000,000 data points from the American Bar Association
- Discovered patterns in the data and provided actionable insights through statistical inference.
- Executed data wrangling and data visualization techniques to clean, manipulate, and present data effectively.

Lyft Backend Engineering Virtual Experience Program on Forage

July 2022

- Implemented a maintenance check mockup, using Software Development Behavioural Patterns, Unit Testing, Object Oriented Programming in Python.
- Worked with inheritance, using multiple classes to create a complex maintenance system for a car factory program.
