470-457-4272 | mahek.gupta@live.mercer.edu | www.linkedin.com/in/mahek-gupta-408a5619a

Data-driven healthcare professional and business analyst with experience in healthcare data analysis, public health communications, and predictive modeling. I have worked with organizations such as the CDC and Entrigna to analyze large-scale data, optimize processes, and support critical decision-making. I combine technical proficiency in Python, R, SQL, and Tableau with a passion for using data to improve health outcomes, enhance operational efficiency, and promote community engagement.

CERTIFICATION & TECHNICAL SKILLS

- **Skills:** Lean Six Sigma, Yellow Belt
- **Programming:** Python (Pandas, NumPy), R, SQL (MySQL), DBeaver
- **Data Visualization:** Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP, XLOOKUP)
- **Statistical Analysis:** Regression Analysis, Hypothesis Testing, Time Series Analysis
- **Tools:** Microsoft Office Suite, Adobe, ETL/ELT, Data Wrangling, Canva, EHR/EMR, HL7

RELEVANT WORK EXPERIENCE

Amitech

St. Louis, MO

Data Analyst Intern

April 2025 – Ongoing

- Contributed to the development of a future-state data catalog for a national healthcare transportation organization serving millions of rides annually, by collaborating with data stewards and stakeholders to document metadata, ownership, and classification for thousands of PHI/PII-sensitive data elements—laying the foundation for scalable governance and self-service analytics
- Supported enterprise data governance and quality initiatives by documenting data lineage, logging data quality issues (e.g., missing values, duplicates), and drafting policies for data access, lifecycle, and compliance—improving data transparency and reducing reporting errors.
- Conducted data profiling and exploration using SQL, Python, and Power BI to identify anomalies, assess data distributions, and address missing values to support accurate analysis and reporting for a mid-sized regional women's health facility.
- Developed and maintained dashboards and visualizations in Power BI and Excel and executed ad hoc analyses by writing and validating SQL and Python queries to clean and prepare datasets.
- Created and updated data dictionaries and field-level documentation, supporting business users with KPI validation and definitions to ensure data consistency and clarity across reports.

CDC (Centers for Disease Control & Prevention)

Atlanta, GA

Orise Fellow at Department of Emergency Preparedness & Response

Feb 2023 – July 2023

- Collaborated with subject matter experts to synthesize and disseminate critical updates on global public health emergencies—including COVID-19, Ebola, Influenza, and Mpox—reaching 2,000 to 6,000 clinicians nationwide through timely communications.
- Streamlined and enhanced standard operating procedures (SOPs), improving system and software workflows for emergency preparedness communications.
- Designed, developed, and published professional-grade newsletters using Adobe tools, significantly improving the clarity, accessibility, and reach of urgent health alerts.
- Transcribed and translated high-level COCA (Clinician Outreach and Communication Activity) calls into structured, searchable public health guidance for inclusion in CDC's national database, supporting clinical response efforts.

Entrigna
Healthcare Data Analyst

Chicago, IL
March 2022 – July 2023

- Analyzed large-scale healthcare datasets to identify key socio-economic and demographic predictors influencing COVID-19 vaccine uptake, supporting data-driven public health strategies and targeted outreach initiatives.
- Built and operationalized a predictive model leveraging statistical techniques and tools such as Tableau and Excel, enabling visualization of trends and insights across thousands of records to inform decision-makers and improve vaccination campaign effectiveness.

ADDITIONAL VOLUNTEER EXPERIENCE & PROJECTS

Mercer University Office of Global Engagement

Atlanta, GA

International Student Ambassador

Aug 2023 - Dec 2024

- Streamlined data entry processes, enhancing efficiency in databases for 10-15 students weekly using excel.
- Facilitated multicultural events and sports activities to promote cultural inclusivity and engagement.

Mercer University MSBA

Atlanta, GA

Projects & Capstone

Aug 2023- Dec 2024

- Designed predictive models for disease outbreak and detection using R, Excel and Tableau.
- Optimized supply chain processes using What-if Analysis, Solver, V-lookup excel tools and SQL queries, increasing efficiency through data driven decision making.
- Conducted and presented academic research on emerging health issues, including ‘Sleep Health’ by identifying several statistically significant predictors.

Read to Succeed

Macon, GA

Tutoring Volunteer

Spring 2020

- Applied various learned techniques to mentor third grade level students and foster learning initiatives for children with low literary levels in rural communities.

Macon Clinic

Macon, GA

Volunteer

Fall 2018

- Supported under-staffed and low resource clinics in rural Macon pro bono to support community health efforts.

EDUCATION

Mercer University

Atlanta, GA

Master’s degree in Business Analytics, GPA 3.8

Dec 2024

Mercer University

Macon, GA

Bachelor’s degree in Public Health, Dean’s List 2021

May 2022
