Education

New Jersey Institute of Technology, USA	08/2022 - 12/2023
Master of Science in Data Science	
Manipal University Jaipur, India	08/2018 - 05/2022
Bachelor of Technology in Computer and Communication Engineering	

Skills

Area of Expertise:	Data Structures, Machine Learning, Recommendation system, Strategic Consultant, Web Development, Database Management, Machine Learning, NLP, Tableau, Power BI, Business Analysis, Risk Management, Agile, Scrum
Programming Languages:	Python, Scikit Learn, SAS, R, C, HTML, CSS, PHP, JavaScript, Waterfall
Technologies:	Flask, NodeJS, NumPy, Pandas, Keras, MySQL, OpenCV2, Snowflake, LLM, Git (Version Control System)

Work Experience

MBM NGO (New York), Data Analyst	01/2024 - 07/2024
- Built and optimized 5 Google Ad campaigns to drive traffic to MBM's website, achieving a 92% optimization score as measured by Google Ads metrics. - Increased impressions by 50% through campaign refinements, indicating improved campaign performance. - Created an analytics report encompassing all campaigns for stakeholders' review, providing insights into campaign effectiveness.	
Outlier AI (USA), Data Scientist Freelancer	02/2024 - 03/2024
- Developed and trained over 30 LLM and machine learning models, demonstrating proficiency in model creation and training. - Conceived and formulated specialized prompts, elevating model effectiveness by 45%, which led to a 30% reduction in complaints. - Optimized code efficiency to streamline model development processes, exemplifying a commitment to improving workflow productivity.	
Bayer (New Jersey), Data Scientist Co Lead	09/2023 - 12/2023
- Extracted crucial occupation and lifestyle insights from 1M+ records, leveraging AWS, Snowflake, Databricks, and Tableau to contribute to the development of targeted personas. - Achieved Machine Learning modeling techniques to create targeted personas, enhancing the effectiveness of marketing strategies for 10+ products by following agile and scrum analysis - This process facilitated the alignment of marketing efforts with customer demographics, resulting in better campaign targeting and higher conversion rates.	
Boost Money [Financial Startup], AI Intern	05/2023 - 06/2023
- Designed an entity extraction model utilizing BERT models, achieving a 92% accuracy rate and enhancing data processing efficiency. - Implemented custom entity extraction using Hugging Face models to categorize database information effectively.	
Snaphunt (Singapore), Data Science Intern	01/2022 - 05/2022
- Developed a Job Recommendation System using Python, git, and Machine Learning techniques, enhancing job search outcomes with a model accuracy of 94%. - Collaborated on implementing unique features for the company's website, leveraging technologies such as FastAPI and MongoDB to improve user experience and functionality.	
Petals (India), Co-Founder	05/2018 - 12/2021
- Achieved a 20% increase in website conversions and 30% growth in foot traffic, measured through comprehensive analysis of website and foot traffic trends and implementation of data-driven strategies. - Increased productivity by 50% through the development of streamlined operational procedures, resulting in enhanced efficiency and reduced costs.	

Projects

Font Detection (USA)	Delivered a Python-based font detection tool for document analysis, improving text formatting understanding and aiding educational and accessibility needs.
NBA Insights using Tableau (USA)	Utilized Tableau to analyze 10+ NBA player data, revealing insights such as the lack of correlation between height and scoring ability, and the significant variations in total points scored by teams across 20 seasons.
Movie Recommendation (USA)	Produced a Movie Recommendation System that recommends movies with genre and similarities with other movies using a metric cosine similarity, version control systems like git and ML and had an accuracy of 95%.
Financial Market Prediction (USA)	Built a stock market prediction model using regression analysis and Python libraries, achieving a predictive accuracy of 85% and had a budget-constrained stock buying algorithm using R code, optimizing the allocation of funds to maximize returns within budget constraints which follows the financial market in real time.

Professional Affiliations

- Data Science Representative of GSA (Graduate Student Association) and President of Sanskar Club at NJIT, New Jersey
- Teaching Assistant and Library Assistant at NJIT, New Jersey
- Head of Microsoft Student Ambassador and Head of external affairs and marketing head at AI club at Manipal University, Jaipur

Certifications

Oracle Cloud Infrastructure 2024 Generative AI Certified Professional	07/2024
Machine Learning Foundation, Amazon	04/2024
Salesforce: Generative AI/ Data Cloud	04/2024
