Professional Summary

Data driven public health and social science professional with experience managing, cleaning, analyzing, and reporting survey and research data. Skilled in rapid-cycle analysis, data validation, and translating complex quantitative and qualitative findings into clear, actionable reports for technical and non-technical audiences. Strong interest in early childhood, equity-focused research, and data-informed policy.

Experience

California State University, East Bay Research Data / Program Assistant

October 2021 - December 2025

- Collected, cleaned, and managed large survey datasets to ensure accuracy, completeness, and usability
- Conducted statistical analyses on structured survey data to identify trends and patterns relevant to program and policy decisions
- Produced tables, charts, graphs, and written summaries for reports, presentations, and internal briefs
- Validated datasets by identifying inconsistencies, missing data, and discrepancies across data sources
- Supported rapid cycle reporting by meeting frequent deadlines and adapting analyses as new data became available
- Collaborated with project managers and researchers to align analyses with research goals and data standards
- Assisted in preparing dissemination materials such as data briefs, fact sheets, and summary reports

Education

August 2024 - (in progress) May 2026

Bachelor of Science in Public Health

California State University, East Bay

Associate of Arts in Human Development

Ohlone College

Completed: May 2023
