

Matthew Scoppa

Saint Clair Shores, Michigan | (586) 808-2026 | matthewscoppa@gmail.com

Career Focus

Detail-oriented Software Engineer with over 4 years of experience in back-end development and data integration. Demonstrated ability to develop and maintain scalable software solutions, primarily using Java and MySQL. Driven to create software that has an impact, with an emphasis on writing well-tested, high-quality code that satisfies business and technical requirements. Adept at debugging intricate systems, mentoring junior developers, and having a constant willingness to learn and grow in dynamic technical environments.

Education

Central Michigan University | Mount Pleasant, Michigan

Graduated May 2021

Bachelor of Science, Computer Science and Information Technology

Technical Skills

Languages: Java, MySQL, Python, Javascript, Ruby, C, HTML, CSS

Language Tools: JUnit, Maven

Tools: Docker, Git, Jira, Linux, REST APIs

Work Experience

Senior Software Engineer

Dext | London, England (Remote)

July 2021 - August 2025

- o Improved product capabilities by aggregating data from third-party financial APIs, such as Square, Etsy, and Amazon Business.
- o Developed and maintained code within a large-scale microservices architecture, balancing legacy maintenance with new feature development
- o Provided direction, technical assistance, and opportunities for peer programming to junior developers.
- o Conducted thorough code reviews to uphold best practices in code quality, security, and maintainability.
- o Thoroughly tested code to guarantee data accuracy and lower post-deployment errors using JUnit.
- o Contributed technical know-how to help the customer service team address user issues that escalated.
- o Diagnosed and resolved complex bugs and production issues across various services to ensure platform stability.
- o Led code deployments through CI/CD pipelines ensuring reliable and seamless releases in production environments.
