EDUCATION

UNIVERSITY OF HOUSTON, C. T. Bauer College of Business, Houston, TX

December 2024

Master of Science in Management Information Systems, GPA: 3.82/4.0

Relevant Coursework: Database Management Systems (SQL), OOP (Java), Cloud Data Visualization (Power BI), IT Project Management

GEETHANJALI COLLEGE OF ENGINEERING AND TECHNOLOGY, Hyderabad, India

May 2022

Bachelor of Technology in Electronics and Communication Engineering, GPA: 3.52/4.0

TECHNICAL SKILLS

Data Engineering and ETL: SQL (joins, CTEs, window functions, triggers, stored procedures), Azure Data Factory, Azure Databricks (PySpark), Apache Kafka, Hadoop, Apache Spark

Business Intelligence and Visualization: Power BI (DAX, Power Query, Data Modeling), Tableau, Excel (VBA Macros, PivotTables), Alteryx

Databases: PostgreSQL, MySQL, SQL Server, Azure SQL Database, Data Lake Storage

Programming & Scripting: Python (Pandas, NumPy, Selenium, BeautifulSoup), Java, HTML, R

Cloud Services: Azure Synapse Analytics, Functions, Event Hubs

EXPERIENCE

EQUUS WORKFORCE SOLUTIONS, Houston, TX

March 2025- Present

Performance Analyst

- Extracted, cleaned, and analyzed 1M+ workforce system records using SQL, leveraging joins, CTEs, and window functions to generate actionable insights that improved KPI tracking for 10+ state and federal employment programs
- Designed and automated ETL workflows with Power Platform and Power Query, integrating transformed data into Power BI for weekly refresh and real-time performance tracking
- Developed interactive Power BI dashboards using DAX and custom data models, to visualize staff performance and reemployment trends across 3 office locations, reducing manual reporting by 80% and enabling data-driven hiring decisions
- Integrated 15+ static Excel reports into a unified BI solution, leveraging Power Query for data transformation and DAX for KPI calculations, improving reporting accuracy by 30% and saving 10+ analyst hours/week
- Automated performance reporting using Excel Macros, standardizing metrics and enhancing reporting consistency across multiple teams
- Collaborated with program directors and office managers to align KPIs with state workforce reporting standards, applying data validation and business rules to ensure 100% compliance and maintain data integrity

SYCAMORE LIFE SCIENCES, Houston, TX

May 2024-December 2024

Data Analyst Intern

- Led a vendor product data extraction and analysis project with Python (Pandas, Selenium, and BeautifulSoup), achieving 99% capture accuracy across 5000+ SKUs
- Streamlined data collection workflows, saving 20 hours/month and improving inventory forecasting accuracy by 30% through Python and Excel automation
- Leveraged Tableau to visualize inventory and customer trends, informing marketing strategies that increased customer engagement

- Designed and optimized a PostgreSQL database for 200+ student records, streamlining CRUD operations and reducing administrative time by 25%
- Analyzed student academic performance using SQL delivering insights that guided targeted student support interventions

VIRTUSA CONSULTING SERVICES PVT LTD, Hyderabad, India
Associate Engineer

2021-2022

- Spearheaded a full-scale data migration from SQL Server to Azure, with complex operational and performance datasets.
- Developed end-to-end ETL pipelines in Azure Databricks using PySpark to process 120+ bot log streams daily, transforming unstructured logs into structured KPIs.
- Improved data storage and retrieval efficiency by integrating with Azure Synapse Analytics, enabling fast querying and KPI tracking to support data-driven decision-making
- Automated bot performance monitoring using SQL in Azure Synapse, reducing manual reporting effort and lowering labor costs by 10% through real-time insights
- Built Power BI dashboards incorporating DAX measures and dynamic aggregations to monitor data quality, detect anomalies, completeness gaps, and transformation errors during and after migration.
- Managed migration sprints in Jira, tracked and coordinated cross-functional tasks; documented processes in Confluence to ensure knowledge transfer and maintain compliance

HYVAC ENGINEERS, Hyderabad, India
Data Analyst

2020-2021

- Designed Power BI dashboards to monitor machine utilization rates, downtime hours, and production throughput, enabling managers to identify bottlenecks and increasing up time by 15%
- Built and optimized SQL queries to extract and validate inventory data, improving accuracy of raw material and finished goods tracking by 25%
- Collaborated with supply chain teams to analyze supplier lead times, defect rates, and order fulfillment performance, highlighting opportunities to consolidate vendors and cut delays by 12%
- Automated recurring reports on inventory levels, machine efficiency, and supplier performance using SQL + Excel, saving the team 8 hours/week
- Trained floor supervisors on interpreting dashboards and KPIs such as Overall Equipment Effectiveness (OEE), and On- Time Delivery (OTD) to drive data-driven decisions

PROJECTS

Data Analysis and Visualization Project (Power BI)

- Delivered 3 Power BI dashboards analyzing CenterPoint Energy's financial, environmental and operational data, boosting transparency in profitability tracking and improving marketing ROI analysis
- Engineered robust data models using DAX and Power Query, enabling dynamic filtering, calculated metrics, and drill-through capabilities for deeper insights
- Optimized dashboard performance and usability through custom visuals, hierarchical slicers, and role-level security, enhancing stakeholder engagement and adoption across departments
