Education

Bellevue University

Bellevue, NE

Bachelor of Science, Software Development

Summary

Enthusiastic .NET and C# developer leveraging a strong analytical mind for programming while completing a B.S. in Software Development. Proficient with MVVM and MVC architectures with a focus on building robust, scalable code with automated test suites. Targeting a remote .NET developer role but willing to relocate in the future.

Skills & Interests

Languages: C# (Proficient), MySQL and SQLite (Competent), XAML (Competent), JSON (Competent)

Technologies & Frameworks: Visual Studio, MySQL Workbench, .NET MAUI, Moq, xUnit

Interests: Solving problems through software; soliciting feedback on application performance and UI experience; designing program architecture with elegance and adherence to design standards; learning about new features in .NET and C#

Projects

DrinkStock: MAUI application created to facilitate restocking bottled drink machines on a retail floor

- Repository Link: github.com/CuriousDev165/DrinkStock
- Implemented an MVVM architecture with two-way data binding

GymPal: MAUI application created as a convenient means of recording workout data and measuring progress

- Repository Link: github.com/CuriousDev165/GymPal
- Added to MVVM and data-binding experience gained from DrinkStock to offer greater utility
- Implemented xUnit for unit testing and a tab bar for convenient navigation
- Implemented local storage with SQLite for quick access to workout data without needing an Internet connection
- Included a unit test project using xUnit for testing business and program logic
