EDUCATION

B.S. in Computer Science, Information Systems (May 2025)

Biola University

- Dean's List: August 2021 - May 2025
- GPA: 3.82

SKILLS

Programming Languages: C++, Python, Java, Javascript, Typescript, HTML, CSS, TailwindCSS, Golang, Bash

Development Programs: Visual Studio Community, Visual Studio Code, Xcode, Figma, Cursor AI, JetBrains Rider

Backend & Tools: Node.js, MySQL

Frameworks/Libraries: SwiftUI, React.js, Expo

PROJECTS

Custom MCP Server

May 2025 – August 2025

- Built a custom Model Context Protocol server from scratch in Python using the FastMCP 2.0 library, creating 4 fully functional MCP tools that allowed Claude AI to access, retrieve, and update internal database records.
- Designed the server to process natural language prompts like “Get all communication records for John Doe from LA,” guiding the AI to ask for missing data (e.g. city/email) and confirm context, boosting reliability by >95%.

[Rebooked](#)

March 2024 – Present

- Engineered a marketplace app for college students using Expo, TypeScript, React.js, Figma, and CSS to facilitate efficient financial transactions within target demographic groups while maintaining high engagement levels from initial test users.
- Engaged more than 100 selected participants during initial beta testing phase to validate core functionalities including monetization strategies with a \$1 subscription plan, resulting in valuable feedback for future iterations.

Fast PII Redaction Tool

May 2025 – August 2025

- Engineered a PII detection and redaction system using Ollama's Qwen3:12B LLM and Regex; scanned and sanitized 800-word communications records in <8 seconds, cutting manual review time by >95%.
- Implemented a risk-level classification system for PII detection, flagging 50+ communication records with a None, Low, Medium, or High risk rating based on the presence and severity of detected sensitive information.

EXPERIENCE

Software Developer Internship

May 2025 – August 2025

Samaritans Purse

Boone, NC

- Led a 1-hour live demo and presentation to the Director and General Manager of IT, AI Specialist, and 5+ technical leads, showcasing real-time MCP database integration and PII redaction powered by Ollama Qwen3.
- Created a commit message generation tool integrating local git changes with Qwen3 via a Bash script; reduced cognitive overhead from 30-60 seconds per commit to 3-5 seconds.
- Developed a daily CI/CD Jenkins job to test SDK upgrade compatibility for Donor-Ops; saved engineers time and preemptively caught 8 critical build errors before production, improving release stability.

Peer Internship Ambassador

August 2024 – May 2025

Career Center @ Biola University

La Mirada, CA

- Facilitated one-on-one career coaching for 3+ STEM students weekly, revising resumes, cover letters, assisting with LinkedIn networking and job searches.
- Created networking events for both students and professionals in the desired field and delivered presentations to 200+ students while also designing a GitHub workshop for Computer Science majors to learn Git and GitHub.

LEADERSHIP & ACTIVITIES

Club President

August 2022 – May 2024

Esports Club | Biola University

La Mirada, CA

- Hosted bi-weekly Esports tournaments for Super Smash Bros Ultimate, expanding event attendance to an average of 20-30 players, including 50% external participants, and initiated live streaming on [YouTube](#).
