PROFESSIONAL SUMMARY

Experienced Statistical Programmer with five years of expertise in SAS-based clinical data analysis for clinical trials. Proven track record of delivering accurate and timely results while collaborating effectively within multidisciplinary teams. Known for a results-driven approach, attention to detail, and commitment to project deadlines. Passionate about leveraging skills to develop innovative solutions and contribute to organizational success.

CORE COMPETENCIES

Clinical Trials || SAS Programming || R Programming || CDISC || Tables and Listings (TL of TLFs)
Time Management || Teamwork || Oral and Written Communication || Critical Thinking

PROFESSIONAL EXPERIENCE

Statistical Programmer I

Precision for Medicine in Carlsbad, CA || September 2019 - May 2024

- Developed production and validation SAS programs to generate listing and table outputs from clinical databases and other clinical data sources.
- Created Study Data Tabulation Model (SDTM) domains through SAS programming.
- Have experience working with Analysis Data Models (ADAM).
- Completed multiple programming assignments with minimal supervision to provide support to multiple project teams. Often working on 2-4 separate studies at a given time.
- Consistently provided quality deliverables by following company programming standards and SOPs.
- Collaborated with co-workers to troubleshoot problems.

Research Associate - Temporary (Fermentation Data Analyst)

Nucelis, LLC in San Diego, CA || February 2014 - May 2014

- Bioinformatics data analysis using programs such as SnapGene and BLAST
- Assisted scientists in the laboratory.

Bioinformatics Intern

Genoptix – Carlsbad, CA || September 2013 to December 2013

- Analyzed data using programs such as Nextgene and CLC Bio Genomic Workbench.
- Interpreted data using visualization programs such as Integrative Genomics Viewer and UCSC Genomic Browser.

EDUCATION

Masters of Bioinformatics and Medical Informatics || San Diego State University in San Diego, CA || 2018

Thesis: Metagenomic Analysis of Archaea and Viruses in PCOS Mouse Model

Programming Languages: R, SQL, Python, Java

Bachelor of Science in Biology || San Diego State University in San Diego, CA || 2013
