SUMMARY

Software & Cloud Engineer with around 4 years of experience building scalable, secure, and automated applications on AWS and Azure. Skilled in Java, Spring Boot, React, Terraform, Docker, and Kubernetes with proven success optimizing CI/CD pipelines, improving uptime, and reducing cloud costs. Passionate about designing high-performance systems that drive measurable business outcomes.

TECHNICAL SKILLS

- Programming:** Java, Python, JavaScript, TypeScript, SQL
- Backend:** Spring Boot, Node.js, Django, .NET Core, REST APIs, Microservices
- Frontend:** React.js, Angular, HTML, CSS, Bootstrap, Responsive UI
- Databases:** PostgreSQL, MySQL, MongoDB, Redis, Oracle, AWS RDS
- Cloud & DevOps:** AWS (EC2, EKS, Lambda, IAM, S3, CloudWatch), Azure, Terraform, Docker, Kubernetes, Jenkins, Prometheus, Grafana, Ansible, Helm, GitLab CI/CD.
- Testing:** JUnit, Mockito, Selenium, Postman, TestNG, Unit & Integration Testing
- Tools:** Git, GitHub, GitLab, JIRA, Confluence, IntelliJ, VS Code, Maven, Gradle
- Methodologies:** Agile/Scrum, SDLC, Infrastructure as Code (IaC), CI/CD Automation

EXPERIENCE

Cloud Engineer <i>Charles Schwab, Washington, DC</i>	Jan 2025 – Present
- Architected AWS cloud infrastructure (EC2, EKS, Lambda, RDS, S3) supporting 50K+ users and boosting uptime from 94.5% to 99.8%. - Automated environment provisioning with Terraform and Ansible, cutting setup time by 40% and ensuring consistent infrastructure across environments. - Built CI/CD pipelines using Jenkins and GitHub Actions, improving deployment velocity 3× while reducing release errors by 60%. - Integrated observability stack (Prometheus, Grafana, CloudWatch) to reduce mean time to resolution by 50% and improve SLA compliance. - Strengthened IAM and access policies, reducing security incidents by 25% and ensuring compliance with FINRA standards. - Containerized legacy Java apps with Docker and deployed to EKS, improving resource utilization by 35% and cutting operational costs.	
Full Stack Developer <i>Achaarya Tech, Chennai, IN</i>	Jun 2021 – Jul 2023
- Designed and deployed microservices-based applications on Azure AKS, increasing uptime to 99.9% and improving scalability. - Built REST APIs using Spring Boot and Node.js integrated with PostgreSQL and MongoDB, reducing response times by 30%. - Automated infrastructure using Terraform and ARM templates, decreasing manual configuration errors by 70%. - Streamlined CI/CD workflows with Azure DevOps and GitLab CI/CD, cutting integration time by 60% and enabling continuous delivery. - Developed real-time communication features using Web Sockets and gRPC, improving engagement by 15%. - Led frontend modernization to Angular 15 with Bootstrap 5, cutting load times by 35% and raising user satisfaction by 25%.	
Junior Software Engineer <i>Skill Safari, Coimbatore, IN</i>	Aug 2020 – June 2021
- Developed HIPAA-compliant healthcare systems with Spring Boot and Angular, improving data processing efficiency by 40%. - Optimized SQL queries across Oracle and SQL Server, reducing query latency by 35% and improving system throughput. - Implemented API authentication with OAuth2 and Spring Security, lowering security vulnerabilities by 20%. - Built automated test suites with JUnit, Mockito, and Selenium, reducing post-release defects by 50%. - Collaborated in Agile teams, delivering production-ready features 15% ahead of schedule with zero major bugs.	

EDUCATION

Master of Science (M.S.) in Data Science	
The George Washington University, Washington, DC	Aug 2023 – May 2025
Bachelor of Engineering (B.E.) in Computer Science	
Government College of Engineering, Bodinayakanur, India	Aug 2018 – Jun 2022

PROJECTS

<
