

Muniza Hossain

3749 Kings Point Drive, Troy, MI 48083 | 724-989-9866 | muniza.uddin@gmail.com | [LinkedIn](#) | US Citizen

Summary:

Detail-oriented Data Analyst with hands-on experience extracting, transforming, and validating healthcare data from EPIC EHR systems. Proficient in SQL, SAS, Python, R, and Excel, with a strong foundation in querying complex relational databases, translating SAS logic into SQL, and automating data extraction workflows. Experienced in data cleaning, validation, trend, and root-cause analysis to ensure high-quality, reliable datasets.

Skills:

- Data Analysis & Programming: SQL, SAS, Python, R, Java
- Web Development: HTML, JavaScript, CSS
- Data Management: Data Mining, Cleaning, Transformation, Integration, and Validation
- Visualization & Reporting: Microsoft Excel, Microsoft PowerPoint, Microsoft Visual Studio Code
- Process Improvement: QA Testing, Health Data Preparation, Automation, Trend Recognition
- Soft Skills: Communication, Problem-solving, Organization, Cross-Team Collaboration

Education:

Master of Science- Information Technology | *University of The Cumberlands, KY* May 2024
Master of Science- Pharmacology | *Georgetown University, DC* May 2014
Bachelor of Science- Biology | *Saint Vincent College, PA* May 2013

Certificates:

- Enterprise Data Science | *IBM*
- Python Specialization | *University of Michigan*
- Java Programming Specialization | *Duke University & University of San Diego*
- Web Development Specialization | *University of Michigan*
- Registered Scrum Master™ (RSM) | *Scrum Inc*
- Salesforce Readiness | *Trailhead*

Work Experiences:

Data Analyst Programmer | **Henry Ford Health, MI** *Dec 2022- Present*

- Skilled in using SQL to extract healthcare data from EPIC EHR records.
- Proficient in navigating and querying complex relational database structures using SQL and SAS.
- Created command prompt batch files to trigger data extraction using SQL, SAS, and Python programming.
- Ability to code SAS algorithms into SQL programs.
- Utilized complex SQL queries involving multiple types of Joins and Subqueries.
- Utilized Excel to transform raw data into analyzable formats for stakeholder use and data visualization.
- Trend Analysis, Root Cause Analysis, Troubleshooting, and finding anomalies in data.
- Applied data validation and data cleaning methods to maintain accurate, reliable datasets
- Collaborated with cross-functional teams in projects involving data mining and data cleaning with EPIC data.
- Liaison between the research team and other stakeholders to contribute to research deliverables on time.
- Taken initiative to adapt new methods to increase workflow accuracy and efficiency.

- Delivered data outputs using descriptive statistics, inferential statistics, and other methods, meeting business specifications and data quality standards.

*Histotechnologist | **Henry Ford Health, MI***

May 2019- Dec 2022

- Executed and monitored IHC staining processes using automated platforms for accurate data outputs.
- Analyzed process data to troubleshoot issues, identify root causes, and implement corrective actions.
- Served as a liaison between histology and IHC teams by sharing methods and processing data.
- Communicated with stakeholders to manage IHC requests, processing timelines, and data-driven expectations.

*Research Coordinator I | **Beaumont Health, MI***

Oct 2017- Jan 2019

- Maintained and audited specimen data within the Biological Tracking Management (BTM) system to ensure accuracy, completeness, and traceability.
- Trained research assistants and students on data handling procedures, quality standards, and system usage.
- Analyzed PCR datasets using statistical software (Expression Suite) to validate results and identify trends.
- Executed standardized laboratory procedures while ensuring accurate data capture and documentation

*Immunocytochemistry Technologist | **John Hopkins University, MD***

May 2014- July 2017

- Root-cause analysis and optimization of IHC staining protocols to improve process reliability and data quality.
- Managed team members in executing routine laboratory procedures while ensuring precise data capture.
- Tracked, validated, and updated experimental data and antibody records within a centralized database.

Publications:

- M. Meranda, M. Drallmeier, S. Kavuri, J. Abad, A. Mittal, R. Farook, **M. Hossain**, et al. "The mediating effects of racial and social health disparities on cancer urgent care outcomes: An urban cancer center experience." in *Blood*, vol. 144, Supplement 1, p. 2266, Nov. 2024

Poster Presentation:

- S. Karrar, H. Shin, Q. Zhang, **M. Hossain** et al, "Empty plates, smaller weights: Exploring the association between food insecurity and fetal growth restriction," poster presented at the SMFM 2026 Pregnancy Meeting, Las Vegas, NV, USA, Feb. 11, 2026.
- E. A. Boakye, C. P. Wilson, T. M. Zatirka, N. Kumar, W. K. Su, M. Hossain, et al, "Exploring relationships between social determinants of health," poster presented at the 18th AACR Conference on the Science of Cancer Health Disparities in Racial/Ethnic Minorities", Baltimore, MD, USA, Sep. 18–21, 2025.
- A. Kulkarni, A. Bossick, D. White Perkins, M. Hossain et al, "Differences in social determinants of health screening among Henry Ford Health patients," poster presented at the 21st Annual Research Symposium, Henry Ford Health, Detroit, MI, USA, 2024.
