

SUMMARY

Software Developer with 4+ years of experience designing and developing scalable, cloud-native web applications and APIs using Python, JavaScript, and SQL. Skilled in building microservices architecture and containerized deployments with Docker and CI/CD pipelines. Proficient in Python frameworks (Django, Flask, FastAPI) and modern front-end tools (React.js, Bootstrap, HTML5, CSS3). Experienced with AWS and GCP cloud infrastructure, performance optimization, and end-to-end software lifecycle management. Known for clean, maintainable code, strong problem-solving, and collaboration across cross-functional Agile teams.

SKILLS

- **Languages:** Python, JavaScript, SQL, PL/SQL
- **Frameworks:** Django, Flask, FastAPI, Node.js, Express.js, React.js
- **Web Technologies:** HTML5, CSS3, Bootstrap, AJAX, JSON, RESTful APIs, API Integration
- **Databases:** PostgreSQL, MySQL, SQL Server, MongoDB
- **Cloud Platforms:** AWS (EC2, Lambda, S3, RDS), GCP (Cloud Run, BigQuery), Cloud Infrastructure
- **DevOps & Tools:** Docker, Kubernetes, Jenkins (CI/CD), Git, GitHub, GitLab, Jira
- **Testing & Analytics:** Unit Testing, Integration Testing, pytest, Pandas, NumPy
- **Methodologies:** Agile, Scrum, SDLC
- **Operating Systems:** Windows, Linux, macOS

EXPERIENCE

Blackrock

Jul 2024 – Present

Software Developer

- Develop and maintain microservices-based web applications using Python (FastAPI/Django) and React.js to handle high-volume data transactions.
- Designed RESTful APIs and API integrations supporting over 1 million daily requests, improving response time by 25%.
- Implement containerized deployments with Docker and Kubernetes, streamlining releases and improving scalability.
- Deployed and monitored production workloads on AWS (EC2, Lambda, S3) and GCP, achieving 99.9% uptime and reducing deployment failures by 30%.
- Collaborate in Agile sprints, perform code reviews, and lead feature development to shorten delivery cycles by 20%.
- Implement unit and integration testing with pytest to ensure reliability and maintain 90%+ code coverage.
- Optimized PostgreSQL queries and indexing strategies, reducing latency by 30% and improving data throughput.

Brightech Software

Aug 2019 – Dec 2022

Software Developer

- Built and maintained web applications and RESTful APIs using Flask and Node.js, enabling scalable data handling across distributed systems.
- Developed microservices and API integrations to streamline data flow between internal tools and third-party services.
- Enhanced front-end experience using HTML5, CSS3, jQuery, and JavaScript, improving page performance and UX consistency.
- Automated backend processes with Python scripts and SQL triggers, cutting manual data work by 25%.
- Implemented JWT-based authentication, ensuring secure communication between microservices.
- Deployed services to AWS Cloud (EC2, RDS) using CI/CD pipelines with Jenkins, improving release speed and reliability.
- Partnered with QA teams for unit, integration, and regression testing, resolving defects pre-release and improving code stability.

EDUCATION

- Masters in Computer Science, Pace University, New York, USA
