

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience in full-stack development, mobile applications, and database management. Proven proficiency in a wide array of back-end and front-end technologies, including Java, Spring Boot, React, MariaDB, Node.js, Angular, and MongoDB, with a strong focus on creating scalable solutions and optimizing application performance. Committed to leveraging these skills in a dynamic team to drive project success and achieve impactful results.

SKILLS

Databases: MySQL, MariaDB
Oracle, MongoDB

Programming Languages: Java,
Kotlin, JavaScript, Node.js,
TypeScript, Python, HTML, CSS

APIs: RESTful API, JDBC API

Frameworks/Technologies: Spring,
Spring Boot, React, Angular,
Express, Bootstrap, JSP (Java
Server Pages), Maven, Gradle

Unit Testing: Mockito, JUnit

Design Patterns: Microservices,
MVC (Model-View-Controller),
MVVM (Model- View-ViewModel)

IDEs: IntelliJ, Eclipse, Visual
Studio Code, Android Studio

Other Tools: Word, Excel, Access,
PowerPoint, Outlook, Teams,
Google Cloud Platform, Azure,
Amazon Web Services, Tableau,
JIRA, Confluence, Figma,
Postman, Charles Proxy,
SourceTree, GitHub

EMPLOYMENT HISTORY

NOV 2021 – FEB 2024

Software Engineer, Tata Consultancy Services

- Designed and implemented microservices-based web applications using Spring Boot for backend and React for dynamic front-end UI.
- Integrated Hibernate ORM for efficient database management and MariaDB for relational data storage.
- Secured the backend with JSON Web Tokens (JWT) using Spring Security, resulting in a responsive, scalable, and secure system with optimized data handling.
- Participated in code reviews to ensure compliance with coding standards and task requirements.
- Used Eclipse as the main development environment and GitHub version control system to manage and track code changes.
- Collaborated with cross-functional teams, including Scrum Masters, Product Owners, and UI/UX designers, to gather requirements using Figma and translate them into technical specifications.
- Used Jira to manage backlog items and Confluence for documentation.
- Conducted thorough testing to identify and debug issues, guaranteeing improved performance for the application.
- Created applications from scratch using MongoDB, Express.js, Angular, and Node.js.
- Developed responsive and visually appealing user interfaces for an application serving over 30 million customers and representing more than 2,000 stores for a major North American supermarket chain, utilizing Kotlin and the MVVM architecture.

FEB 2016 – AUG 2021

Customer Service, Wyndham Hotels and Resorts

- Managed the booking process through telephone, email, and in person, ensuring exceptional customer service.
- Contacted the maintenance department to address reported issues promptly.
- Computed bills, processed payments, and balanced cash at the end of each shift.

EDUCATION

AUG 2016 – AUG 2021

Bachelor of Science in Computer Science, Indiana University Southeast,
New Albany, IN

Minor in Mathematics

KEY SKILLS

- Written Communication • Business Communication • Teamwork • Creativity • Design • Patience • Flexibility • Persistence
- Leadership • Analytics • Critical-thinking • Problem-solving • Cloud Computing • Data Visualization • CI/CD • Agile Development
