

Nadir Zane

Senior Full Stack Software Engineer

Virginia, USA | nadirzane3@gmail.com | (571) 609-6195

SUMMARY

Full-stack engineer with 7 years of experience delivering high-impact web applications using Python and JavaScript ecosystems. Proven expertise in designing, developing, and deploying robust and scalable applications with Django, Flask, React, and AWS cloud services. Adept at optimizing application performance, ensuring code quality, and leading Agile teams to deliver successful projects on time and within budget. Passionate about clean code, best practices, and continuous learning.

SKILLS

Python | JavaScript | TypeScript | Kotlin | Elixir | VueJS | Django | Flask | Next.js | React.js | Angular | Vue.js | FastAPI | GraphQL | Pytest | RSpec | Jest | Selenium | TestCafe | Cypress | Hibernate | MongoDB | DynamoDB | Redis | NoSQL | SQL | Docker | Kubernetes | Jenkins | Git | GitHub | GitLab Bitbucket | Terraform | AWS | Heroku | Digital Ocean | Azure Container | Services (ACS) | Apache | RabbitMQ | Kafka | Maven | Gradle | Elasticsearch EC2 Terraform | Agile | Scrum | Debugging | Kanban | TDD CI/CD | API Integration | RESTful | ETL Microservices | Postman | Swagger | PyCharm | Workbench | Visual Studio Code | IntelliJ | Eclipse |

WORK EXPERIENCE

SoftwareLabs

2024 – present

Senior Software Engineer – Lead

- Led a team of 10 developers to build and maintain web applications using Python and JavaScript, optimizing architecture and performance to achieve a 30% boost in query efficiency while ensuring scalability and seamless user experiences.
- Improved application performance by 40% and reduced bugs by 25% through efficient Python-based back-end development and best practices.
- Enhanced database performance and query efficiency by 35% using PostgreSQL and MongoDB, improving overall system scalability and responsiveness.
- Improved scalability by 40% through AWS, DevOps best practices, serverless architectures, and comprehensive testing, optimizing cloud infrastructure, deployment processes, and system reliability.
- Developed and launched 15+ applications using Python frameworks (e.g., Django, Flask) for back-ends and JavaScript frameworks (e.g., React, Angular) for front-ends, boosting user engagement by 20% and reducing page load times by 30%.
- Optimized CI/CD workflows with Docker, Kubernetes, and Jenkins, reducing deployment times by 50%.
- Utilized Agile methodologies to manage and prioritize tasks, increasing team efficiency by 40% and enhancing client satisfaction through rapid feature delivery.

NexHealth

2021 – 2024

Senior Full Stack Engineer

- Led a team in developing REST APIs with Python, Django and Flask, optimizing full-stack development and enhancing system performance by 25%, while improving data transfer efficiency and reducing deployment errors by 30%.
- Facilitated scalable applications with React.js and Python-based back-end services, driving a 20% improvement in development efficiency.
- Enhancing system performance by 45%, cutting deployment errors by 20%, and ensuring quality through comprehensive testing practices.
- Utilized PostgreSQL and MongoDB for efficient data storage and retrieval within the applications.
- Leveraged AWS cloud services and testing practices to enhance system performance by 45% and cut deployment errors by 20%.

- Developed user interfaces for multiple applications using JavaScript, HTML, and CSS, ensuring high performance and responsiveness.
- Utilized React.js framework to build dynamic and interactive front-end components and Python Flask for back-end development, resulting in a 30% reduction in bugs and a 40% boost in application performance.
- Interacted with PostgreSQL and NoSQL databases to manage and display data efficiently within the applications.
- Integrated AWS cloud services and DevOps tools like Docker and Kubernetes to optimize deployments and ensure seamless scaling of front-end infrastructure.

PROJECTS

Asset Tracking System

- A solution that monitors the location and status of assets such as containers, shipments, equipment, and other assets wherever they are.

Trakstar

- Trakstar's performance management system makes assessments, SMART goal setting, & talent management easier and more effective.

Concert Finance

- Concert Finance automates financial reporting for sales commissions and helps Sales Managers see performance of sales people and assign them targets and see real-time progress and commissions.

EDUCATION

Franklin University
Bachelor's in Computer Science

2014 - 2018
