Herndon, VA | +1 (316) 889-4338 | addapananditha0814@gmail.com

PROFESSIONAL SUMMARY

- Data Analyst with 5 years of experience in SQL, Python, Excel, Power BI, Tableau, reporting, dashboards, and business data analysis.
- Strong experience writing SQL queries, validating datasets, preparing recurring reports, and converting business requests into accurate analytical outputs.
- Skilled in building Power BI and Tableau dashboards that track KPIs, operational trends, performance metrics, and business process outcomes.
- Experienced in data cleaning, data profiling, data reconciliation, and data quality checks across structured datasets from multiple business sources.
- Hands-on with Python, Pandas, Excel, SQL Server, Snowflake, and Power Query for ad-hoc analysis, automation, and reporting support.
- Strong background in requirements gathering, stakeholder communication, KPI documentation, report logic validation, and business-facing analytics delivery.
- Experienced in supporting UAT, report testing, defect review, and data validation activities for dashboards, reports, and reporting workflows.
- Adept at preparing executive-ready summaries, trend analysis, root-cause findings, and clear data stories for business and technical audiences.
- Proven ability to manage multiple reporting priorities, coordinate with cross-functional teams, and deliver accurate outputs within fast-paced environments.
- Open to Data Analyst, BI Analyst, Reporting Analyst, SQL Analyst, and Business Analyst roles across hybrid, onsite, and relocation opportunities.

TECHNICAL SKILLS

Data Analysis: SQL Queries, Data Cleaning, Data Validation, Data Profiling, Data Reconciliation, Ad-hoc Analysis, Trend Analysis, Root-Cause Analysis

BI & Reporting Tools: Power BI, Tableau, DAX, Power Query, Excel Pivot Tables, Excel Charts, SSRS, Dashboard Development, KPI Reporting

Databases & Platforms: SQL Server, Snowflake, BigQuery, Google Cloud Platform, SSAS Tabular Models, Relational Databases

Programming & Automation: Python, Pandas, Automation Scripting, Report Automation, API-Based Data Extraction, Scheduled Refresh Workflows

ETL & Data Preparation: SSIS, Azure Data Factory, dbt, ELT Workflows, Data Transformation, Incremental Loads, Data Pipeline Validation

Business Analysis: Requirements Gathering, UAT Support, Report Testing, KPI Documentation, Stakeholder Management, Process Documentation

Delivery & Governance: SharePoint, Word, Run Books, Data Quality Monitoring, Peer Reviews, Documentation, Agile Reporting Support

PROFESSIONAL EXPERIENCE

Client: American Express

JAN 2024 – Present

Role: Data Analyst

- Gathered reporting requirements from stakeholders and documented KPI definitions using Word and SharePoint, improving dashboard delivery alignment by 28%.
- Wrote advanced SQL queries to extract, join, and validate business datasets for recurring reports, reducing reporting errors by 18%.
- Built Power BI dashboards using DAX, Power Query, and SQL datasets to monitor trends, increasing self-service reporting adoption by 34%.
- Developed Tableau dashboards with validated SQL extracts to present operational trends, improving leadership review speed and decision clarity by 19%.
- Cleaned and profiled multi-source data using Snowflake SQL and Excel checks to identify duplicates, gaps, and inconsistent reporting values.
- Automated recurring report validation workflows using Python and Azure Data Factory, reducing manual

preparation effort by 20%.

- Supported UAT and report testing by comparing dashboard outputs against source SQL data, improving defect identification before release.
- Created run books and SharePoint documentation for dashboard usage, refresh steps, and reporting logic to improve support readiness.

Client: HCL Technologies Limited

SEP 2022 – JUL 2023

Role: Graduate Engineer Trainee

- Captured business requirements and documented reporting workflows using Word and SharePoint, improving completeness of report specifications by 24%.
- Developed SQL Server queries to validate source data, reconcile report outputs, and support recurring business reporting requests.
- Created Power BI reports using DAX measures and tabular modeling concepts to deliver consistent KPIs, reducing reporting rework by 18%.
- Transformed and standardized datasets using Power Query and SQL profiling checks, reducing manual data preparation time by 22%.
- Maintained Snowflake reporting tables using dbt transformations and SQL validation to improve consistency across business-facing outputs by 16%.
- Supported SSIS refresh routines and reconciliation checks to stabilize scheduled reporting loads, reducing recurring load failures by 17%.
- Performed ad-hoc analysis using Excel pivots and SQL queries to answer stakeholder questions, improving insight turnaround by 19%.
- Assisted UAT and peer reviews for Power BI, SQL, and report logic changes to improve dashboard accuracy and maintainability.

Client: CitiusTech

JUL 2020 – AUG 2022

Role: Data Analyst

- Delivered KPI dashboards in Tableau and Power BI using SQL Server datasets to monitor operational performance, improving stakeholder visibility by 29%.
- Used SQL and Python Pandas to clean, analyze, and validate datasets for ad-hoc reporting and business trend analysis.
- Built reporting datasets in BigQuery and GCP using SQL transformations to improve query performance and reporting efficiency by 20%.
- Implemented data quality checks using SQL, Excel, and reconciliation controls, reducing recurring data issues by 16%.
- Standardized metric logic through dbt models and documented business rules to reduce conflicting interpretations across recurring reports.
- Supported Azure Data Factory pipeline validation and refresh monitoring to improve reporting consistency by 17%.
- Prepared recurring extracts, SSRS-style reports, and Excel summaries to support stakeholder reporting, reducing manual handoffs by 15%.
- Maintained SharePoint documentation, run books, and report logic notes to improve traceability, continuity, and business user support.

EDUCATION

Wichita State University

Master of Science in Business Analytics

May 2025

CGPA: 3.97/4.0
