

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience delivering end-to-end analytics solutions in enterprise and banking environments using Python, SQL, Snowflake, and AWS (Glue, S3, Redshift, Athena). Proven expertise in automated ETL development, data warehousing, and workflow optimization, along with building interactive BI dashboards in Power BI and Tableau to support executive and operational decision-making. Experienced in cloud-based data platforms and Agile environments, with a strong focus on data quality, performance optimization, and actionable, stakeholder-driven insights.

TECHNICAL SKILLS

Programming & Scripting:	Python (pandas, NumPy, matplotlib), R, SQL, Unix/Linux, Shell Scripting
Database & Warehouse:	SQL Server, Oracle, MySQL, Snowflake
ETL & Data Integration Tools:	Informatica PowerCenter, Informatica IICS, SSIS
Cloud Platforms (AWS):	Athena, Redshift, S3, EC2, Glue, IAM, Lambda, Amazon Quick Sight, CloudWatch, AWS Batch.
Data Visualization & Reporting:	Power BI, Tableau, Excel
Data Modeling & Orchestration:	Dimensional Modeling, Star Schema, Snowflake Schema, Apache Airflow, AutoSys
Analytics & Statistical Modeling:	Exploratory Data Analysis (EDA), Predictive Analytics, Statistical Modeling, Data Storytelling
Development Methodologies:	Agile, Scrum, Waterfall
Tools & Utilities:	Git, JIRA, ServiceNow, MS Access, REST APIs, JSON, CI/CD Pipelines
Governance & Compliance:	Data Lineage, Data Validation, GDPR Compliance

WORK EXPERIENCE

Data Analyst | client: Truist Bank, North Carolina, USA

Aug 2024- Present

- Architected and automated end-to-end ETL pipelines by integrating data from S3, Athena, and Redshift into Snowflake using AWS Glue and Python, resulting in a 30% improvement in processing efficiency and 25% better data availability.
- Optimized high-performance SQL queries and Snowflake workflows, reducing report generation latency by 30% for critical banking datasets.
- Developed executive-level Power BI dashboards to visualize key performance indicators (KPIs), enhancing operational decision-making efficiency by 15%.
- Collaborated with business stakeholders to engineer a unified reporting layer, successfully reducing metric duplication by 20% and ensuring a "single source of truth."
- Executed ad-hoc advanced analytics and forecasting to provide leadership with data-driven insights for strategic planning and resource allocation.

Data Analyst | client: Perficient Hyderabad, India

May 2021 - June 2023

- Designed and maintained Informatica IICS ETL pipelines to ingest and transform data into Snowflake, improving pipeline performance and data availability by 25%.
- Automated ingestion of structured and semi-structured data from AWS S3 to Snowflake using Python and AWS

Lambda, reducing manual effort by 40%.

- Developed and optimized complex SQL queries for recurring and ad-hoc reporting, reducing report turnaround time by 30%.
- Built predictive and statistical models using Python and R to forecast business metrics such as sales trends and customer behavior, improving forecast accuracy by 15%.
- Performed exploratory data analysis (EDA) on large datasets in Snowflake and S3 to identify trends, anomalies, and data quality issues supporting strategic planning.
- Created interactive dashboards and analytical reports to translate complex data into actionable insights for business stakeholders.
- Collaborated in Agile/Scrum environments, using Git and JIRA to deliver analytics solutions on schedule with continuous stakeholder feedback.
- Contributed to an internal Python utility library for Snowflake integration, improving data extraction and transformation efficiency across the team.

EDUCATION

Master of Science in Computing and information system | 2023-2025

Youngstown State University, Ohio

Bachelor of Engineering in Computer Science | 2018-2022

Vignan University, Vadlamudi, India
