

NEHA SAINDANE

Data Analyst

MD|301-660-6895| nehasaindane20@gmail.com| [LinkedIn](#)

SUMMARY:

Data Analyst with 2+ years of experience delivering scalable analytics, business intelligence, and cloud-based data solutions across insurance, enterprise technology, and consulting environments. Expertise in SQL, Python, Power BI, Tableau, Snowflake, Amazon Redshift, AWS, and Generative AI, with strong capabilities in data modeling, ETL, predictive analytics, dashboard automation, and KPI reporting. Proven track record of optimizing data pipelines, improving reporting accuracy and operational efficiency, and transforming complex datasets into actionable insights that enable data-driven business decisions.

SKILLS:

Data Analysis & Analytics: Data Analysis, Exploratory Data Analysis (EDA), Statistical Analysis, Data Cleaning, Data Validation, Data Profiling, Data Interpretation, Business Analytics, KPI Reporting, Root Cause Analysis

Programming & Querying: Python, SQL, Pandas, NumPy, PySpark, R, Advanced SQL Queries, Data Manipulation, Data Wrangling

Data Visualization & BI: Power BI, Tableau, Interactive Dashboards, Data Storytelling, Executive Reporting, Self-Service Analytics, Dashboard Automation, Performance Metrics Reporting

Databases & Data Warehousing: Snowflake, Amazon Redshift, SQL Server, Relational Databases, Data Modeling

Cloud & Big Data Technologies: AWS, Azure, Databricks, Cloud Data Platforms, Distributed Data Processing

Machine Learning & Advanced Analytics: Predictive Analytics, Forecasting Models, Feature Engineering, Model Evaluation, Time Series Analysis, Anomaly Detection, Customer Segmentation

Generative AI & Emerging Technologies: Generative AI, Large Language Models (LLMs), Prompt Engineering, AI-Powered Analytics, Conversational Analytics, Agentic AI Applications

Tools & Platforms: Git, GitHub, Streamlit, Jupyter Notebook, Microsoft Excel, CI/CD, REST APIs, Version Control Systems

EDUCATION:

M.S. Information Systems (Data Science)

University of Maryland, Baltimore County

Dec 2025

GPA: 3.6 / 4.0

B.Tech. Computer Engineering

Dr. Babasaheb Ambedkar Technological University, Maharashtra

Jul 2022

GPA: 3.5 / 4.0

EXPERIENCE:

AllState, MD | Data Analyst Intern

Jul 2025 – Dec 2025

- Engineered scalable Power BI dashboards integrated with Snowflake and SQL datasets, enabling executive KPI reporting that improved operational visibility by 32%.
- Optimized complex SQL queries and data transformation workflows across Amazon Redshift and SQL Server, decreasing report execution time by 45% while improving data retrieval efficiency for enterprise analytics.
- Automated Python-based data validation and profiling pipelines using Pandas and NumPy, increasing data accuracy by 31% and reducing quality-related reporting issues by 37%.
- Integrated Generative AI-powered analytics with Prompt Engineering and Large Language Models (LLMs) to accelerate business insight generation, reducing ad-hoc analysis turnaround time by 23%.

Wipro Ltd., India | Project Engineer

Mar 2023 – Dec 2023

- Analyzed large-scale business datasets using SQL, Python, Pandas, and Power BI, uncovering operational trends that improved reporting accuracy by approximately 30% and supported data-driven decision-making.
- Developed interactive Power BI and Tableau dashboards to monitor KPIs, automate executive reporting, and reduce manual reporting effort by nearly 40% across multiple business functions.
- Optimized SQL queries, data transformations, and validation workflows within Snowflake, decreasing report generation time by approximately 35% while improving overall data reliability.
- Automated recurring data preparation and cleansing activities using Python, Pandas, and Excel, saving approximately 12 hours of manual effort per week while improving dataset quality.

Infinite Infolab, India | Data Analyst

Jan 2022 – Feb 2023

- Performed exploratory data analysis and statistical assessments on structured datasets, identifying business trends that increased reporting accuracy by approximately 20% and supported strategic planning.
- Designed SQL-based reporting solutions and reusable datasets that shortened analytical turnaround time by nearly 30% while improving consistency across recurring business reports.
- Validated enterprise data through profiling, cleansing, and quality checks, reducing data discrepancies by approximately 25% and strengthening confidence in business intelligence outputs.
- Created interactive dashboards in Tableau, enabling business teams to monitor performance metrics in real time and reducing manual report preparation by roughly 35%.
- Implemented Python and Pandas scripts for data wrangling and transformation, improving processing efficiency by approximately 40% for large operational datasets.
- Documented data definitions, reporting logic, and analytical workflows while maintaining Git-based version control, improving collaboration efficiency, and reducing reporting inconsistencies across project teams.

CERTIFICATIONS:

Google Data Analytics Professional Certificate (Coursera) – Completed

AWS Certified Cloud Practitioner – Completed

Microsoft Power BI Data Analyst – In Progress
