

## EDUCATION

---

### Cal Poly Pomona

California, USA

*Master of Science* in **Business Analytics**

Expected May 2025

**GPA:** 4.0

### HCMC University of Technology - Vietnam National University

Vietnam

*Bachelor of Arts* in **Industrial Management**

Aug 2017 – Nov 2021

**Relevant Courses:** Programming for BA; Statistics Essentials for BA; Data Mining, Data Management; Social Media Analytics and Text Mining; Optimization Methods for BA.

## EXPERIENCES

---

### TRUMPF

June 2024 – December 2024

*Business Development Intern*

- Utilized Excel and Power BI (DAX and Power Query) to develop and automate comprehensive reports, including KPI, sales performance, competitor analysis, conversion rate analysis, and market analysis. Collaborated with the sales team to manage KPIs and deliver insights to the sales manager, supporting strategic decision-making.
- Leverage SQL for advanced data queries and perform ad hoc reporting to meet specific analytical needs.
- Enhanced SAP data accuracy, reporting automation, and data entry processes to ensure reliable insights and improve operational efficiency.
- Developed automated ArcGIS maps in Power BI to visualize customer locations, facilitating targeted lead generation and significantly boosting sales team productivity.

### DataInsider

Feb 2022 - May 2023

*Market Research Analyst for Sales and Marketing*

- Conducted comprehensive data gathering, cleaning, and analysis from diverse sources, including marketing, inventory, CRM systems, and e-commerce platforms, employing API automation for efficient data integration.
- Developed inventory reports using Excel and BI tools, resulting in a 70% reduction in weekly tracking time while ensuring data accuracy.
- Generated detailed reports and dashboards to track sales performance, providing insights into product characteristics and customer behavior, which contributed to a 15-20% increase in sales for each collection. Reports included revenue performance and market trend analyses.

### Remaps JSC

Sep 2020 – Jan 2022

*Marketing Analyst*

- Analyzed real estate data using Looker Studio and PowerBI to create informative reports, aiding brokers with insights on high-demand land areas and pricing trends, leading to user registrations surging from 5,000 to 117,000.
- Monitored and analyzed Google Analytics data to enhance targeted ad campaigns, contributing to a traffic increase from 47,000 to 3.5 million views in a year.
- Collaborated with IT, Marketing, and Enrollment teams to provide actionable insights that informed campaign strategies, sales initiatives, and customer success efforts. Developed reports tracking marketing effectiveness and customer engagement.

## PROJECTS

---

**Hotel Booking:** Conducted data cleaning and analysis on 100,000 sales records using Python to identify factors leading to high cancellation rates, used Matplotlib and Seaborn for visualization, and guided strategy optimization to reduce cancellations and enhance hotel room utilization, increasing revenue.

**Financial Sentiment Analysis:** Analyzed financial news headlines from Bloomberg to evaluate sentiment impact on technology sector trends and stock price movements, leveraging advanced NLP techniques for actionable insights.
