Hello,

With 4 years of experience in quality assurance in Agile environments, I have a strong foundation in software testing applying my detail-oriented nature to balance both manual and automated testing. I am skilled in troubleshooting complex issues, taking time to build necessary subject matter expertise, and I am effective in either an independent or a collaborative work environment. I am proficient with test types including end-to-end, regression, and user acceptance testing and prefer acceptance test-driven development.

I specialize in minimizing a team's time spent on manual regression testing without sacrificing quality by spearheading an automation-first approach to testing. This has resulted in faster issue identification, improved testing efficiency, and a significant reduction in defects reaching production. Early and frequent collaboration with developers using shift-left principles serves to parallelize development and testing, thus ensuring QA personnel are fully utilized, bolstering feedback loops between testing and development.

In addition to my technical expertise, I take pride in mentoring and supporting colleagues towards becoming more proficient in test automation, which helps the organization as whole achieve the transition towards an automation-first QA process. My approach to quality assurance is deeply collaborative, and I believe that coaching teams to build testing into the development process ultimately leads to more reliable software products.

I look forward to the opportunity to bring my considerable experience, energy, dedication, and passion for learning to your organization. I welcome the opportunity to further discuss how my experience and skills align with your team's needs. Thank you for considering my application.

Warmest Regards,

Nicolas Larralde

Resume

Skills

- **Test Automation:** Playwright, page object model, Selenium
- **Test Reporting:** TestRail
- **Bug Reporting:** Jira
- **Languages:** Javascript/Typescript, bash, Perl
- **IDEs:** vim, VSCode
- **CI/CD:** GitHub, GitLab, Jenkins
- **Other:** git-scm, Linux server administration, browser dev tools, Mac OSX

Experience

SOFTWARE DEVELOPER IN TEST I, WebPros/cPanel LLC (Houston, TX)

08/2021 - Present

- Work as part of a Scrum team to plan work within team's product domain
- Launch and configure self-managed virtual machines for testing product changes
- Design, and maintain automated tests for high business value projects
- Build and foster an automation-first approach to software testing
- Employ git workflow to develop automated tests in parallel with other team SDETs

- Serve as mentor/tutor to help other SDETs become more proficient at test automation
- Document bugs in Jira with explicit reproduction steps and troubleshooting methods employed
- Collaborate with outside devs/SDETs to better define testing procedures and coverage when necessary
- Reference company's internal documentation as well as public documentation to determine the intended functionality of a given product component

SOFTWARE QA TESTER, Transparent Language Inc (Nashua, NH)

01/2021 - 06/2021

- Acceptance Tested web app and mobile app from an end-user perspective
- Participated in regular release engineering testing events
- Used multiple browsers (Chrome, Firefox, Edge, Safari) as well as Android and iOS devices,
- Tested specifically for Javascript, JSON, CORS errors using the browser developer console
- Performed exploratory testing at regular intervals per management's direction

NETWORK SUPPORT TECHNICIAN, Single Digits, Inc (Bedford, NH)

10/2019 - 04/2020

- Supported Network Engineers managing the installation of networks in new-construction sites
- Used proprietary network management platform to manage remote switches and access points
- Prepared documentation around production networks for customer support
- Collaborated with multiple teams including Network Engineers and more senior Support Technicians
- Managed Cisco, ICX/Brocade, and HP switches, as well as Cisco, Ruckus, and HP access points
- Cross-trained between my department and support, troubleshooting minor issues

HELP DESK TECHNICIAN, Boston Architectural College, (Boston, MA)

08/2019 - 12/2019

- Resolved Help Desk tickets submitted through company issue tracking system per SLA requirements
- Manned ad hoc help desk service station available to students and college faculty
- Assisted management by performing regularly scheduled updates of the various software applications
- Performed scheduled OS updates and installs
