

NICOLE HAZEN

BUSINESS ANALYST

PROFILE

Detail-oriented Business Analyst with over 25 years in quality assurance, now leveraging deep QA experience to deliver strategic, user-focused business solutions. Adept at gathering and refining business requirements, leading agile ceremonies, and translating stakeholder needs into well-structured user stories and functional specifications. Skilled in process improvement, stakeholder communication, and cross-functional collaboration.

WORK EXPERIENCE

DATATECH GLOBAL LTD. - Charlotte, NC

• Senior QA Engineer / UI Developer

2006 - 2025

- **Requirements Gathering & Functional Specifications:** Analyzed business processes and collaborated with cross-functional teams to define software feature requirements.
- **User Stories, Epics & Jira:** Created comprehensive user stories, epics, and acceptance criteria in Jira to support agile development and ensure clarity for dev teams.
- **Agile Frameworks & Sprint Activities:** Participated in sprint planning, backlog grooming, and daily stand-ups, ensuring alignment between technical deliverables and business goals.
- **User Acceptance Testing (UAT):** Facilitated UAT by translating business needs into test scenarios, validating that solutions met technical and user expectations.
- **Process Redesign & Continuous Improvement:** Identified bottlenecks in business workflows and collaborated with stakeholders to streamline system design and delivery.

• QA Manager

2011 - 2013

- **Stakeholder Collaboration & Requirements Documentation:** Led team-wide initiatives to gather business requirements and align development with business goals.
- **Process Mapping & System Evaluation:** Conducted reviews of system design and user workflows to identify inefficiencies and recommend improvements.
- **SharePoint & Knowledge Management:** Maintained up-to-date SharePoint repositories with project documentation and business process artifacts.
- **Scope Management & Strategic Planning:** Partnered with software architects and project managers to evaluate scope and streamline product delivery timelines.

EDUCATION

2004 - 2006

UNIVERSITY OF PHOENIX

- B.A.Sc. in Information Technology

SKILLS

- Manual Testing
- Regression Testing
- End-to-End Testing
- Test Plan Development
- Leadership
- Requirements Analysis
- UAT Support
- API Testing (Postman, REST Assured)
- Test Automation (Selenium)
- SQL Data Validation
- Jenkins
- Git
- Node.js
- JIRA
- Confluence
- HTML/CSS/JS
- Cross-Platform Testing
- Agile/Scrum
- Functional Specification

STRENGTHS

- Love breaking things on purpose so users don't by accident
- Big on clarity—whether it's test steps, bug reports, or release notes
- Always curious: from automation tools to how AI can improve QA
- Not afraid to raise the red flag when something's off
- Experienced in fast-moving teams, but always make time to document what matters

Amdocs - Charlotte, NC

QA Engineer/Requirements Analyst

2002 - 2006

- **Business Rules & System Workflows:** Developed and documented workflows and logic for enterprise billing systems to support user and compliance needs.
- **Functional Documentation & Developer Support:** Created clear functional documentation and provided scope clarification during development cycles.
- **Traceability & Test Case Development:** Ensured full traceability from business needs to test case execution and final implementation validation.
- **Retrospectives & Process Redesign:** Participated in Agile retrospectives and contributed to initiatives that improved output quality and process efficiency.

Technical Writer

2000 - 2002

- **Version-controlled documentation for quality:** Built XML/HTML templates to standardize client-facing documentation, reducing support tickets by improving clarity.
- **Cross-functional communication & training support:** Collaborated with implementation teams to create step-by-step guides and onboarding resources.

DESCRIPTIONS OF COMPANIES

DATATECH GLOBAL LTD. - Charlotte, NC

They specialize in streaming media and web development solutions for businesses of various sizes. Early on, they launched a video-on-demand platform offering over 100,000 titles and serving millions of users—building a pay-per-minute streaming model that became a recognized content delivery standard. Today, DataTech Global provides:

- Live and on-demand streaming services, optimized for multi-device delivery and detailed analytics
- Custom website design and development, including responsive builds and ongoing support
- E-commerce integration and SEO services to help clients enhance online presence and grow revenue

In short, they empower businesses with powerful digital and media platforms—everything from streaming infrastructure, audience analytics, and backend integration to SEO and web maintenance.

Amdocs - Charlotte, NC

Amdocs is a global leader in software and services for communications and media companies, providing solutions for billing, customer experience, digital transformation, and network automation. They help major telecoms and service providers streamline operations, launch new offerings, and transition to cloud-native, AI-powered systems—enabling faster, smarter, and more scalable digital experiences.
