EDUCATION

University of Wisconsin-Madison | Madison, WI

May 2026

Bachelor of Science in Data Science, Information Science, and Psychology

- Data Visualization, Data Science Modeling II, Artificial Intelligence, Data Ethics and Policy, Interaction Design Studio, Human Factors Engineering, Research Methods, Social Psychology, Cultural Psychology, Cognitive Psychology

Skills: Python, R, SQL, HTML, Tableau, CSS, Alteryx, Google Suite, Microsoft Office (Excel, PowerPoint), Figma, Canva, Qualtrics

PROJECTS

Income Disparity Analysis and Visualization

- Conducted quantitative analysis of 10 years of U.S. Census data to evaluate income disparities across demographics.
- Developed regression models ($R^2 > 0.85$), validated with ANOVA and t-tests to quantify factor impacts on income disparities, and communicated key insights through data visualizations and summaries for non-technical stakeholders.

Targeted email prediction model

- Developed a predictive machine learning model using scikit-learn to identify high-value users for targeted email campaigns, achieving 81% model accuracy.
- Engineered key features from user behavior and browsing data to enhance prediction and optimize campaign targeting.

Tether App Prototype- UI/UX Design Project

- Designed high-fidelity prototypes in Figma, analyzing user feedback through iterative testing to refine usability and flow.

EXPERIENCE

Agati Serve

June 2025- August 2025

Data Science Intern

- Designed a communication analytics system that processes interview videos by extracting and normalizing verbal and non-verbal features for consistent performance benchmarking.
- Created proof-of-concept workflows to test new data approaches and research methods, evaluated their viability, and presented recommendations to team leads on adoption and long-term integration.

University of Wisconsin-Madison

February 2025- Present

Library IT Helpdesk Technician

- Resolved technical issues using a ticketing system, providing timely troubleshooting across public workstations and library systems to ensure uninterrupted user access.
- Managed circulation of 450+ IT devices, maintaining accurate checkout records to improve operational efficiency.

Schloss Visual Reasoning Lab

January 2025- Present

Undergraduate Research Assistant

- Administered computer-based experiments to measure how visual and tactile cues influence cognitive processing, ensuring standardized data collection across participants.
- Structured and analyzed 500+ participant trial datasets in R to create statistical summaries and visualizations for lab reports.

UW Neuroscience Training Program

August 2024- Nov 2024

Office Assistant

- Cleaned and verified Qualtrics survey data to deliver accurate insights for program evaluation and decision-making.
- Supported event logistics and communications for the annual symposium, enhancing engagement and attendee satisfaction by 23% through strategic coordination.

Orison Hospital

May 2024- July 2024

Behavioral Data Analyst Intern

- Standardized patient datasets in Excel and used R for predictive modeling to assess behavioral health risk factors.
- Created Tableau dashboards visualizing patient progress and outcomes, delivering insights that improved care planning.

Curenetic

May 2020- Nov 2023

Head of Graphic Design

- Analyzed engagement metrics to design content strategies, increasing audience engagement by 40% in six months.
- Developed standardized workflows that doubled posting frequency, aligning design output with strategic marketing goals.

ACTIVITIES & AWARDS

- Dean's List (Fall 2022, Fall 2024, Spring 2025)
- Member, Women in Scientific Education and Research (WISER)
