

Nitya Ingale Full Stack Developer

Nitya12@workwebmail.com | (945) 246-0646 | USA | [LinkedIn](#)

Summary

Results-driven Full Stack Developer with 5+ years of experience in designing, developing, and deploying scalable web applications. Proficient in frontend and backend technologies, including React.js, Node.js, and C#, with expertise in database management using MongoDB, PostgreSQL, and AWS services. Adept at crafting secure, user-centric solutions, optimizing performance, and automating workflows. Skilled in cloud deployments and CI/CD pipelines. Strong collaborator with cross-functional teams, focused on delivering robust and innovative applications that enhance user experience and business efficiency.

Technical Skills

- **Frontend Development:** React.js (with TypeScript), AngularJS, HTML5, CSS3, Redux Toolkit, WebSocket Integration, Responsive UI Design, MVC Master Page Layouts, Dynamic UI Components
- **Backend Development:** Node.js with Express, C#, RESTful APIs, WebSocket (Socket.IO) for real-time communication, API Development & Performance Optimization (40% reduced API response time)
- **Database Management:** MongoDB (Structured Data), AWS S3 (Unstructured Data), PostgreSQL, MySQL, Query Optimization & Aggregation Pipelines
- **Cloud Platforms:** AWS (EC2, Lambda, S3, CloudFront, CloudWatch), GitHub Actions for CI/CD Automation
- **Data Analytics:** Snowflake, Tableau Automation, Advanced Excel Models for Data Analysis
- **Testing:** Jest, Mocha, Cypress for Unit, Integration, E2E Testing, Selenium for Automation Testing (99% functional test accuracy)
- **Project Management & Agile:** Git, JIRA, Confluence, Agile Development Methodologies
- **Other Tools & Technologies:** SSRS (30+ Reports), XML Integration, Selenium, Decisions BPM, Appian BPM, Salesforce Admin, Google Project Management, Appian Certified Associate Developer

Professional Experience

Full Stack Developer, Lazard

06/2024 – Present | Remote, USA

- Developed a decentralized investment platform by gathering and analyzing business requirements, leveraging Node.js with Express for backend and React.js with TypeScript for frontend. Utilized a hybrid data model with MongoDB for structured data and AWS S3 for unstructured data storage, processing over 500K investment records monthly.
- Collaborated with cross-functional teams, including UI/UX designers and data engineers, to design a responsive and feature-rich frontend using React.js. Integrated real-time investment dashboards with WebSocket, reducing data latency by 30% and enhancing user experience through Redux Toolkit state management.
- Developed a scalable backend using Node.js and WebSocket (Socket.IO) for real-time transaction updates. Created robust RESTful APIs to handle high-volume trading data. Reduced API response time by 40% through optimized request handling.
- Implemented secure user authentication using JWT and RBAC. Optimized MongoDB query execution with aggregation pipelines, boosting transaction processing efficiency by 35%, and integrated AWS S3 for secure document uploads and archival.
- Leveraged AWS Lambda, S3, and CloudFront to build a scalable serverless architecture. Managed cloud storage for financial documents and user-generated data, ensuring high availability and secure data retrieval.
- Conducted thorough testing, including unit tests (Jest), integration tests (Mocha), and end-to-end tests (Cypress). Achieved 98% code coverage and resolved 90% of defects in the pre-deployment phase, ensuring platform stability.
- Deployed the platform using AWS EC2 instances and Docker containers for a scalable infrastructure. Automated CI/CD pipelines through GitHub Actions and ensured efficient monitoring with AWS CloudWatch, achieving 99.8% platform uptime.

Full Stack Developer, Inteletech Global Inc

01/2024 – 05/2024 | Remote, USA

- Designed and implemented reusable UI components like MVC master page layouts, user controls, and partial views, optimizing development time and maintaining consistent user experience across the application.
- Utilized server-side controls for dynamic application customization, integrating navigation and validation controls that enhanced user interactions and ensured seamless multi-page functionality.
- Developed scalable N-tier C# classes for database connectivity and business logic separation, improving maintainability and efficiency across application modules.
- Implemented stored procedures, views, and SQL joins to optimize data retrieval and manipulation, enhancing data processing efficiency and database performance by 25%.

Data Analytics Intern, Hire IT People

06/2023 – 01/2024 | Remote, USA

- Collaborated on innovative fintech projects using Snowflake and Tableau automation, enhancing data visualization and analysis capabilities for faster decision-making.
- Developed advanced Excel models and data analysis tools, reducing calculation time by 30% and improving data accuracy by 97%.
- Generated comprehensive reporting files support decision-making and regulatory compliance in a fast-paced fintech environment.
- Assisted in migrating on-premises applications to the cloud, improving performance, scalability, and security by using cloud solutions.

Decisions Developer, Decisions BPM India

03/2022 – 07/2022 | Hyderabad, India

- Led a no-code automation project using Decisions workflows, reducing manual efforts by 60% and efficiently managing over 230K monthly transactions with real-time reporting.
- Implemented comprehensive testing strategies, including functional and regression tests, ensuring seamless error-free processing of high transaction volumes.
- Optimized bill reconciliation processes by mapping diverse data points through Decisions workflows, reducing manual effort by 80% and enhancing operational efficiency by 50%.
- Conducted user acceptance and stress testing to validate workflow robustness, ensuring accurate reconciliation under high transaction loads and data integrity.

Full Stack Developer, KFin Technology Ltd

- Developed the KBOLT application’s front-end using AngularJS, HTML, and CSS, reducing load times by 30% and improving user experience for over 10,000 users with dynamic and responsive UI designs.
- Engineered scalable backend solutions with C# and MySQL, increasing financial transaction processing speed by 25%, streamlining database operations, and enhancing the application’s overall efficiency and maintainability.
- Enhanced SQL procedures by integrating XML with PostgreSQL, achieving a 30% reduction in data retrieval times and a 20% improvement in UI responsiveness for seamless and efficient user interactions.
- Created and maintained 30+ SSRS reports, reducing data retrieval time by 40% and ensuring report availability with a 99.8% uptime, contributing to uninterrupted business operations and decision-making processes.
- Designed 40+ UI screens adhering to company UX standards, achieving a 95% first-review approval rate and enhancing design consistency, contributing to user satisfaction and streamlined development cycles.
- Conducted comprehensive code reviews, reducing post-deployment bugs by 30% and increasing code efficiency by 40%, ensuring high-quality code delivery and robust software performance.
- Automated testing processes using Selenium for end-to-end validation, ensuring 99% accuracy in functional testing and improving application stability by identifying potential issues during early development stages.

01/2019 – 03/2022

| Hyderabad, India

Education

Master of Science, The University of Texas at Dallas (Richardson)

Information Technology and Management

Bachelor of Technology, Chaitanya Bharathi Institute of Technology

Information Technology

08/2022 – 05/2024

| Texas, USA

07/2016 – 05/2019

| Telangana, India

Projects

Vehicle Management Application Using Appian

- Spearheaded the development of a vehicle management application using Appian BPM tools and SQL, improving process efficiency by 40% for a fleet of 500+ vehicles.
- Conducted functional and load testing to ensure workflow performance under heavy usage.
- Led Agile project cycles, reducing development time by 30%, with sprint reviews and unit/integration testing at each stage.
- Implemented Appian scripting to automate fleet management and approval processes, enhancing reporting accuracy by 50%.
- Performed data validation and regression testing to ensure real-time chart generation and seamless operational performance for strategic decision-making.

Certifications

- Salesforce Admin
- Appian Certified Associate Developer
- Google Project Management Certification
- Certified Decisions Developer
