Education

University of Michigan, Ann Arbor, MI (August 2021 - May 2025), LSA

B.S. Economics, B.S. Computer Science

Cumulative GPA: 3.877/4.00

Coursework: Financial Modeling, Acc Principles, DS/Algorithms, Intro to AI, Web Systems, Practical Data Science

Skills: C++, Python (scikit learn, pandas, numpy, Flask), AWS, STATA, SQL, Javascript, DCF

Professional Experience

KeyBank Saline, Michigan

Retail Banking Intern (May - August 2024)

- Worked on proposal to increase client retention and their utilization of relationship services; built client relationships

Top Travel Israel Tel Aviv-Yafo, Israel

Marketing and Sales Intern (June - July 2023)

- Prepared and implemented digital marketing strategies for an Israeli property management company
-

Projects

Social Media Usage Recommender System(4/25)

- Built a classifier to predict productivity loss level of a user given usage and demographic data
- Built an api in Flask to run classifier binary, built a front end in React
- Simple recommender system based on survey results using queried database generated by LLM

Power Outages Classifier (11/24)

- Data cleaning, imputation strategies, univariate/bivariate analysis
- Built a machine learning model in scikit learn to classify the cause of a power outage using K-NN algorithm
- Tuned hyper params using GridSearchCV to find the optimal K, and optimal distance formula (weighted vs unweighted)

Instagram Clone (3/24)

- Built an instagram clone using server side dynamic pages
- Gained experience with Jinja and Flask for web development in Python
- Also worked with SQLITE database and sessions
- Later modified instagram clone to be dynamic on client side using Javascript and React
- REST API in Flask, also eventually hosted on AWS

Search Engine Clone (4/24)

- First, built MapReduce framework: introduction to distributed systems and networking in Python
 - Then, used a different MapReduce framework to build a search engine in three stages.
 - (I) MapReduce program to clean a set of web pages and build an inverted index from each word
 - (II) API to return search results in order of relevance given page rank and tf-idf score
 - (III) Search server to call API and render template with 10 most recent search results
-

Awards

- University Honors, William J. Branstrom Freshman Prize, James B. Angell Scholar
