CAREER OBJECTIVE

Software Developer with 2+ years of experience in code analysis, debugging, database management, and CI/CD pipeline management in Agile environments. Proficient in full-stack development using technologies like Node.js, Angular, React, and MongoDB. Skilled in troubleshooting, API testing, and delivering scalable solutions. Seeking to contribute to a dynamic software development team, leveraging my technical expertise to improve operations and user experience.

SKILLS

- C, C++, C#, Java, HTML, CSS, JavaScript, TypeScript, SQL, Python, PHP
- Visual Studio Code, Postman, Microsoft SQL Server Management Studio, AWS, Azure DevOps Server
- Angular, React, Next.js, Node.js, Express, Bootstrap, MongoDB, Drupal
- Microsoft Teams, ServiceNow, REST APIs, Agile Methodology, Unit Testing, Git

WORK EXPERIENCE

TATA CONSULTANCY SERVICES

Software Engineer, July 2022 – Present

- Debugged code to identify and resolve the root cause of issues, enhancing software reliability.
- Contributed to fixes/enhancements for software using Node.js, Angular, JavaScript, and MongoDB.
- Managed and analyzed application database collections, writing complex queries to filter specific data.
- Utilized Postman to test APIs and verify responses, ensuring the integrity of application interfaces.
- Supported project team with CI/CD pipelines using Azure DevOps Server.
- Provided technical support to application end-users, resolving software and network issues.
- Analyzed application logs to diagnose and resolve user errors.

EDUCATION

University of Florida
Gainesville, FL

B.S. Computer Science (Graduated May 2022)

- **Relevant Courses:** Data Structures and Algorithms (C++), Foundations of Computer Science (C++), Intro to Software Engineering (JavaScript/React), Info and Database Systems (SQL), Operating Systems (C/C++)

PROJECTS

Marketplace Application

<https://the-marketplace-app-9f5c15d8c4ad.herokuapp.com/>

- A full-stack marketplace application that allows users to list and browse products for sale. Features include user authentication, profile and product management, a shopping cart, and more.
- Built with MongoDB, Express, React, Node.js, and JSON Web Tokens. Hosted using Heroku.

Real-Time Chat Application

<https://github.com/PaoloFiol/chat-app>

- A real-time chat application built with WebSockets, Preact.js, and Express. Allows multiple users to join a dynamically created chatroom with invite links. Hosted using Heroku.
