SUMMARY

IT Specialist with 2 years of experience in technical support, troubleshooting, and IT infrastructure. Skilled in Windows, Active Directory, Azure DevOps, ITIL, MDM, and asset management, with knowledge of networking, cloud, and data center operations. Experienced in SQL, Azure Data Factory, PowerShell, and Python, with proficiency in Java, C++, and REST APIs.

QUALIFICATIONS

- **Programming Languages:** C++, Java, Spring Boot, REST APIs, SQL, Python, PowerShell
- **Tools and Applications:** Visual Studio, Eclipse, CLion, VS Code, Git, GitHub, Azure DevOps, CI/CD, MongoDB, Docker
- **Soft Skills:** Team Collaboration, Problem Solving, Communication, Time Management

EDUCATION

Bachelor of Science in Computer Science, *Seattle Pacific University, Seattle, WA*

Sep 2020 – Jun 2023

Associate of Science in computer science, *Cascadia College, Bothell, WA*

Dec 2016 – Jun 2018

TECHNICAL EXPERIENCE

IT Specialist – HCL America (Data Center, Rite Aid)

Jun 2024 – Jul 2025

- Provided technical support to end-users by troubleshooting Windows PC issues, printer malfunctions, network connectivity problems, and performing system re-imaging.
- Used ServiceNow to raise and manage tickets for user access requests including USB permissions, shared folders, and other corporate IT resources.
- Supported mobile device management using MobiControl, including staging and configuring Zebra devices.
- Assisted users with password resets and general account access issues.
- Performed hardware tasks such as racking and cabling servers, network switches, and firewalls in a distribution center environment
- Ensure smooth operation and performance of end-user systems through proactive support and timely issue resolution.

Field Test Engineer – Spirent Communications

Apr 2024 – Jun 2024

- Conducted testing of unlaunched phone devices from various manufacturers for optimal voice call quality, data speeds, and VoNR functionality on 5G networks.
- Developed test plans and strategies for 4G, 5G, and VoNR scenarios.
- Utilized Spirent test equipment and Nomad technology for realistic network simulations.
- Analyzed results to identify issues and collaborated on solutions.
- Provided technical support and contributed to testing methodology improvements.

Azure DevOps Engineer Internship – Quadrant Resource

Jun 2023 – Sep 2023

- Collaborated with cross-functional teams to optimize development processes.
- Implemented CI/CD pipelines using Azure DevOps for automated deployment.
- Managed infrastructure using Azure cloud platform and configuration management tools.
- Built and maintained Azure Resource Manager (ARM) templates for automated provisioning of resources.
- Assisted in monitoring and troubleshooting production systems.
- Lead the team of 6 members to build the Azure based web app.

ACADEMIC PROJECTS

Sep 2020 – Jun 2023

Data Structure & Programming

- I have implemented and built various projects in C++ that demonstrate a strong understanding of object-oriented programming concepts such as inheritance, polymorphism, and encapsulation. My work involved using STL components like the vector class, implementing linked lists and tree data structures, applying recursion, and handling file input/output. These projects strengthened my skills in data structures, algorithms, and clean code design using C++

System Design & Application Programming

- Designed the CrickHub system by outlining functional and non-functional requirements, data specifications, budget constraints, project scope, and use case diagrams. Additionally, contributed to the development of a Quote Manager application using Qt, focusing on user interface design to support features such as filtering, adding, editing, and deleting quotes, enhancing overall user interaction and usability.

CERTIFICATIONS

- MongoDB SI Associate Certificate.
- AZ-104 Microsoft Azure Administrator - Certificate of Completion.

I am US Permanent Resident and do not require visa sponsorship.
