PROFESSIONAL SUMMARY

Data Analyst / BI professional with 8+ years of experience across healthcare, banking, insurance, and tax domains, specializing in SQL development, ETL pipeline design, cloud data platforms, and enterprise business intelligence reporting. Proven ability to translate complex business and regulatory requirements into scalable Power BI, Tableau, and SQL Server solutions. Skilled in data modeling, data quality management, and cross-functional stakeholder communication. Track record of reducing reporting turnaround by up to 60%, improving data accuracy to 99%+, and driving self-service analytics adoption across large, regulated organizations.

CORE COMPETENCIES

SQL Development & Query Optimization • Data Analysis & Reporting • ETL / Data Pipeline Design • Data Modeling (Star/Snowflake Schema) • Business Intelligence (Power BI, Tableau) • Requirements Gathering & Stakeholder Management • Data Quality & Governance • Cloud Data Platforms (Azure, GCP) • Regulatory & Compliance Reporting (HIPAA, SOX) • Root Cause & Trend Analysis • Data Warehousing • Dashboard Design & KPI Development

TECHNICAL SKILLS

Languages & Query: SQL, Python, R, DAX, MDX, PySpark, Spark SQL, C++

BI & Visualization: Power BI (DAX, Power Pivot, Report Builder), Tableau (Desktop, Server, Cloud), SSRS, SSAS, SAP BusinessObjects, Crystal Reports, Alteryx

Databases: SQL Server (2005–2019), PostgreSQL, Oracle, MySQL, Snowflake, MS Access

ETL & Integration: SSIS, Azure Data Factory (ADF), StreamSets, Incremental Load, CDC, HL7, EHR Integration, Databricks

Cloud Platforms: Azure (SQL, Synapse Analytics, Data Lake, ADLS, Blob Storage, VMs, SQL Managed Instance), GCP (BigQuery, Dataflow, Dataplex)

Big Data: Apache Spark, Delta Lake, Hadoop, Apache Iceberg

Data Modeling: Star Schema, Snowflake Schema, Dimensional Modeling, Data Warehousing, Semantic Layer Design

Power Platform & M365: Power Automate, Power Apps, SharePoint Integration, Power BI Service, OneDrive/Teams Connectors

Tools: Jira, Git, SSMS, Visual Studio, BIDS, SQL Profiler, MS Project, Workday, MS Excel (Pivot Table, XLOOKUP, VLOOKUP, Visualization)

Compliance: HIPAA, SOX, Financial Regulatory Reporting, Audit Controls, Data Quality Management

PROFESSIONAL EXPERIENCE

Data Analyst / Database Administrator

Jul 2025 – Dec 2025

Blitz Medical Billing, Frisco, TX

- Administered and optimized Azure SQL databases supporting medical billing, claims processing, and payment posting workflows, improving query performance by 30–40% and reducing reporting delays for billing teams.
- Analyzed revenue cycle management (RCM) data to surface insights into denial trends, AR aging, payer mix, and reimbursement performance, enabling leadership to resolve billing inefficiencies faster.
- Led migration of enterprise RCM dashboards from Tableau Server to Tableau Cloud with zero data discrepancies across CPT codes, charge captures, and claims pipelines, reducing redundant data sources by 35%.
- Optimized Tableau extracts powering clean claim rate, AR aging, denial trend, and payer mix KPIs, cutting extract refresh times by 20–30% for 100+ stakeholders.
- Designed and maintained Microsoft Access databases for payer contracts, fee schedules, and denial codes with automated import/export routines syncing to SQL Server.
- Built SharePoint-integrated Power BI dashboards for billing leadership, embedding reports and using SharePoint Lists for task tracking and exception management.

- Implemented HIPAA-compliant backup, recovery, and audit controls maintaining 99.9% system availability; documented ETL pipelines, VBA tools, and BI reports.

Senior Data Analyst

Jan 2023 – Jul 2025

Farmers Insurance, Remote

- Acted as analytical liaison between business stakeholders and data engineering teams, running requirements workshops to define KPIs and reporting needs, cutting manual reporting workload by 40%.
- Designed and maintained SSIS ETL pipelines consolidating CSV, XML, and Excel sources into SQL Server and Azure Data Warehouse using incremental load strategies, reducing batch processing times by 60%.
- Supported migration of on-premises SQL Server to Azure SQL/VMs, integrating Azure Data Factory, Blob Storage, and Synapse Analytics for cloud pipelines processing 30+ TB monthly with zero downtime.
- Built star and snowflake schema data models and advanced Power BI dashboards with DAX and Power Pivot, improving financial forecast accuracy by 30% and end-user adoption by 50%.
- Maintained Microsoft Access databases for regional underwriting offices with normalized relational models and automated import/export routines feeding the enterprise SQL Server warehouse.
- Integrated Power BI and Power Automate with SharePoint, enabling automated KPI threshold alerts and self-service reporting for 200+ non-technical users.
- Led data quality analysis and root cause investigations on reporting discrepancies, implementing validation frameworks that achieved 99% data accuracy across BI workflows.

Senior Data Analyst

Sep 2021 – Jan 2023

Bank of America, Remote

- Delivered full-stack BI solutions using SQL Server (SSIS, SSAS, SSRS) and Power BI supporting enterprise KPIs including loan performance, customer segmentation, and risk analysis across 10+ banking departments.
- Analyzed enterprise banking data to surface insights on churn, delinquency, and risk exposure, informing strategic decisions and improving audit readiness across banking domains.
- Built SSIS ETL pipelines extracting data from Oracle, Teradata, and flat files into banking data warehouses, processing 500K+ records per cycle at 99% data consistency and reducing pipeline failure rates by 45%.
- Engineered SQL scripts, stored procedures, and user-defined functions, reducing query execution times by up to 60% and enabling timely financial reporting and regulatory compliance.
- Created Power BI dashboards and SSRS reports for retail banking, loan operations, and compliance teams, visualizing account growth, transaction volumes, delinquency rates, and churn using DAX and drill-through techniques.
- Published Power BI reports to SharePoint and integrated Power Automate to trigger delinquency threshold alerts, reducing time-to-action for risk teams by 35%.
- Partnered with SMEs, risk officers, and business analysts in Agile sprints to gather requirements, validate data outputs, and deliver role-based reporting improving adoption and audit readiness.

Data Analyst

Jan 2020 – Aug 2021

Intuit Inc., Dallas, TX

- Delivered BI solutions using SQL Server (SSIS, SSAS, SSRS) and Power BI for tax KPIs including compliance rates, client segmentation, and audit readiness.
- Developed SSIS ETL pipelines processing 500K+ records per cycle from Oracle, Teradata, and flat files at 99% data consistency, reducing pipeline failure rates by 45%.
- Optimized SQL scripts, stored procedures, and user-defined functions in high-volume tax environments, cutting query execution times by 60% and enabling timely tax filings and regulatory reporting.
- Built interactive Power BI dashboards and SSRS reports tracking tax filing trends, audit statuses, refund volumes, and client retention using DAX and drill-through visualization.
- Managed Microsoft Access databases for client record management and audit tracking with normalized schemas and automated import/export routines across Access, Excel, and SQL Server.
- Conducted ad hoc analyses supporting regulatory reporting and collaborated in Agile sprints on legacy system migrations and role-based reporting solutions.

Data Analyst

Apr 2018 – Dec 2019

Anthem Inc., Remote

- Led BI solution development for healthcare operations, collaborating with clinical analysts and administrators to reduce manual reporting workload in claims and patient data processing by 40%.
- Analyzed clinical and administrative healthcare data to deliver insights on patient outcomes, readmission rates, claims processing efficiency, and operational performance to executive leadership.
- Designed SSIS ETL workflows consolidating EHR data, HL7 files, and insurance claims into SQL Server and Azure Data Warehouse using incremental load strategies, cutting batch processing times by 60%.
- Supported migration of on-premises healthcare data systems to Azure SQL, leveraging Azure Data Factory, Synapse Analytics, and Data Lake for HIPAA-compliant orchestration of 30+ TB of data with zero downtime.
- Built Power BI dashboards with DAX and Power Pivot tracking patient outcomes, readmission rates, and claims processing efficiency, improving forecast accuracy by 30% and user adoption by 50%.
- Built and maintained Microsoft Access databases for provider credentialing and claims adjudication workflows with relational models and automated import/export processes.
- Performed data quality assessments and reconciliation analysis across EHR and claims migration projects, producing HIPAA-compliant documentation and training for clinical/administrative staff.

EDUCATION & CERTIFICATIONS

Master of Science in Electrical Engineering
Executive MBA in Information Technology

Southern Methodist University, Dallas, TX
Ottawa University, Ottawa, KS
