

Objective

Highly skilled and results-oriented Java Developer seeking a challenging position to leverage expertise in Spring Boot, microservices architecture, and cloud-native application development. Proven track record of optimizing performance and delivering robust software solutions.

Technical Skills

Category	Technologies
Languages	Java (8, 11, 17), SQL
Frameworks	Spring Boot, Spring MVC, Spring Security, Spring Cloud, Hibernate JPA
Messaging	JMS (ActiveMQ, RabbitMQ, IBM MQ), Apache Kafka
Databases	PostgreSQL, MySQL, Oracle DB
Tools & DevOps	Docker, Kubernetes, Jenkins, Maven, Git, JUnit, Mockito
Architecture	Microservices, RESTful APIs, Event-Driven Architecture

Experience

Senior Technical Lead | HCL – USA | January 2023 – Jul 2025

- Lead the design and implementation of a high-traffic financial platform using **Spring Boot** and **Java 17**, improving transaction processing speed by **30%**.
- Architected asynchronous communication patterns using **JMS (ActiveMQ)** to decouple services, ensuring high availability and fault tolerance.
- Optimized complex database interactions using **Hibernate** second-level caching and lazy loading, reducing database load by **25%**.
- Mentored a team of 4 junior developers, conducting code reviews and implementing best practices for Clean Code and SOLID principles.

IT Analyst | Tata Consultancy Services – Chennai | 5 Years (March 6 2014- October 26 2018)

- Developed new features and maintained existing code for microservices solutions using Java 8, Spring, and JUnit.
 - Implemented secure authentication and authorization protocols using Spring Security and OAuth2
 - Conducted code reviews to ensure code quality and prepared comprehensive documentation for implemented solutions.
 - Contributed to all phases of the SDLC, including requirement collection, design analysis, and technical design documentation.
 - Implemented design patterns such as Singleton, Session Facade, and Data Access Object (DAO).
 - Utilized Mocking for JUnit test cases during batch processing.
 - Designed and developed SOAP web services.
 - Managed builds using Maven as the build management system.
 - Utilized ClearCase SVN for configuration control.
 - Applied working knowledge of Model-View-Controller (MVC) framework using Spring MVC
-

Education

Bachelor of Engineering in Electrical and Electronics Engineering

Anna University, Chennai | 2009-2013
