WORK EXPERIENCE

Medical Answering Services, Syracuse, NY (remote) — Java Developer (April 2022 - November 2023)

- Resolved work items involved in the building out of a new back-end Spring microservices software system to replace a legacy (TeraScript) system serving the many business requirements of a busy and expanding Non-Emergency Medicaid Transportation services company.
- Fulfilled feature and bug tickets using Spring, SpringBoot and Maven to establish back-end APIs servicing the company's front end interface. Worked tickets involving controller, business logic, and database microservices.
- Used IntelliJ IDEA for development, debugging, code reviews, and Git management. Used plugins for linting, git, style guidelines, and Lombok.
- Used JPA for creating SQL statements and for entity manipulation, Jackson for JSON/POJO conversions, and Lombok for reduction of boiler-plate code.
- Created and refactored automated unit and integration tests with Junit, Mockito, and MockMVC. Used Postman to test new and existing endpoints, Perfecto for front-end acceptance testing.
- Designed a Java module which utilized the Twilio SendGrid API for automating emails to our employees, medical providers, and transportation providers.
- Used Bitbucket for code sharing, Jira for issue tracking, Atlassian Confluence for project documentation and story pointing, and MS Teams for Scrum meetings.
- Participated in Agile software development practices, including feature demonstrations and hosting an occasional Scrum meeting.
- Used Azure pipeline for build, integration test automation, and CI/CD.
- Evaluated pull request code quality through code reviews.

BAE Systems, Rome, NY (remote) — Software Engineer II (February 2021 - November 2021)

- Worked feature and bug tickets for the development of BAE Systems' Geospatial eXploitation Products (GXP) software system.
- Used Java, Maven, Spring, and SQL for back-end work and JavaScript and React for front end work. Participated in story pointing and Scrum meetings.
- Used IntelliJ IDEA for developing and debugging Java code, and Chrome DevTools for debugging in the front end, Swagger for API documentation.
- Worked tickets to add functionality for internationalization.
- Worked tickets for extracting data from JSON based context objects for exploring and viewing GXP records and collections.
- Participated in SAFe (Scaled Agile Framework) practices.
- Designed and implemented a Java command line interface program for exploring a company Solr database.

SKILLS

Languages/Frameworks/Etc:

Java (Swing, AWT, Spring Boot/Web MVC/Security, JPA, Thymeleaf, JUnit, Mockito, Lombok, jsoup, Jackson, Maven, WebSocket, etc.), HTML, CSS, JavaScript, jQuery, REST, HTTP, Bash, C, C++, SQL, MySQL, Haskell, MATLAB, Python, PHP, C#, MIPS Assembly, WPF, XML, YAML, UML, RegEx

Software and Cloud:

IntelliJ IDEA, Eclipse, Visual Studio, Android Studio, Jira, Confluence, Zoom, Teams, Google Docs, Google Translate, Oracle VM VirtualBox, Hyper-V, Ionos VPS, Weka, draw.io, Postman, Perfecto, Genymotion, Azure, ADP, ARMS (Automated Records Management System), phpMyAdmin, Firebase, Swagger, Kronos, PassagePoint, Epic Hyperspace, exacqVision, Citrix, Sublime, SoX, PDFSam, Git

APIs:

Google Cloud (Translate, Text-to-Speech) APIs, SendGrid Email API, Twelve Data Stock Market API/data stream service, Weatherbit API, The Color API, Spring MVC REST API Dev.

Operating Systems:

Linux, Xinu, Windows, macOS, Android OS, QubesOS

Other Skills:

Agile, Organizing, Algorithms, Mathematics, Cryptography, Computer Security, Formal Methods, Communication, Critical/Creative Thinking

OTHER PROJECTS

Designed and Developed a Full Stack Color Chooser Application with Java, Spring, Thymeleaf, JPA, Etc.

— Project for my LLC, Paradigm Shift Computation (September 2024 - Present, Current Project)

- Allows users to register, log in and out, create, save, rename, remove, and explore color sets.
- Uses SQL database with multiple tables. Has Spring Web API with several endpoints serving front end JavaScript.
- Front end is mostly vanilla JavaScript, HTML, and CSS, but Thymeleaf is also used.
- Deployed for testing as an executable jar file on a rented Linux Virtual Private Server using scp and ssh.
- Users can add colors to sets in several ways, including by clicking a grid containing 139 distinct colors with HTML recognized names, specifying colors in RGB, HSL, or HEX format, using browser dependent HTML color chooser widget, or choosing colors from an HTML selection list scroll. When colors are specified with RGB, HSL, or HEX formats, API calls are made to convert to the other formats, and input fields are populated.
- Users can copy color and tabulated color set data to clipboard in various ways and formats by easily clicking on tables with mouse and using optional modifier keys. Keyboard event processing allows users to navigate website with keyboard shortcuts.

Built a Mock Repository with GUI using C++, C# and WPF

— Object Oriented Design, Term Project (June 2018)

- Created a software system with synchronized inter-process communication, a process pool for concurrent execution of tests, and threads for message relay.
- Used file system for file and directory searching and persisting user credentials.
- Utilized WPF to allow users to login, navigate with tabs, upload and download source code/test result files, and create and submit test requests through GUI.
- Incorporated three previous course projects for remote source code testing functionality. Incorporated source code from professor's online repository.

Developed Web Apps Accessing Various APIs, Client for Twelve Data Stock Market API and Data Stream

— Independent Projects

Interfaced Java Client with Google Cloud Translation and Text-To-Speech APIs

— Independent Project

Designed and Implemented Several Java Swing GUI Applications

— Independent and School Projects

Created Bash Scripts Utilizing Shell Commands and Java Executables

— Independent and School Projects

Developed Several Linux Command Line Interface Tools Using Java

— Independent and School Projects

EDUCATION

Syracuse University, Syracuse, NY — M.S. Computer Science

January 2018 - December 2019

GPA: 4.0 / 4.0

Syracuse University, Syracuse, NY — B.S. Mathematics

Minor Degrees: Biology, Computer Science

August 2010 - August 2016

GPA: 3.145 / 4.0
