

# Piyush Jain, CBAP

Senior Business Analyst | Product-Oriented BA | Data & Analytics Specialist  
Connecticut, USA | +1 832 938 6908 | jainpiyush023@gmail.com

## PROFESSIONAL SUMMARY

Senior Business Analyst with 14+ years of IT experience, including 8+ years specializing in end-to-end requirements engineering, data mapping, and system implementation across diverse industries. CBAP-certified, with proven experience acting as a pseudo–Product Owner — managing backlogs in Azure DevOps and JIRA, authoring epics, features, user stories, and acceptance criteria, and driving sprint ceremonies. Translates complex business needs into precise BRDs and technical specifications, performing requirement-vs-code gap analysis to ensure 100% traceability. Skilled in data validation and QA, designing multi-scenario test cases and comparing production vs. UAT outputs to ensure release quality. Leverages Generative AI for code documentation, test framework creation, and reporting automation, alongside strong expertise in Power BI, SQL, and PL/SQL for executive dashboards and reporting. Also experienced in wireframing and UX collaboration on web and data applications. Brings 6+ years as an Oracle EBS & Demantra Consultant (PO, INV, OM) and 4+ years as a Certified Scrum Master leading cross-functional offshore/onsite teams.

## CORE COMPETENCIES & TECHNICAL SKILLS

|                   |                                                                                                                                                                                                                                           |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Business Analysis | Requirements Gathering & Analysis, Gap/Fit-Gap Analysis, Business Process Mapping (As-Is/To-Be), BRD Authoring, Requirement-vs-Code Gap Analysis, Stakeholder Management, UAT Coordination, Solution Feasibility, Traceability Management |
| Pseudo PO / Agile | Azure DevOps & JIRA Backlog Ownership, Epics, Features, User Stories, Acceptance Criteria, Sprint Planning & Velocity Monitoring, Backlog Grooming, Rally, Scrum Ceremonies                                                               |
| UAT & QA          | UAT Planning & Coordination, Multi-Scenario Test Case Design, Requirements-to-Test Traceability, Data Validation (Production vs. UAT), Defect Root-Cause Tracking, HP Quality Center (HPQC), Pre-Release Validation                       |
| Data & Analytics  | Power BI (incl. Generative AI integration), Tableau, SQL/PL/SQL, Interactive Dashboard Development, Data Visualization, Executive Reporting, ETL/Data Pipeline Analysis                                                                   |
| AI & Automation   | Generative AI for Code Documentation & Test Framework Creation, AI-Augmented Reporting Automation, Natural Language Query Integration on Power BI                                                                                         |
| Wireframing & UX  | Wireframe Authoring, Prototype Collaboration, UX Design Review, Microsoft Visio, Low-Fidelity Mockups for Web & Data Applications                                                                                                         |
| Oracle SCM        | Oracle EBS R12/11i — PO, INV, OM; Oracle Demantra (Demand Planning, Forecasting, S&OP); Techno-Functional Customizations                                                                                                                  |
| Technical Dev     | Oracle SQL, PL/SQL, XML Publisher, Interface & Conversion Development, Data Modeling, Data Integration, ETL Processes                                                                                                                     |
| Tools & Platforms | Azure DevOps, JIRA, Rally, HPQC, Redmine, Microsoft Visio, PL/SQL Developer, Confluence                                                                                                                                                   |

## CERTIFICATIONS

- CBAP (Certified Business Analysis Professional) – IIBA
- Certified Scrum Master (CSM) – Scrum Alliance
- Six Sigma Green Belt
- Microsoft Azure Fundamentals (AZ-900)
- Azure Data Platform (DP-900) | Azure AI Fundamentals (AI-900)

## PROFESSIONAL EXPERIENCE

---

### Business Analyst – Procure-to-Pay (P2P) & AI Data Solutions

LinkedIn (Contract) – Remote, USA | April 2026 – Present

- Gather and document detailed business requirements for Procure-to-Pay (P2P) workflows — including RFP, RFQ, vendor onboarding, and purchase order lifecycle stages — translating them into annotation guidelines and acceptance criteria for AI model training datasets.
- Perform gap analysis between existing P2P process documentation and annotated data outputs to ensure training data accurately reflects real-world procurement workflows, sourcing events, and approval hierarchies.
- Partner with cross-functional stakeholders (Product, Data Science, and Domain SMEs) to define quality benchmarks and validation criteria for RFP/RFQ and P2P data annotation, ensuring alignment with platform business objectives.
- Author user stories and acceptance criteria for annotation task design, driving consistency and traceability between business requirements and AI model training inputs.
- Conduct UAT-style validation of annotated datasets — comparing annotation outputs against source procurement documents to identify discrepancies and refine annotation rules.
- Bridge business and technical teams by documenting P2P domain-specific edge cases (e.g., multi-vendor RFQ comparisons, contract clause variations, approval routing exceptions) to improve model accuracy on real-world procurement scenarios.

### Senior Business Analyst

EY – GDS Ops Data Lake, Mumbai, India | November 2022 – April 2025

- **Pseudo Product Owner & Azure DevOps Backlog Management:** Owned the Azure DevOps backlog end-to-end across multiple concurrent workstreams — authored and refined epics, features, user stories, and acceptance criteria; managed sprint boards, monitored velocity, and maintained backlog health in close collaboration with global stakeholders.
- **Business Requirement Mapping:** Translated complex Finance and Source-to-Pay (S2P) business needs into detailed BRDs and technical specifications for the GDS Data Lake; performed requirement-vs-code gap analysis to ensure 100% traceability from elicitation through UAT sign-off.
- **Data Validation & Quality:** Designed multi-scenario UAT test cases with full requirements-to-test traceability in Azure DevOps; validated data integrity by comparing production vs. UAT outputs, coordinated defect triage with business stakeholders, and ensured pre-release validation aligned to agreed features.
- **Automation & AI Integration:** Spearheaded integration of a Generative AI model on top of existing Power BI reports — enabling natural-language data queries, automating routine reporting tasks, and building an AI-assisted test documentation framework that significantly reduced manual effort.
- **Visualization & Reporting:** Partnered with Finance and S2P teams to engineer interactive Power BI dashboards providing real-time operational and financial insights, directly informing executive decision-making across global technology teams.
- Managed end-to-end integration of diverse source system data into centralized Data Lake, coordinating across multiple global technology teams; conducted solution feasibility and system capability analyses to guide data-driven architectural decisions.

### Business Analyst & Project Manager

TCS – GE Gas Power, Schenectady, NY, USA | 2020 – 2021

- **JIRA Backlog Management:** Managed Azure DevOps and JIRA boards as acting Product Owner — tracked epics, features, and user stories across sprint cycles; maintained backlog prioritization in close collaboration with product owners and technical leads; facilitated all Scrum ceremonies for offshore development teams.
- **Business Requirement Mapping:** Facilitated design sessions for the WMSA Project Freight Estimate (PFE) solution — authored detailed functional specifications and BRDs, managed fit-gap analysis, and performed requirement-vs-code gap analysis to align system capabilities with business needs prior to development.
- **Data Validation & Quality:** Coordinated UAT planning and execution — authored multi-scenario test cases linked to requirements, validated data integrity, tracked defects to root-cause resolution in JIRA, ensuring zero-defect releases prior to go-live.

### Business Analyst

TCS – GE Gas Power, USA & Mumbai, India | 2018–2020 | September 2021 – October 2022

- **Business Requirement Mapping:** Authored BRDs and technical specifications for Data Lake ingestions and the Pulse responsive web application; performed deep-dive analysis of data dictionaries and ER diagrams to optimize source-to-target data structures and map complex business rules precisely to code.
- **Wireframing & UX Collaboration:** Collaborated with UX designers on wireframes and low-fidelity prototypes for the Pulse web application — reviewed designs against business requirements and facilitated stakeholder sign-off prior to development commencement.
- **Data Validation & Quality:** Directed UAT for monthly Pulse releases — designed multi-scenario test cases traceable to requirements, validated data integrity by comparing production vs. UAT outputs, tracked defects with root-cause linkage, achieving consistent zero-defect delivery.
- **Visualization & Reporting:** Created interactive operational dashboards and data-driven reports using SQL and visualization tools, enabling stakeholders to monitor key metrics and surface actionable insights.
- Documented As-Is / To-Be business process states to support stakeholder alignment and solution design during the Discovery phase.

### **Oracle Demantra & EBS Techno-Functional Consultant**

*TCS – Ingersoll Rand, Charlotte, NC, USA | 2016 – 2017*

- Implemented Oracle Demantra to streamline Sales & Inventory Operations Planning (SIOP) and forecasting, building robust integrations with Oracle EBS SCM modules (PO, INV, OM).
- Defined functional solutions in Oracle Demantra and EBS to address diverse business needs; provided decision support to end users on demand planning and forecasting.

### **Oracle Apps Techno-Functional Consultant & B2B Analyst**

*TCS – GE Oil & Gas, Houston, TX, USA | 2015 – 2016*

- Built inbound/outbound XML integrations for AR invoice data and optimized the Order-to-Cash (O2C) cycle.
- Coordinated with multiple stakeholders and third-party vendors for end-to-end build, testing, and quality assurance.

### **Oracle Apps SCM Technical Developer**

*TCS – GE Oil & Gas, Mumbai, India | 2013 – 2015*

- Developed PL/SQL packages for high-volume data migration (Sales Orders, Items, Purchase Orders) from legacy systems to Oracle ERP; resolved data integrity issues across interfaces.

### **Technical Developer**

*TCS – GE Oil & Gas, Mumbai, India | 2011 – 2013*

- Designed Oracle PL/SQL stored packages, procedures, and functions integrating FSCC, Artemis, and Primavera systems; executed data migration from Artemis to FSCC.

## **EDUCATION**

---

### **Bachelor of Technology (B.Tech) – Electronics & Communications Engineering**

Graduated: 2010
