

Validation Engineer

POORNIMA IRENI

poornimaireni29@gmail.com

(940) 231-9391

- 4+ Proficient in Computer System Validation and CQV . Broad knowledge of GMP, FDA, ISO, SOP, regulation and Quality Standard regulations.
- Performed and executed Validation, Qualification and Re-Qualification protocols for the Manufacturing Equipment., R&D, Clinical, and Pre-Analytical IT systems
- Knowledge of GAMP, GxP's (GCP, GLP and GMP), 21-CFR Part 11 regulation of Electronic Records, Electronic Signatures and Audit Trails.
- Experience in Software Development Life Cycle (SDLC), familiar with Waterfall, V-shape model and agile model.
- Developed Standard Operating Procedures (SOP's), policies and working instructions to comply with FDA regulations.
- Experience in reviewing and developing User Requirement Specifications (URS) and Functional Requirement Specifications (FRS) in compliance and conformance with FDA rules and regulations.
- Executed Spreadsheet Validation.
- Comprehensive knowledge and extensive experience in technical writing of Validation protocols (Installation Qualification – IQ, Operational Qualification – OQ and Performance Qualification –PQ), Validation Master Plan (VMP), SOP's, Test Summary Report, Test Plans, Test scripts, and Requirement Traceability Matrix (RTM) in FDA regulated environments.
- Good experience in writing Risk Assessment, Remediation Plan, Deviation report, and User Acceptance Testing (UAT).
- Experience in reviewing Corrective and Preventive Actions (CAPA) and highlighting and suggesting the remediation plans to mitigate the non-compliance.
- Involved in Data Center Migration Project and responsible for developing the validation deliverables of DataCenter Migration.
- Experience in writing and developing Test Plans, Test Scripts, Test Procedures, and Test Summary Reports of all the laboratory equipment's.
- Involved in writing the User Acceptance Test Summary Report.

TECHNICAL EXPERIENCE/Skills:

Computer System Validation and Infrastructure Qualification, System Testing and Test case Design, SDLC documentation, IQ/OQ/PQ, Test Plan, URS, FRS, SOP's, CAPA, Validation plan, RTM, Compliance Risk Profile, , Waterfall, V-Model and Agile, FDA Quality system regulations, 21 CFR Part (11, 110, 210, 211, 600, 820), Master Control, GxPs (GMP, GLP, GCP).

PROFESSIONAL EXPERIENCE

Sr Computer System Validation Engineer

Eurofins, USA, May 2024 – Present

Responsibilities:

- Held the responsibility of writing protocols, driving the projects' responsibilities, Leading, Supervising and Training of validation activities and executions to compliance with, 21CFR Part 11
- Developed overall test strategy aligning testing activities between system, interface, data migration, user acceptance and performance test streams

- Managed offshore test team responsible for functional usability and exploratory testing
- Developed test cases and executed tests.
- Quality and Compliance lead – Infrastructure build and qualification
- Quality and Compliance lead on a team tasked with building, qualifying and deploying enterprise servers and storage infrastructure
- Managed multi-site cross functional integrated testing activities as part of a project to integrate two business units
- Managed all aspects of software development, software implementation planning and preparation.
- Responsible for generating and reviewing CSV deliverables in compliance with 21CFR Part 11 and GxP FDA Compliance Regulations.
- Establishes the CAPA Management System and manages its deployment including IQ-OQ-PQ Validation for web-based software tool for the CAPA system. Authored Test Cases, URS and mapping
- Supervision of all project specific deliverables across the IT portfolio, including but not limited to computer system validation requirements - cGxP, GAMP5, 21 CFR Part 11
- Documented activities in compliance with FDA, cGMP
- Involvement in writing, reviewing and enhancing the validation deliverables (URS, FRS, Design document, IQ, OQ, PQ) for LabWare LIMS
- Assists with project execution during projects that involve area of expertise including support of computer related systems, manufacturing equipment, Cleaning Validation, and product qualification testing (IQ, OQ, PQ).
- Lead Periodic Review program for all the GxP computerized system, authored SOPs and work instruction and provided training and managed QA resources.
- Determine the Gamp 5 Software category, business criticality, privacy risk as it relates to 21CFR part 11 compliance and Annex 11.
- Involved in GAP analysis for User requirements and developed Remediation plan to ensure compliance with FDA regulations.
- Implemented cGXP's (GMP, GLP, and GCP) and GAMP 5 guidelines in the systems.
- Prepared Standard Operation Procedures (SOP's) by adhering to cGMP standards and other appropriate regulations.
- R&D lead for all design control areas to confirm product performance, including design verification & validation planning and execution in compliance with ISO standards and the US/ EU regulatory requirements
- Develop and execute Installation, Operational and Performance Qualification Protocols for IT Applications following SDLC, cGMP, FDA 21 CFR Part regulations, ISO, GAMP 5 guidelines and company policies.
- Followed Computer Systems Validation (CSV) Master Plan to author, review and approve CSV deliverables for systems as per GxP (GLP, GCP, and GMP) FDA Assessment.
- Responsible for assisting in the implementation of software systems in compliance with regulatory requirements as they pertain to 21 CFR Part 11 and GAMP 5.0 standards.
- Provide computer systems validation support for electronic quality management systems, databases and other systems subject to 21CFR Part 11 requirements.
- Reviewed test cases and scripts and documented the results as per the FDA regulations.
- Interfacing, qualifying and validating (cGxP) instruments and network systems in the laboratory and manufacturing environment to an Electronic Laboratory Notebook system.

Aurobindo Pharma, India Mar 2021- Dec 2022

Computer System Validation Engineer

Responsibilities:

- Involved in preparing, executing and defending Remediation Plans, Change Controls, Requirements, Design Specs, Traceability Matrices, IQ, OQ and PQ protocols and summary reports for spreadsheets.
- Experience validating PLC's and Computer Systems.
- Designed Performance Qualification for LabVantage LIMS by studying the business rules and interviewing the users.
- Analyzed and reviewed validation deliverables like Validation Plan, Risk Assessment, Validation Summary Report in compliance with 21 CFR Part 11, GAMP 5 and GMP FDA Compliance
- Involved in Risk Assessment of laboratory instruments.
- Comply and ensure adherence with FDA, cGMP requirements
- Provide expert recommendations and decisions on regulatory issues relating to CMC and coordinate authoring and review of content, including proactive risk management and mitigation.
- Responsible for creating the Corrective and Preventive Action Plan (CAPA) and performed the GAP analysis to remediate audit findings and observations given by the auditors for regulated Research and Development (R&D) applications
- Responsible for reviewing and approving validation protocols (IQ, OQ,PQ)
- Maintained excel spreadsheet and access data base applications for data collection, customer service RMA information and QA reports.
- Validated pharmaceutical computer systems and manufacturing facilities at client site following GAMP, FDA, GMP, and 21 CFR Part 11 regulations.
- Prepared validation plan (VP) for validating analytical laboratory equipment and also Labware LIMS integration with ELN.
- Analyzed and directed orders for initiation of Risk Assessments related to CGLP Systems
- Implemented and maintained Quality System requirements to 21 CSFR Part 11
- Performed remediation and validation of legacy and new computer systems - GLP and GMP assessments, GAP assessments, writing validation plans, user requirements, functional specifications, IQ, OQ, PQ and summary reports.
- Provide regulatory guidance to internal business to comply with cGxP.
- Involved in reviewing the validation protocols for the LabVantage LIMS application and understanding the entire Validation SDLC pertaining to the project.
- Proficient at the use of Excel to perform calculations and manipulate complex spreadsheets
- Involved in preparation of documents for Computer systems validation documents in accordance to 21CFR Part 11.
- Implemented and managed Functional design requirements, design input and output (I/O), design Verification and Validation (V&V) and design risk management.
- Worked in compliance with FDA regulations and cGxP guidelines in all the aspects of Computer Systems Validation.

Hetero Pharma, India Jan 2019 – Feb 2021

CQV Engineer

Responsibilities:

- Involved in validation of Process equipment, Instrumentation, and standalone units for the manufacturing facility. Validated Equipment and Systems: Balances, pH meters, Biosealers, Biowelders, FITs, Autoclave, Freezers.
- Assisted in developing Master Validation Plan, URS, FS, Commissioning protocols for HVAC, Utilities IOCs, Room IOQs, SOPs, I/OQ & PQ protocol templates to establish a higher quality standard for qualifying equipment. Wrote and reviewed the system related SOPs to ensure compliance of company's processes, policies, and procedures.

- Involved in documentation of different stages of validation life cycle in compliance with 21 CFR Part 11.
Performed technical/quality review of system documents for equipment and processes, including Commissioning and Qualification/ Validation Master Plans, URS, SOPs, SAT, FAT, DQ, and IQ/OQ/PQ protocols.
 - Generated, and executed Qualification Protocols for Utilities (WFI, CA, N2, Purified Water, Clean Steam), CIP Skids, Autoclaves, Freezers, and Refrigerators.
 - Implemented and executed qualification procedures for chromatography systems, clean rooms, WFI, HVAC, cold storage rooms, floor scales, and critical utilities. Executed equipment validation for facilities, cold rooms, critical utilities and laboratory equipment.
 - Authored, executed, and archived IOPQ, decommissioning, and other validation documents within electronic quality management systems (eQMS) such as Veeva Vault, and Kneat Gx, following Good Documentation Practices (GDP).
 - Generated, and executed qualification Protocols for QC Laboratory Equipments such as FT-NIR, Sartorius Biosealer, Sartorius Biowelder, Sartorius FITs, Palltronic FITs, M9 TOC Analyzer.
 - Conduct Part 11 Assessment, GxP Assessment by collaborating with cross-functional teams: System Engineering, Quality, Facilities
-

EDUCATION

Master of Science: Biomedical Engineering Wright State University Dayton, Ohio Coursework: Biomaterials, Engineering Bachelor's: Agriculture Biotechnology, Bharath University , India
