SUMMARY

Cyber Security Lead with extensive penetration testing experience and a proven record of reducing vulnerabilities by 40%. Expertise spans threat detection, risk assessments, and secure code reviews in both financial and public sectors. Adept at utilizing advanced tools and methodologies to document risks and recommend strategic countermeasures, ensuring robust IT security architecture and compliance.

SKILLS

- **Technical Skills:** Security Operations and Monitoring, SIEM (Splunk, IBM QRadar), Intrusion Detection Logs Analysis, Network Traffic Monitoring, Threat Intelligence
- **Compliance and Risk Management:** IT Security Audits, IT Risk Assessment, Regulatory Compliance Audits, NIST CSF, ISO 27001, CIS Controls, SOC2, Risk Management Methodologies, Information Security Groups
- **Security Engineering:** Incident Response, Vulnerability Assessment & Penetration Testing, System Hardening, Secure Code Review, Cyber Security Principles, IT Security Architecture, Adversarial Tactics
- **Cloud:** AWS, Azure Security, Configuration Audits, Security Controls Implementation
- **Forensic & Investigation:** Cyber/Digital Forensics, Cyber Threat Hunting
- **Tools & Platforms:** Splunk, IBM QRadar, SumoLogic Cloud SIEM, Prisma, Burp Suite, Metasploit, Nessus, NMap, Wireshark, Encase, Forensic Toolkit, Autopsy, Maltego, Cellebrite UFED, wxHexEditor

WORK EXPERIENCE

Winwin Labs

Sep 2024 - Present

Cyber Security Lead

Michigan, USA

- Analyzed web applications for security vulnerabilities and applied penetration testing techniques to safeguard against cyber threats.
- Monitored network traffic for security incidents and executed real-time threat detection to support proactive risk mitigation.
- Conducted comprehensive IT risk assessments and compliance audits, documenting vulnerabilities and recommending strategic security enhancements.
- Created and delivered secure coding workshops for development teams, improving security awareness and reducing common vulnerabilities by 60%.
- Led security architecture reviews for cloud-native applications, collaborating with development teams to integrate robust security controls early in the development cycle.
- Established and implemented SSDLC processes, resulting in a 40% reduction in security vulnerabilities found in production code.
- Developed automated security tooling to streamline routine tasks, saving 15 hours per week on manual security reviews.
- Mentored junior cybersecurity specialists, enhancing their problem-solving skills and improving overall team efficiency in addressing vulnerabilities.

KPMG

Jun 2020 - Jan 2022

Cyber Security Consultant

Ahmedabad, India

- Directed a team of 6 in conducting a Comprehensive Security Review (CSR) for nationally critical public-sector banks, with a focus on application security testing, vulnerability management, and architecture code review.
- Performed IT audits and regulatory compliance reviews (ISO 27001, SOC 2) for financial institutions, documenting identified vulnerabilities and proposing actionable mitigations to enhance security posture.
- Integrated automated security testing within CI/CD pipelines for 15+ applications using SonarQube and Checkmarx to identify weaknesses early in the development lifecycle.
- Conducted end-to-end security audits to identify gaps across applications, networks, configurations, and architecture, recommending targeted countermeasures to reduce risk exposure.
- Developed custom security tools using Python to automate vulnerability scanning and reporting, decreasing assessment time by 40%.
- Orchestrated IT General Controls and Application Controls reviews with a team of 6 during IT security audits, ensuring comprehensive risk documentation and strategic remediation.
- Implemented security controls for cloud-native applications on AWS and Azure platforms, supporting compliance and reducing security incident frequency.
- Pioneered secure development practices across 5 major banking applications, leading to a 75% reduction in critical vulnerabilities.
- Conducted third-party risk assessments to evaluate vulnerabilities and documented risks, supporting senior decision-makers with actionable security insights.

Ernst and Young LLP (EY)

Dec 2017 - Mar 2020

Cyber Security Associate Consultant

Mumbai, India

- Performed penetration testing and vulnerability management for mission-critical internal/external banking and financial products contributing to over \$20M annually, including - corporate & personal banking, retail banking, and core banking
- Performed comprehensive security assessments of web and mobile applications for major financial institutions, identifying and helping remediate 200+ vulnerabilities

- Led security testing of microservices architecture for a major banking platform, ensuring safe communication between services, with 20% cost savings.
- Executed IT security audits and security risk assessments for 10 large financial organizations, and analyzed firewall and intrusion detection logs, identifying anomalies and potential threats
- Created automated security testing frameworks using Python and Burp Suite APIs, increasing testing efficiency by 40%
- Executed SWIFT Security reviews for Indian retail banks in terms of SWIFT's Customer Security Program (CSP) and Indian regulatory guidelines for SWIFT.
- Conducted threat modeling sessions with 3 different development teams, identifying and mitigating security risks early in the development lifecycle for the Bombay Stock Exchange (BSE) operations.
- Co-authored RFPs for third-party integrations, ensuring secure data exchange between systems, strengthening security, and cutting down data loss by 30%

EDUCATION QUALIFICATIONS

Illinois Institute of Technology, Chicago, IL (USA)

Aug 2022 - May 2024

MS Cyber Forensics and Security

- **GPA:** 3.66
- **Coursework:** Cybersecurity Management, Vulnerability Analysis and Control, Introduction to Open-Source Software, Database Security, Cloud Computing Security, Cybersecurity Technologies, Legal and Ethical Issues in IT

National Forensic Sciences University, Gandhinagar, GJ (IN)

Jul 2016 - May 2018

M.Sc. Digital Forensics and Information Security

- **GPA:** 3.60
- **Coursework:** Cyber Law, Cyber Forensics Fundamentals, Malware Analysis, Digital Forensics, Mobile Security and Forensics, Network Security and Forensics, Cloud Security

Gujarat University, Ahmedabad, GJ (IN)

Jun 2013 - May 2016

B.Sc.IT Information Security Management Services

- **GPA:** 3.33

PUBLICATIONS

- Ethical and Privacy Concerns in the Internet of Medical Things (IoMT). Published in the International Journal of Security Research
- Analyzing the Stealth Tactics of Operation Cloud Hopper. Co-authored research on advanced persistent threats
- Made a working prototype of Forensic as a Service (FRaaS) using an OpenStack cloud environment.
- Developed an enterprise-grade security testing framework using Python and Burp Suite APIs.
- Practices to Address Identity Theft in the Healthcare Industry. Published research on healthcare security
