

PRARUJ DIPAK BHAJEKAR

prarujbhajekar@gmail.com | (512)-763-2014 | [linkedin.com/in/praruj1005](https://www.linkedin.com/in/praruj1005) | Leander, TX (Open to relocation)

EDUCATION

DePaul University | Master's of Science in Information Systems | GPA – 3.9/4
University Of Mumbai | Bachelor's Of Engineering in Information Technology

Jan 2023 - Mar 2025

Jun 2014 - May 2019

SKILLS

- **Programming:** Python, R, SQL, PL/SQL, Java, Git
- **Data Engineering Concepts:** ETL Pipelines, Data Modeling, Data Quality & Governance
- **Databases/ Big Data:** Oracle, SAP HANA, PostgreSQL, Snowflake, Spark, Kafka
- **Cloud Platforms:** AWS (Redshift, S3), Azure, Kubernetes
- **Analytics & Visualization:** Power BI (Certified), Tableau, Looker, DAX, Power Query
- **Tools:** Jupyter Notebook, TOAD, MS Visio, Microsoft Excel, Microsoft Access
- **Certifications:** Microsoft Power BI Data Analyst Associate, dbt Analytics Engineering (pursuing), Databricks Data Engineer Associate (pursuing)

PROFESSIONAL EXPERIENCE

Torrent Power Limited (Electricity Distribution Franchise) – India
Business Analyst

Oct 2019 – Sep 2022

- Contributed to an Oracle-to-SAP ERP migration, designing SQL-based data workflows and validation checks that improved cross-system integrity by 25% and reduced reconciliation errors.
- Developed reporting pipelines and dashboards in SQL and Excel to support 30+ stakeholders, cutting reporting effort by 90% and enabling better visibility into KPIs and operational performance.
- Built and refined data quality controls to detect discrepancies, driving process changes that increased reporting accuracy by 20% and strengthened compliance readiness.
- Streamlined recurring workflows by automating reporting processes, accelerating delivery of decision-critical insights and supporting ERP adoption.
- Conducted system testing, validation, and user acceptance exercises during ERP transition, achieving a 1.5-hour recovery objective in disaster recovery testing.
- Partnered with operations and finance teams to document new ERP processes, provide knowledge transfer, and support successful system adoption and change management.

Volunteer – Bright Mind Enrichment – United States

Since Jun 2025

- Building a community-driven digital wellness platform on WordPress, customizing JSON integrations to support adult wellness, literacy, and peer support programs.
- Automating request workflows by linking Google Forms with structured spreadsheets to streamline responses and improve team coordination.

PROJECTS

- **Football Dataset Analysis | R (dplyr, ggplot2)**
Applied statistical modeling and visualization on 12K+ football records, building a predictive model with KPI tracking of goals, shots, and win probability, and identifying key factors influencing match outcomes.
- **Fast Food Chain Analysis | R, Tableau**
Analyzed 10K+ sales transactions to uncover trends in product performance, customer preferences, and store efficiency, providing insights to optimize store operations.
- **U.S. Airline Performance Analysis | R(caret, dplyr, ggplot2), Tableau**
Designed interactive Tableau dashboards to visualize airline performance trends. Applied statistical modeling and classification methods (logistic regression, decision trees) to uncover causes of delays and cancellations.
- **NYC Traffic Crash Pattern Analysis | Python(pandas, seaborn, matplotlib)**
Analyzed 30K+ crash records, applying time-series modeling to identify high-risk patterns by location, time, and cause. Produced safety-focused KPI visualizations to inform targeted risk-reduction strategies
- **Absenteeism at Work | Python(pandas, scikit-learn)**
Applied machine learning models (SVM, Random Forest, KNN) on 700+ employee records to predict absenteeism categories. Used feature importance to identify workforce risk factors, enabling better workforce planning.
