Summary

Data Engineer with expertise in designing and optimizing high-performance ETL pipelines, reducing processing time by 30% using Python, SQL, and Snowflake. Adept at cloud-based architecture (Azure, GCP) and data warehousing, ensuring scalability and cost optimization. Skilled in business intelligence (Tableau, Looker, Power BI), enabling data-driven decision-making. Proven track record of reducing data latency, automating workflows, and mentoring teams to enhance efficiency.

Skills

- **Data Engineering Skills:** ETL Development, Data Pipeline Optimization, Cloud Architecture (Azure, GCP), Data Warehousing (Snowflake), Data Modelling, Backup and Recovery, Data Analysis, Data Migration
- **Programming Skills:** Python (Pandas, NumPy, Matplotlib), SQL, Bash Scripting, C, C++
- **Tools & Frameworks:** Apache Airflow, Azure Data Factory, Tableau, Looker, Power BI, Git, GitHub, JIRA, Slack
- **Soft Skills:** Communication, Analytical and Problem-Solving, Teamwork, Leadership, Drive and Initiative

Experience

Lis Nepal Pvt Ltd | Data Engineer

Aug 2023 - Jul 2024

- Engineered scalable data pipelines integrating and transforming 10+ data sources (JSON, TAR, SFTP, API), ensuring seamless reporting and analytics.
- Optimized Apache Airflow pipelines, reducing data latency by 30%, improving system efficiency for 2M+ rows processed twice daily.
- Automated deployment workflows on Google Cloud Platform (GCP), reducing rollout time by 40% and enhancing system uptime.
- Enhanced QA processes, achieving a 25% reduction in post-deployment issues through robust testing and hypercare strategies.
- Documented workflows and conducted 5+ training sessions, resulting in a 20% decreased in post-handover support requests.

Lis Nepal Pvt Ltd | Associate Data Engineer

Apr 2022 - Aug 2023

- Led the lifecycle of a retail inventory project across 5 geolocations (EU, US, UK, HK, CA), ensuring data accuracy and scalability.
- Designed and implemented ETL pipelines using Azure Data Factory, handling subject area dependencies and processing 10+ years of historical data.
- Built and optimized Snowflake data warehouses, reducing data processing time by 20% and supporting real-time analytics for inventory and sales metrics.
- Delivered 20+ actionable insights via Tableau and Looker, improving decision-making for inventory management by 30%.
- Mentored 5 interns and conducted 6 knowledge transfer sessions, enabling seamless project transitions.

Lis Nepal Pvt Ltd | Software Engineer Intern

Jan 2022 - Apr 2022

- Evaluated and streamlined ETL workflows, reducing processing time by over 15 hours weekly.
- Authored and executed rigorous testing protocols for ETL processes, achieving a 98% validation success rate, which minimized data discrepancies and enhanced the overall reliability of data reporting for stakeholders.

Key Projects

Cloud Migration Project

- Migrated 10+ TB of legacy on-premises data to Snowflake on Azure, achieving a 40% improvement in query performance.

Retail Inventory Optimization

- Developed scalable ETL workflows to process global inventory data, providing insights that improved supply chain efficiency by 25%.

Education

Wright State University

Aug 2024 - Aug 2026

Master of Science, Computer Science (GPA: 3.5)

- **Coursework:** Big Data Analytics, Cloud Computing, Advanced Database Systems, Machine Learning for Engineers

Kathmandu University

Aug 2017 - Mar 2022

Bachelor of Engineering, Computer Engineering (GPA: 3.67)

- **Achievements:** Internships: Software Engineering Intern, focusing on data pipeline optimization and ETL processes.
