EXPERIENCE

Software Engineer, Cognizant, Hyderabad, India

Feb 2022-Jul 2023

- Developed scalable enterprise applications using Java, Spring Boot, and Spring Framework with a microservices architecture for modularity and fault isolation
 - Built and optimized RESTful APIs for seamless service communication and reduced SQL query latency by 30% through query refactoring.
 - Deployed and managed distributed systems on AWS (EC2, S3, Lambda), improving scalability, performance by 20%, and fault tolerance.
 - Collaborated in an agile environment, contributing to sprint planning, daily stand-ups, and sprint retrospectives.
 - Developed responsive, high-performance web applications with HTML, CSS, and JavaScript, enhancing UX/UI through modern, cross-browser design principles.
 - Supported back-end development using Spring Boot and object-oriented programming (OOP) for efficient data management and API development.
 - Optimized complex SQL queries using PL/SQL, improving database performance and data integrity. Deployed cloud-based applications on AWS EC2, ensuring scalability and high availability.
 - Gained exposure to Agile development practices, participating in daily stand-ups and sprint reviews.
- Technical Skills:** C, C++, Java, Python, Spring Boot, Node.js, React, Angular, Vue.js, RESTful APIs, SQL, PostgreSQL, MongoDB, Microservices Architecture, Data Structures, AWS, Linux, HTML, CSS, JavaScript, Agile Development, Git, Bootstrap, JQuery

PROJECTS

Prediction of Lung Cancer Detection Using Machine Learning Algorithms

Jan 2022-Jul 2022

Project focuses on early lung cancer detection using machine learning algorithms to analyze medical data.

- Developed ML models with SVM, Random Forest, and Neural Networks, optimizing accuracy through feature selection using Python, TensorFlow, and Scikit-learn.

Applications of Machine Learning in Medical Care

Sept 2021 – Dec 2021

This project leverages AI and machine learning to optimize disease diagnosis, treatment planning, and healthcare efficiency.

- Leveraging machine learning, this project develops predictive diagnostics, disease forecasting, and clinical decision-support using Python, TensorFlow, and Scikit-learn.

Decentralized Exchange Trade Data Collection & Analysis

Jan 2025-March 2025

This project focuses on WETH/USDT trade analysis by comparing DEX prices with Binance and visualizing trading costs.

- Collected WETH/USDT trade data from DEXs using Python and compared prices with Binance and Automated analysis and visualization with Matplotlib.

EDUCATION

Cleveland State University at Cleveland, OH

Aug 2023 – May 2025

Master of Science in Computer Science (GPA: 3.56/4.0)

Relevant Coursework: System Programming, Advanced Computer Architecture, Comparative Programming Languages, Analysis of Algorithms, Operating Systems, Information Security, Data Mining and Machine Learning, and Software Project Management.

Teaching Assistantship – Computer Security (Fall 2024), Intro to Computer Architecture (Spring 2025)

CMR Engineering College, Hyderabad, India

Jul 2018-Jul 2022

Bachelor of Technology in Computer Science (CGPA:6.68/10)

CERTIFICATIONS

- C, Java, Python, SQL (Coursera)
- HTML, CSS, JavaScript, Spring Boot, Git, MySQL, Data Structures, Agile, Bash Scripting, DevOps (Udemy)
- Machine Learning, Data Science, and Generative AI with Python (Udemy)
- Blue Prism (RPA)
- Business English Certificate (BEC)
