

SUMMARY

Business Data Analyst with 5+ years of experience leveraging data analytics, business intelligence, and business analysis to transform complex datasets into actionable insights across healthcare and enterprise environments. Expertise in SQL, Python (Pandas, NumPy), Power BI, Tableau, Snowflake, and Advanced Excel to automate reporting, build interactive dashboards, perform statistical analysis, and optimize business processes. Skilled in data modeling, KPI reporting, stakeholder management, Agile delivery, and business requirements analysis, enabling data-driven decision-making and measurable operational improvements.

TECHNICAL SKILLS

Programming & Analytics: Python (Pandas, NumPy), SQL, Advanced Excel (Power Query, Pivot Tables, XLOOKUP)
Database & Cloud Platforms: SQL Server, Snowflake, PostgreSQL, MySQL, AWS S3, AWS Glue
Data Analysis & Statistics: Exploratory Data Analysis (EDA), Data Profiling, Data Validation, Data Cleansing, Data Interpretation, Statistical Analysis, Root Cause Analysis, Trend Analysis, Forecasting, Cohort Analysis, Funnel Analysis, A/B Testing, Predictive Analytics
Business Intelligence & Visualization: Power BI (DAX, Power Query, Data Modelling), Tableau, Dashboard Development, KPI Reporting, Executive Dashboards, Business Intelligence Reporting, Data Storytelling, Self-Service Analytics
Business Analysis: Requirements Gathering, Business Process Analysis, Gap Analysis, BRD, FRD, User Stories, Requirement Traceability Matrix (RTM), Functional Specifications, Process Mapping, Workflow Analysis
Agile & Project Management: Agile, Scrum, Sprint Planning, Sprint Reviews, Backlog Grooming, User Acceptance Testing (UAT), JIRA, Azure DevOps
Healthcare & Business Domain: Healthcare Claims, Provider & Member Data, HIPAA Compliance, Data Governance, Stakeholder Management

EXPERIENCE

Data Analyst CVS Health, USA	Jul 2025 – Present
- Developed enterprise Power BI dashboards and executive KPI scorecards by integrating healthcare claims, provider, member, and operational datasets from SQL Server, Snowflake, and AWS, reducing reporting turnaround time by 45% while enabling real-time business performance monitoring. - Performed advanced SQL querying, data profiling, exploratory data analysis (EDA), and statistical analysis to identify utilization trends, operational bottlenecks, and business improvement opportunities across healthcare operations. - Automated reporting and ETL workflows using Python (Pandas), SQL, Apache Airflow, and AWS Glue, reducing manual data preparation by 50% while improving reporting accuracy and data quality. - Conducted cohort analysis, funnel analysis, A/B testing, predictive analysis, and forecasting to evaluate member engagement, operational performance, and healthcare outcomes, supporting strategic business initiatives. - Collaborated with business stakeholders, product managers, and data engineering teams to translate business requirements into scalable analytical solutions, improving reporting adoption and executive decision-making. - Designed dimensional data models, optimized SQL queries, and developed self-service Power BI dashboards that improved reporting performance by 35%, enabling faster business insights and executive decision-making. - Implemented automated data validation, reconciliation, and governance processes, improving reporting accuracy by 30% while ensuring HIPAA compliance and enterprise data standards. - Delivered ad hoc analytical reports and executive presentations that supported strategic planning, operational optimization, and data-driven business decisions across multiple healthcare functions.	
Business Analyst Accenture, India	Jan 2022 – Jul 2024
- Gathered, analyzed, and documented business requirements by collaborating with stakeholders, product owners, and technical teams, producing BRDs, FRDs, user stories, and functional specifications for enterprise transformation initiatives. - Performed SQL-based data analysis, data profiling, and exploratory analysis to identify business trends, operational inefficiencies, and process improvement opportunities across multiple business functions. - Developed interactive Power BI dashboards, KPI scorecards, and automated reports that enabled leadership to monitor operational performance and make data-driven business decisions. - Conducted business process analysis, workflow optimization, and gap analysis initiatives, improving operational efficiency by 25% while streamlining enterprise reporting processes. - Created Requirement Traceability Matrices (RTMs), coordinated User Acceptance Testing (UAT), and collaborated with QA and development teams to validate business requirements, reducing production defects by 30%. - Automated recurring business reports using SQL, Python, and Power BI, reducing manual reporting effort by 30% while improving data accessibility and reporting consistency. - Facilitated Agile ceremonies including sprint planning, backlog refinement, sprint reviews, and stakeholder walkthroughs, ensuring successful project delivery and alignment between business and technical teams. - Presented analytical findings and business recommendations to cross-functional stakeholders through interactive dashboards, executive reports, and data-driven presentations, enabling informed decision-making and driving process improvements across business operations.	

PROJECTS

Enterprise Business Intelligence & KPI Analytics Platform

Technologies: *Power BI, SQL, Python, Snowflake*

- Developed an enterprise analytics platform integrating operational, financial, and transactional data into interactive Power BI dashboards, reducing manual reporting effort by 40% while improving executive visibility into critical business KPIs.
- Automated SQL-based reporting, Python data transformation, KPI calculations, and dashboard refresh processes, enabling self-service analytics and improving reporting accuracy across multiple business functions.

Customer Analytics & Forecasting Platform

Technologies: *SQL, Python, Power BI, Tableau*

- Built an end-to-end analytics solution using SQL and Python to perform customer segmentation, cohort analysis, trend analysis, predictive analytics, and forecasting, improving customer retention insights by 25%.
- Designed executive dashboards and automated business reports using Power BI and Tableau, enabling stakeholders to monitor KPIs, identify performance trends, and support strategic planning through data-driven recommendations.

EDUCATION

M.S. in Computer & Information Sciences <i>University of North Texas, Denton, TX, USA</i>	Dec 2025
