## SUMMARY

Software Engineer with experience in software development, backend systems, cloud infrastructure, and software testing. Committed to driving collaborative innovation and building robust, scalable, user-centric solutions to solve complex real-world challenges with a passion for continuous learning along the way.

---

## PROFESSIONAL EXPERIENCE

### MediaTek, San Jose, CA

Aug 2025 - Present

#### Engineer

- Optimized and maintained backend microservices developed in **Java** and **Python**, ensuring scalability and fault tolerance.
- Debugged and resolved software issues in an **Agile** environment, participating in **code reviews** and applying programming knowledge to enhance system reliability and performance.
- Managed **SQL** databases, including schema updates, query optimization, and troubleshooting data inconsistencies for analytics, reporting, and user management.
- Collaborated with cross-functional teams including QA, product, and frontend engineers to implement fixes, enhance features, and maintain system stability.
- Streamlined support procedures by documenting processes, creating troubleshooting guides, and managing tasks using **JIRA** ticketing system, improving team efficiency.
- Containerized applications using **Docker** and orchestrated deployments with **Kubernetes**, enabling consistent environments, efficient scaling, and simplified DevOps workflows.

### CareDx, San Diego, CA

June 2025 – Aug 2025

#### Software Engineer

- Maintained microservices for healthcare diagnostics platforms using **Java Spring Boot** and **Python**, focusing on scalability and reliability in production environments.
- Developed and maintained **RESTful APIs** and designed responsive user interfaces using **React** and **JavaScript**.
- Managed **PostgreSQL** database, designing schemas and writing complex queries for data analytics, user management, and real-time diagnostics reporting.
- Used **Git** for version control and participated in code reviews and **CI/CD pipelines**, ensuring high-quality, well-tested, and maintainable code.

### Eye Space AI, Palo Alto, CA(Remote)

May 2024 –May 2025

#### Software Engineer Intern

- Designed and implemented RESTful microservices with **FastAPI**, enabling reliable communication across distributed components.
- Integrated machine learning models for **anomaly detection** and **predictive analytics**, enhancing data-driven decision-making.
- Built event-driven architectures using **Kafka**, **AWS Lambda**, **SNS**, and **SQS** for real-time data streaming and processing.
- Deployed and managed containerized services with **Docker** and **Kubernetes**, streamlining CI/CD pipelines for automated builds and deployments.
- Collaborated in Agile teams, contributing to backend design reviews, performance tuning, and scalable cloud-based solutions.

### Georgia State University, Atlanta, GA

Aug 2022 –May 2024

#### Graduate Intern–Full Stack Engineer

- Designed and implemented a microservices-based web application using **Java**, **Spring Boot**, **SQL Server** managing data for 7,500+ students and 25,000+ entries efficiently.
- Deployed services on AWS infrastructure, including **EC2** for compute, **S3** for storage, **RDS** for database management, and **CloudWatch** for performance monitoring, achieving a 50% reduction in manual deployment time.

Kreeda Labs, Pune, India

Nov 2020–June 2022

Software Development Engineer

- Developed a scalable application using **Java** and **Spring Boot**, serving 500+ daily active users and handling 1,000+ requests daily, ensuring high availability and performance.
- Developed and maintained RESTful APIs and designed a responsive UI using **ReactJS** and **Bootstrap**, enhancing user experience, improving backend efficiency, and increasing application reliability by 40% while boosting customer retention by 15% through seamless integration and robust **JUnit** testing.
- Spearheaded database optimizations, reducing query execution time by 30%, and leveraged **MongoDB** for scalable, efficient **NoSQL data** storage and management.
- Executed unit, functional and performance tests using **JUnit**, significantly reducing bugs and ensuring stable and reliable deployments.

Indicus Software, Pune, India

Nov 2019 –March 2020

Software Engineer Intern

- Worked on a logistics management application using **Spring Framework** and **TypeScript**.
- Assisted in developing and managing RESTful APIs for smooth communication between frontend and backend systems using Spring Boot and JSON-based data exchange.
- Tested and debugged APIs using **Postman** and **Swagger**, ensuring reliable performance, accurate responses, and seamless data integration across services.

---

## SKILLS

**Languages:** Python, Java, C++, JavaScript, TypeScript

**Databases:** MySQL, MongoDB, Firebase

**Platforms:** AWS, Azure, GCP

**Tools:** Docker, Kubernetes, Jenkins

---

## ACADEMIC PROJECTS

### LLM-Powered Medical Chatbot for Symptom Analysis and Patient Queries

- The chatbot uses BioBERT, a medical LLM model, to answer patient queries and provide symptom- based insights.
- The backend is built using FastAPI and deployed on AWS Lambda, with API Gateway handling secure, real- time processing of medical queries and symptom analysis. The front end is developed with React.js and hosted on AWS S3 + CloudFront, providing a fast, scalable, and user-friendly interface for medical consultations.

[BioBERT, FastAPI, Python, PyTorch, Transformers, AWS Lambda, API Gateway, React.js, AWS S3, AWS CloudFront, MIMIC-III Dataset, Pandas, DynamoDB]

### Ticket Reservations System

- Developed and maintained a scalable backend using Java Spring Boot, JDBC, and SQL Server, designing RESTful APIs for ticket booking, user authentication, seat management, and payment processing with optimized SQL queries and transaction management to ensure data consistency and high availability.
- Built a dynamic and responsive frontend using React and JavaScript, implementing real-time seat selection, booking status updates, and form validation, while integrating seamlessly with backend services to deliver a smooth and secure user experience. [Java Spring Boot, SQL, ReactJS, JavaScript]

---

## EDUCATION

**Master of Science: Computer Science**

Georgia State University (GPA:4/4)

**August 2022 – May 2024**

Atlanta, GA

**Bachelor of Engineering: Computer Engineering**

University of Pune (GPA: 9/10)

**June 2016–May 2020**

Pune, India

---

## CERTIFICATIONS

[AWS Certified Cloud Practitioner certificate](#) , [AWS Certified Solutions Architect -Associate certificate](#)
