

Priyanka Nayudu
Data Analyst

Email: priyankanayudu06@gmail.com **LinkedIn:** www.linkedin.com/in/priyanka-nayudu **Mobile:** +1 (980) 361-0033

SUMMARY:

Data Analyst with 3+ years' experience in data design, dimensional modeling, and building analytics frameworks that drive operational and product performance. Expertise in translating complex business requirements into robust data objects and scalable reporting. Proficient in SQL, Python, ETL/ELT pipelines, and advanced data quality validation frameworks. Proven ability to collaborate across engineering and analytics teams, leveraging mandatory tools like Power BI, JIRA, and Hadoop/Spark to deliver high-quality, governed data assets. Optimized data processing and enhanced data quality, reliability, and operational performance by up to 40%.

TECHNICAL SKILLS:

-
- **Programming & Scripting Languages:** Python, C#, Java, R, Go, C++
 - **Libraries:** Pandas, NumPy
 - **Data Visualization Tools:** Matplotlib, Seaborn, Tableau, Power BI, Amazon QuickSight, Excel
 - **Databases & Data Warehousing:** SQL, MySQL, PostgreSQL, Snowflake, MongoDB, Azure Synapse Analytics, Oracle, SQL Server
 - **Machine Learning & AI:** Scikit-learn, TensorFlow, PyTorch, XGBoost, NLP, LLMs, Feature Stores, Batch Inference, Model Pipelines, Hugging Face, LangChain
 - **ETL & Data Orchestration:** Azure Data Factory, Apache Airflow, Informatica, Azure Step Functions, Azure Event Grid, Iceberg tables, Parquet
 - **Big Data Technologies:** Hadoop, PySpark, HDFS, MapReduce, Spark, Kafka, Azure Event Hubs, HDInsight
 - **Cloud Platforms & Services:** Azure, Azure Blob Storage, Azure Data Factory, Azure Synapse Analytics, Azure Functions, Azure Machine Learning, Athena, Azure Event Grid, Azure Active Directory, Microsoft Azure, Google Cloud Platform
 - **DevOps & CI/CD Tools:** Terraform, Jenkins, GitHub Actions, Azure Pipelines, Docker, Maven, Kubernetes, Git, GitHub
 - **Software Architecture & Development:** Microservices Architecture, API Design, Automation, System Optimization, Agile, TDD, Jira
 - **Logging & Monitoring:** ELK, Prometheus
 - **IDE & Development Tools:** VS Code, PyCharm, Jupyter Notebook

PROFESSIONAL EXPERIENCE:

Client: Vanguard, USA

June 2024-Present

Role: Data Analyst

Technologies: Azure Data Factory, Apache Spark, Azure Event Hubs, Azure Blob Storage, PySpark, Azure Synapse Analytics, Azure Monitor, Apache Airflow, MongoDB

- Designed and deployed ETL solutions to process 50M+ investment records daily, specifically monitoring key operational performance indicators (KPIs) and improving data accessibility by 30%.
- Developed ingestion frameworks supporting both batch and real-time data flows from diverse financial systems using Azure Event Hubs and Azure Blob Storage, minimizing ingestion delays.
- Optimized data transformation logic in PySpark, enhancing the data design/dimensional models in Azure Synapse Analytics for a 35% gain in query performance.
- Integrated NoSQL platform (MongoDB) for managing complex financial metadata and semistructured investment data, enabling flexible schema design and improving data modeling agility.
- Collaborated with an 8-member engineering team to build and maintain a reliable, compliant data platform spanning the full pipeline lifecycle.
- Implemented automated validation frameworks and monitoring via Azure Monitor/Airflow to ensure high data quality, governance, and SLA adherence, increasing operational efficiency by 25%.

Client: Aplica Technologies, Bengaluru

Oct 2022-Aug 2023

Role: Data Analyst

Technologies: Python, SQL, Azure Data Factory, Azure, Machine Learning, ETL Pipelines, Data Modeling, Data Ingestion, Data Transformation, MongoDB

- Developed automated ETL pipelines for insurance datasets using Python, SQL, and Azure Data Factory, supporting regulatory compliance and reducing manual data handling by 40%.
- Optimized large-scale data ingestion and transformation workflows across multiple business units, increasing data readiness for analytics by 35%.
- Leveraged NoSQL (MongoDB) for flexible schema storage of semi-structured insurance datasets, optimizing read/write performance for high-throughput ingestion use cases.
- Designed scalable dimensional models and enhanced SQL query performance, significantly improving reporting speed and efficiency for operational teams.
- Collaborated with cross-functional analysts and engineering teams in an Agile/JIRA environment to deliver end-to-end reporting solutions, enabling clearer executive insights.
- Implemented machine learning models from initial development through deployment on Azure VMs, integrating prediction outputs into production data pipelines.

Client: Team-Up, India **July 2022-Oct 2022**

Role: Analytics Engineer

Technologies: Python, SQL, Azure Data Factory, Azure Stream Analytics, Azure ML

- Constructed automated ETL pipelines for user activity and transaction data, reducing manual processing time by 35% using Python, SQL, and Azure Data Factory.
- Implemented real-time analytics pipelines using Azure Stream Analytics, improving data freshness and enabling faster insights.
- Determined data quality and duplication issues in legacy systems by implementing validation scripts and anomaly detection, increasing accuracy by 28%.
- Deployed machine learning models on Azure ML to predict user behavior and transaction patterns, improving personalized recommendations and operational efficiency.

PROJECTS:

Fraud Shield

- Real-time fraud detection framework built for production ML serving. Kafka Streams + feature store + model serving layer; sub-100ms inference latency. Demonstrates end-to-end ML pipeline from feature engineering to live scoring.

LLM Eval Toolkit

- CI-integrated evaluation framework for LLM applications. Supports custom metrics (faithfulness, context relevance, groundedness), semantic regression testing, and GitHub Actions integration. Implements responsible AI practices with multi-dimensional quality assessment rather than singlescore evaluation.

EDUCATION:

Master of Science in Computer Science

University of Central Missouri, USA

Bachelor of Technology in Computer Science and Engineering

Chalapathi Institute of Engineering and Technology, India
