

Professional Summary

Data Engineering professional with extensive experience in designing, building, and optimizing data pipelines, ETL processes, and data integration systems. Expertise in Snowflake, Redshift, Aurora, Presto, and relational databases. Proficient in Microsoft Azure Machine Learning, Python, and SQL. Adept at data modeling, business analysis, and process improvement to drive data-driven decisions and enhance operational efficiency.

Skills

- **Programming & Scripting:** SQL, Python, Java, Bash
- **Data Engineering Tools:** Apache Spark, Kafka, Hadoop, Airflow, Big Query, Presto
- **Cloud Platforms:** AWS (EC2, S3, Redshift), GCP, Microsoft Azure Machine Learning
- **Databases:** Snowflake, Aurora, MongoDB, MySQL, PostgreSQL
- **Data Visualization:** Tableau, Power BI, Data Cleaning & Wrangling
- **Other Skills:** ETL, Data Warehousing, Data Modelling, Data Pipelines, Git

Professional Experience Data Engineer Intern

Vanguard | Flag town, NJ (Remote) | July 2024 – Present

- Developed scalable data pipelines using Apache Spark and Airflow to enhance ETL processes.
- Implemented advanced SQL queries and optimized relational database systems for seamless data integration. • Collaborated with data scientists to deploy machine learning models on Microsoft Azure Machine Learning, improving customer prediction accuracy by 15%.
- Designed Power BI dashboards to visualize data metrics, increasing pipeline transparency by 20%.

Data Analyst Deloitte | India | May 2022 – Aug 2023

- Optimized ETL workflows, reducing processing times by 30% through efficient data pipeline engineering using Snowflake and Presto.
- Conducted data extraction and transformation with Python and SQL to generate actionable insights.
- Built interactive Tableau dashboards to aid strategic decision-making for cross-functional teams.
- Enhanced customer targeting strategies through collaborative business analysis, improving engagement rates.

Data Intern Deloitte | India | Feb 2022 – Aug 2022

- Cleaned and processed large datasets for key analytics projects using SQL and Python.
- Supported senior engineers in data modelling and data pipeline development, gaining hands-on exposure to Big Data tools like Hadoop and Apache Spark.
- Participated in workshops to deepen understanding of data analysis, ETL, and relational database design.

Projects

- **Automated Data Processing Pipeline:** Designed a Python-based data pipeline integrated with Snowflake, achieving a 50% reduction in processing time.
- **Customer Segmentation:** Developed segmentation models with Big Query and Tableau, enhancing marketing efforts with a 15% increase in ROI.
- **US Cancer Cases Visualization:** Created visual analytics dashboards to uncover trends and correlations, improving decision making for stakeholders.

Education

- **Master of Science in Business Intelligence & Analytics** - Dec 2024

Stevens Institute of Technology – Hoboken, NJ

- **Bachelor of Arts in Computer Science** – July 2022

Osmania University – Hyderabad, India
