About Me

Data Scientist & Analytics Specialist with 1.8 years' experience in **predictive analytics**, **knowledge graph research**, and **automation**. Delivered **20%+ accuracy gains** in forecasting and built **ML models** (RotatE, NLP, regression) and **dashboards** (Power BI) driving measurable business impact.

Experience

Graduate Research Assistant, Shepherd Center, Georgia State University – Atlanta, GA Jan 2025 – May 2025

- Performed predictive analytics on patient recovery data using **Python**, **SQL**, and **statistical modeling**, improving forecast accuracy by 20%.
- Built Power BI dashboards for weekly recovery trends to aid clinician decision-making and resource planning.

Graduate Research Assistant, Dell, Georgia State University – Atlanta, GA Aug 2024 – Dec 2024

- Conducted **research on knowledge graph embeddings** using the **RotatE model** in **PyTorch** to enhance **link prediction** capabilities for large-scale datasets.

Software Engineer, FireFlink – Bengaluru, India Aug 2022 – Jul 2024

- Automated large-scale data validation workflows (**Java**, **Selenium**) to ensure clean datasets for analytics pipelines, reducing errors by 30%.
- Integrated automated data quality checks into reporting systems, cutting validation time by 50% and improving reporting accuracy.

Education

Georgia State University, J. Mack Robinson College of Business Aug 2024 – Dec 2025
MS in Data Science and Analytics

- GPA: 3.9/4.0

Visvesvaraya Technological University Aug 2018 – May 2022
BE in Information Science and Engineering

- GPA: 7.5/10.0

Projects

EduMentor: AI-Powered Adaptive Learning 

- Built a GenAI learning platform delivering personalized quizzes, adaptive recommendations, and real-time knowledge graphs to improve engagement.
- Tools:** GPT-4, SerpAPI, NetworkX, Streamlit, PyVis

RotatE: Learning Relational Patterns for Knowledge Graph Embeddings 

- Implemented the RotatE model to enhance link prediction in large-scale knowledge graphs; optimized embeddings for search and recommendation.
- Tools:** Python, PyTorch, NumPy, Matplotlib

Technologies

Programming & Databases: Python, SQL, Java, MongoDB, NoSQL

Analytics & Visualization: Power BI, Tableau, Matplotlib, Seaborn

Machine Learning: Scikit-learn, Regression, Neural Networks, NLP, LLMs, RAG, Generative AI, Knowledge Graphs

Automation & Other: Selenium, Appium, TestNG, Data Wrangling, Predictive Analytics, Dashboard Development
