

RANGA SAI PALADUGU

Data Analyst

Missouri, USA | +1 314-220-9329 | rangasaipaladugu@gmail.com | www.linkedin.com/in/ranga-sai-paladugu

PROFESSIONAL SUMMARY

Data Analyst with **2+ years of experience** transforming complex healthcare and e-commerce datasets into actionable business insights that improve operational efficiency, optimize reporting accuracy, and support strategic decision-making. Experienced in analyzing large-scale structured and unstructured datasets, developing executive dashboards, automating reporting workflows, and delivering KPI-driven analytical solutions using **SQL, Python, Tableau, Power BI, AWS, Databricks, Snowflake, and Excel**. Proven ability to partner with business stakeholders, define analytical requirements, perform statistical and trend analysis, develop predictive models, and translate complex business problems into data-driven recommendations that improve organizational performance.

TECHNICAL SKILLS

Languages & Querying

SQL (Advanced), Python (Pandas, NumPy), Spark SQL

Business Intelligence

Power BI (DAX), Tableau, Excel (Pivot Tables, Power Query, XLOOKUP, VLOOKUP)

Data & Analytics

ETL/ELT Pipelines, Data Warehousing, Data Modeling, Data Validation, KPI Reporting, Dashboard Development, Business Intelligence

Databases & Cloud

Snowflake, Databricks, AWS (S3, Redshift, Glue), PostgreSQL, MySQL

Tools

Apache Spark, Jira, Git, Agile/Scrum

Collaboration

Stakeholder Management, Business Analysis, Agile/Scrum, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Data Analyst | Cigna Healthcare — Missouri, USA

Nov 2024 – Present

- Analyzed and transformed **10M+ healthcare claims, enrollment, and operational records** using SQL and Python to uncover trends, improve reporting accuracy, and support executive decision-making.
- Designed, developed, and maintained **15+ executive Power BI dashboards** tracking operational KPIs, claims performance, workforce utilization, service metrics, and organizational performance.
- Partnered with business stakeholders, operations teams, and leadership to gather reporting requirements, define KPIs, and translate business objectives into scalable analytical solutions.
- Automated recurring reporting workflows using SQL, Python, and ETL processes, reducing manual reporting effort by **40%** while improving reporting consistency and efficiency.
- Performed enterprise-wide data validation, cleansing, reconciliation, and quality assurance across multiple healthcare data sources to ensure accurate and reliable reporting.
- Optimized SQL queries, reporting logic, and analytical workflows, reducing dashboard response time and reporting turnaround by **25%**.
- Conducted trend analysis, forecasting, and operational performance analysis to identify improvement opportunities, support workforce planning, and enable proactive decision-making.
- Analyzed healthcare claims, enrollment, provider, and operational datasets to identify business trends and deliver actionable recommendations to leadership.
- Developed standardized KPI definitions, reporting documentation, and governance practices to improve consistency across enterprise reporting.
- Leveraged Snowflake, Databricks, and AWS environments to support scalable analytics, data integration, and reporting workflows.
- Presented analytical findings, dashboard insights, and strategic recommendations to business leaders, enabling data-driven operational improvements.
- Collaborated within Agile teams using Jira, participating in sprint planning, backlog refinement, and cross-functional project delivery.

Data Engineer | Flipkart — India

Jul 2022 – Jul 2023

- Analyzed **50M+ daily customer, sales, inventory, and operational records** using SQL and Python to generate actionable insights supporting business growth and operational planning.
- Developed interactive Power BI and Tableau dashboards enabling business users to monitor sales performance, customer behavior, inventory utilization, and operational KPIs.
- Partnered with product managers, business analysts, and engineering teams to gather business requirements and deliver scalable analytical solutions aligned with organizational goals.
- Designed and automated ETL pipelines using SQL, Python, and Apache Spark to process large-scale enterprise datasets and improve data accessibility for reporting.
- Performed enterprise data profiling, cleansing, validation, reconciliation, and quality assurance to improve data reliability and reporting accuracy.
- Optimized SQL queries and Spark processing workflows, reducing ETL execution time by **30%** and improving reporting performance.
- Built reusable analytical datasets and reporting models enabling self-service business intelligence and faster decision-making.
- Conducted customer behavior analysis to identify purchasing trends, engagement patterns, and product performance insights that informed business strategy.
- Supported forecasting and demand planning by analyzing historical sales data and developing data-driven business recommendations.
- Integrated structured and semi-structured enterprise data from multiple business systems into centralized analytical datasets.
- Automated manual reporting processes using SQL and Python, significantly improving analyst productivity and operational efficiency.
- Collaborated with cross-functional stakeholders to communicate analytical findings, recommend process improvements, and support strategic initiatives

EDUCATION

Master of Science in Information Science and Technology — *Missouri University of Science and Technology* | May 2025

Bachelor of Technology in Electronics and Communication Engineering — *Joginpally B R Engineering College* | May 2022
