Education

Bellevue College, Bachelor of Science in Computer Science

2023

Skills

Java, JavaScript, Python, C++, SQL Database, MongoDB, HTML, CSS, RESTful API, AWS, GitHub

Projects

Android app for vacation planning

- Capstone project aiding travelers in vacation planning
- Features authentication, flight, and hotel search functionalities

Technology used: Java, SQL database, Firebase, Rapid API, and Git.

Pong Hosting: Web-Based Game Platform

- Dashboard page for game selection upon login
- Scoreboard for saving and displaying high scores
- Users can select games from the dashboard
- Scores are recorded on the scoreboard with usernames if they surpass previous scores

Technology used: Javascript, HTML, CSS, PHP, SQL, and Git.

Information system for the Clean and Go

- Database project for Clean & Go shop
- Tracks daily collections, monthly expenses, revenues, manages employee schedules, and monitors equipment maintenance

Technology used: Javascript, SQL.

Cloud computing License plate

- Utilizes cameras at road intersections for traffic violation capture
- Bills drivers for violations at traffic lights
- Internet-enabled cameras communicate with cloud infrastructure
- Enhances efficiency in traffic regulation monitoring and enforcement

Technology used: AWS Recognition service, S3 bucket, Lambda function, and PostgreSQL relational database.

Monitoring and Alarm System

- Developed temperature and humidity monitoring system with Arduino
- Buzzer alerts when humidity exceeds 85%
- Clock freezes upon alert

Technology used: Arduino developer kit, C++.

Leadership

Led successful academic projects, effectively managing timelines, teams, and challenges to achieve on-time delivery.
