

SUMMARY

Proactive Business Analyst with over 3 years of experience in driving process improvements, gathering and analyzing requirements, and delivering data-driven solutions across Agile and Waterfall environments. Skilled in creating BRDs, FRDs, UML models, and user stories while collaborating with cross-functional teams to bridge business needs with technical solutions. Proficient in SQL, data modeling, and visualization tools, with hands-on expertise in conducting UAT, GAP analysis, and workflow optimization. Adept at translating complex requirements into actionable insights, streamlining processes, and supporting successful project delivery.

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, Seaborn, Scikit-Learn, Matplotlib), C, C++, R (basic)

Databases: SQL, MySQL, MongoDB

Analytical Tools: Tableau, Microsoft Power BI, JMP, SAS Studio, SAS Enterprise Miner

Project & Collaboration Tools: Jira, Confluence, Trello, MS Office Suite (Excel, Word, PowerPoint, Outlook), MS Visio, Lucid chart

WORK EXPERIENCE

Adani Power Limited – Gujarat, India | Business Intelligence Analyst

Aug 2022 – Dec 2023

- Developed and maintained dynamic Power BI dashboards to monitor plant performance, fuel efficiency, and energy output across multiple generation units.
- Translated complex operational data into clear visual insights, enabling leadership to make faster, data-backed decisions on cost optimization and resource allocation.
- Designed and executed SQL-based data models to integrate information from SAP, Oracle, and IoT systems, ensuring consistency and reliability across reporting layers
- Led the automation of recurring reports, reducing manual effort by 40% and improving delivery timelines for compliance and performance reviews.
- Collaborated with engineering and finance teams to align KPIs with regulatory standards and internal benchmarks, driving transparency and accountability.
- Designed data process flows, ETL mappings, and KPI definitions, enabling stakeholders to align metrics with business objectives.
- Supported ad-hoc analysis requests by preparing deep-dive reports and visualizations, empowering decision-makers with actionable intelligence.

Cognizant Solutions – Telangana, India | Associate Data Analyst

Aug 2021 – Jul 2022

- Collaborated Acted as the primary liaison between business stakeholders and technical teams, ensuring requirements were clearly defined, documented, and delivered on time.
- Conducted GAP analysis and workflow assessments to identify inefficiencies and recommended technology enhancements that improved operational processes.
- Produced use case diagrams, sequence flows, and process models in MS Visio to communicate business needs in a structured manner.
- Partnered with QA teams to validate system outputs against requirements, creating traceability matrices and reviewing test cases for accuracy.
- Delivered requirement specification documents, presentations, and reports that streamlined communication and guided project execution.
- Participated in JAD and sprint planning sessions, contributing to agile delivery and improved requirement prioritization.

Shoshin Solutions – Telangana, India | Data Analyst Intern

Jan 2021 – Jul 2021

- Built and maintained Power BI dashboards and Excel reports that provided real-time visibility into project performance, financials, and KPIs.
- Developed and optimized SQL queries to extract, transform, and validate data, ensuring high accuracy and consistency across diverse reporting platforms.
- Analyzed large datasets to uncover patterns, trends, and anomalies, producing insights that improved forecasting and operational efficiency.
- Partnered with cross-functional teams during UAT cycles, validating dashboards and data outputs against live production data.
- Supported leadership with weekly and monthly reports, helping them stay on top of performance and compliance.

EDUCATION

Master of Science in Business Analytics and Project Management
University of Connecticut, School of Business – Hartford, CT

Jan 2024 - Present
GPA 3.86 / 4.00
