DATA ANALYST | SQL, EXCEL & BI TOOLS

M.S. Data Science graduate with SQL, Excel (pivot tables, formulas), and Power BI/Tableau experience, plus statistical analysis skills from independent forecasting projects. Comfortable automating recurring reports and monitoring KPIs across cross-functional teams.

TECHNICAL SKILLS

Analysis & BI: SQL, Python, R, Microsoft Excel, Power BI, Tableau, Matplotlib, Seaborn, exploratory data analysis, data cleaning, statistical analysis, reporting

Machine Learning: scikit-learn, TensorFlow/Keras, PyTorch, classification, regression, clustering, NLP, time-series forecasting, feature engineering, cross-validation, model evaluation

Data & Development: PostgreSQL, MySQL, SQLite, MongoDB, Pandas, NumPy, REST APIs, Spark/PySpark, Git, Jupyter, Java, JavaScript, React

EXPERIENCE

Software Developer Intern | Alifsystems | Mumbai, India | May 2025 – Aug 2025

- Refactored Java/JSP administrative workflows into reusable components, implemented CSP-compliant patterns, removed unsafe inline handlers, and supported MSAL.js authentication for secure enterprise applications.
- Investigated defects, implemented and regression-tested production fixes, participated in code reviews and Agile sprints, and documented technical changes and troubleshooting procedures for maintainability.

Full Stack Developer Intern | NullClass | Mumbai, India | May 2022 – Aug 2022

- Developed responsive React and Tailwind CSS components for a question-and-answer platform and integrated REST API data into user-facing workflows.
- Debugged interface and accessibility issues, tested application behavior, and collaborated with team members to translate requirements into maintainable features.

SELECTED PROJECTS

Human vs. LLM Text Classification | Spring 2025

Python, DistilBERT, scikit-learn, NLP, Streamlit

- Built a text-classification workflow on more than 788,000 records using TF-IDF models, DistilBERT, feature engineering, cross-validation, and held-out evaluation; achieved approximately 88% accuracy.
- Investigated failure modes with confusion matrices, token occlusion, lexical-diversity and readability analysis, and qualitative error review; created an interface for repeatable inference and evaluation.

Page-Aware Retrieval-Augmented Generation | Summer 2026

Python, PyMuPDF, BM25, FAISS, BGE Embeddings, FLAN-T5

- Processed technical documents into page-aware chunks, combined BM25 and FAISS retrieval with BGE embeddings and optional reranking, and generated grounded answers with source-page references.
- Added retrieval-quality evaluation, configurable chunking, and CPU/GPU fallback to improve reproducibility and support systematic comparison of retrieval settings.

Netflix Stock Price Forecasting | Fall 2024

Python, TensorFlow, GRU/LSTM, ARIMA, Time-Series Analysis

- Created an OHLCV preprocessing pipeline with scaling and sliding-window sequences; compared GRU and LSTM models with an ARIMA baseline using chronological train/test splits.
- Evaluated held-out predictions with MAE, RMSE, and R^2 and visualized predictions, residuals, and error trends to compare model behavior over time.

EDUCATION

M.S., Data Science | Montclair State University | Montclair, NJ | Dec 2025 | GPA: 3.43/4.00

B.E., Computer Engineering | M.H. Saboo Siddik College of Engineering | Mumbai, India | May 2024 | GPA: 3.44/4.00

CERTIFICATION & LEADERSHIP

IBM Generative AI – Elevate Your Data Science Career | Coursera | Team Lead, Smart India Hackathon 2023 – led a six-member team to 16th place among 80+ district teams
