WORK EXPERIENCE

FIS Global

Jacksonville, Florida

IAM Engineer:

May 2023- Present

- Proficient in **managing users, access provisioning, entitlement assignments**, and **user profile** creation to ensure secure and efficient identity operations.
- Successfully executed **Inbound SSO** project Single Sign-On (SSO) (SAML, OIDC, SWA) include SP initiated and IdP initiated SSO integrations between our Infinity IdP and client IdPs, supporting over 10 financial institutions, including detailed configurations and troubleshooting.
- Experienced in analyzing expertise in **Splunk logs analysis and outage resolution** to identify root causes and derive solutions during client-side system outages, ensuring minimal downtime.
- Coordinated with multiple stakeholders for SSO setup, ensuring seamless user authentication for high-security environments.
- Hands-on experience on our home-grown application **Infinity IdP** in managing and maintaining proprietary identity solutions, enhancing system reliability and user accessibility.
- Assist IAM operation teams during **incident response or business continuity** scenarios
- Generated and managed certificates, ensuing **certification expiration tracking and renewal**.
- Educate and train staff on identity and access management best practices.
- Delivered tailored IAM solutions for over 10 banking clients, meeting security and **PCI compliance** standards.
- Partnered with teams and clients to address configuration issues, optimize identity workflows, and maintain operational excellence.
- Skilled in system setup, global settings, and comprehensive application configuration for identity management.
- Responsible for implementing **controls and securing enterprise information systems** by developing, testing and reviewing identity requirements and technology solutions.
- Development experience with **scripting languages** as well as automation frameworks for IGA.
- Experience with consuming **API endpoints** using tools like **Postman** and natively from code.
- Participate and validate security **intelligence and assess solutions** around identity and access management tools.
- Validate infrastructure and other reference architectures for security best practices and recommend changes to enhance identity and access management or security and reduce risks.
- Resolved client issues by effectively managing and troubleshooting **Customer Support (CS) tickets**, ensuring timely and accurate resolutions.

Soho Automation

Kathmandu, Nepal

Data Engineer:

Mar 2021- Jul 2022

- Designed and developed SQL queries to extract, manipulate, and analyze data from large datasets.
- Automated the entire process of data extraction, data processing and report generation using python using libraries such as panda and NumPy.
- Actively Participated in performance Tuning, Client/server Connectivity, Query Optimization, running database consistency check with DBCC commands.
- Developed Python Scripts that interact with a third-party software’s API to extract and process data.

PROJECTS

Inbound SSO FIS Global

- Configured Infinity IdP to accept **supported tokens**, enabling **seamless authentication** for client users without requiring credentials sharing with FIS.
- Integrated Client identity providers like **Microsoft Entra, PingFederate** and **Okta** with FIS application using SAML 2.0 and OpenID connect protocols.
- Designed and implemented **SP-initiated** and **IdP-initiated SSO** integrations between Infinity IdP and client IdPs, supporting over **10 financial institutions**.
- Conducted detailed **configurations, troubleshooting**, and ensured seamless SSO functionality for diverse client environments.
- Performed **mass user onboarding** through scripting for firms without IdP integration, optimizing bulk user import processes.
- Created and managed **user profiles, department** and **authorization**, customized **email templates**, and implemented **REST API** calls for session management, scripting abilities and automation.
- Supported integration of **Service Providers** (SPs) within client firms, ensuring smooth onboarding of users.
- Delivered technical support and guidance to client teams, ensuring successful SSO implementation and adherence to security protocols.
- Generated and managed certificates, ensuing **certification expiration tracking and renewal**.
- Monitored and analyzed **Splunk logs** to identify and resolve system issues during troubleshooting.

IBS Modernization Project FIS Global

- Implemented PCI compliance by transitioning login access for the IBS application from **legacy user credentials** to **modern credential**.
- Implemented **legacy client** users to utilize modern credentials ensuring secure authentication standards.
- Create and Managed IBS modernization user profiles and ensuring accurate access management and identity governance.
- Conducted **mass user imports** for onboarding users in modern credentials using scripting abilities.

IOE Thapathali campus, Tribhuvan University

Programming Co-instructor:

Led a month-long Django workshop, teaching python, HTML, CSS and Django Framework Fundamentals.

Designed interactive activities and hands-on-projects to foster student engagement and participation which later increased student participation rate by 20%

Administered successfully and facilitated a learning program, consistently achieving a remarkable 100% student satisfaction rate.

Kathmandu, Nepal

Feb 2021 - Mar 2021

LEADERSHIP/ACHIEVEMENT

Program Co-Ordinator, TU

Coding Universe

Coordinated Coding Universe program, orchestrating engaging coding sessions and activities that captivated and empowered over 100 students.

Collaborated with 5+ instructors providing comprehensive training in coding and competitive programming techniques to ensure successful event execution.

Kathmandu, Nepal

Aug 2020 - Sep 2020

ACADEMIC RESEARCH AND PROJECTS

Monoaural Multi-speaker Speech Separation, Advisor: Assoc. Prof Shanta Maharajan

A novel approach to change the use of attention-based Transformers in single-channel speech separation.

Streamlined speech separation model by integrating the novel Perceiver Architecture.

Collaborated with a group of 4-course mates to review code and manage GitHub repositories, fostering a culture of continuous improvement and teamwork.

Handwritten Devanagari Character Recognition Using Deep Neural Network

Modified and trained high-accuracy CNN model for recognizing handwritten Devanagari character.

Clarified 5 gigabytes of training data and validation data using python libraries NumPy, SciKit-Learn, and Pandas.

SKILLS INDEX

Languages: Python,Java,C,C++

Databases: Microsoft SQL Server

Framework: Infinity IdP, SailPoint, Splunk, Okta, Microsoft Entra, Rest API, Active directory, LDAP, Microsoft Azure, NumPy, VSCode, Postman, Excel, SSIS,ServiceNow

Soft Skills: Adaptability, Time Management, Communication, Flexibility

EDUCATION:

IOE Thapathali Campus, Tribhuvan University (TU), Kathmandu Nepal

Bachelor in Computer Engineering

Graduation: 2023
