

Teja Bolineni

Business Intelligence Analyst

Bollineni.tejasri@gmail.com | [Linkedin](#) | (626) 696 - 6267 | Dallas, TX

Business Intelligence Analyst with 6+ years of experience in dashboard development, business reporting, SQL-based data analysis, and KPI tracking across e-commerce and consulting environments. Proficient in building Power BI and Tableau dashboards, writing SQL queries, creating DAX measures, using Power Query for data preparation, and applying Python/Pandas for data cleaning and reporting automation. Demonstrated success in supporting 15+ stakeholders, replacing 6+ manual reports, delivering 20+ reporting enhancements, and reducing weekly reporting effort by 8–10 hours through structured analysis, Excel automation, Tableau Server reporting, and self-service BI solutions.

PROFESSIONAL EXPERIENCE

Business Intelligence Analyst | Amazon

Nov 2022 – Present

- Simplified SQL queries using joins, CTEs, and window functions to analyze large operational datasets, improving recurring report preparation efficiency by 35%.
- Built interactive BI dashboards to track weekly business KPIs, operational trends, performance gaps, and exception areas, replacing 6+ manual recurring reports.
- Created DAX measures and Power Query transformations to standardize KPI calculations, automate data preparation, and improve dashboard consistency for business users.
- Automated AWS Redshift, S3, Athena, and QuickSight for reporting support, data access, and business dashboarding in a cloud-based analytics environment.
- Partnered with 15+ cross-functional stakeholders to define KPI logic and convert business needs into dashboard views and scorecards.
- Processed sales, inventory, operational, and process performance trends to identify reporting gaps, highlight business risks, and support weekly leadership reviews.
- Maintained data validation checks, reporting documentation, and dashboard refresh processes to improve accuracy, reduce discrepancies, and support self-service BI adoption.

Business Intelligence Analyst | Accenture

Nov 2018 – Feb 2021

- Extracted, cleaned, and generated business data using SQL, T-SQL, and Excel, improving recurring report turnaround time by 30% for stakeholder reporting.
- Designed Tableau dashboards for 15+ business stakeholders, enabling self-service access to KPIs, performance trends, and operational reporting insights.
- Performed Power Query, Pivot Tables, and Excel formulas to prepare, validate, and summarize large datasets for weekly and monthly business review reports.
- Coordinated data preparation and workflow automation using Alteryx, helping consolidate 2M+ records into structured datasets for reporting and analysis.
- Collaborated with cross-functional teams to gather reporting requirements, document dashboard specifications, and deliver 20+ reporting enhancements in an Agile environment.
- Analyzed web and campaign performance using Google Analytics and Excel, identifying funnel trends and contributing recommendations that improved conversion performance by 18%.

PROJECTS

Sales and Inventory Performance Dashboard

- Established a Power BI dashboard to track revenue, order volume, inventory availability, product movement, and category-level performance, helping stakeholders identify underperforming products and replenishment needs.
- Created DAX measures for sales performance, inventory availability, order trends, and product-level KPIs to support weekly business review reporting.

Tech Stack: Power BI, SQL, Microsoft SQL Server, Excel, Power Query, DAX, Python, Pandas, Data Validation, KPI Reporting

Business Operations KPI Reporting Dashboard

- Developed interactive Tableau dashboards that transformed complex business data into actionable insights, enabling leadership to monitor performance and make informed decisions.
- Customized Tableau Server and Google Analytics to publish recurring reports, analyze performance trends, and reduce manual report preparation by 30%.

Tech Stack: Tableau, Tableau Server, SQL, Excel, Google Analytics, Pivot Tables, Python, Pandas, Data Cleaning, Business Reporting.

EDUCATION

Masters and Bachelors in Computer Science Engineering (Integrated), VIT University

Jul 2013 – May 2018

TECHNICAL SKILLS

- **Programming & Analysis:** SQL, T-SQL, Python, Pandas, Data Cleaning, Data Validation, Ad-hoc Analysis, Trend Analysis.
- **BI & Visualization:** Power BI, Tableau, Tableau Server, DAX, Power Query, KPI Dashboards, Executive Dashboards, Self-Service Reporting.
- **Databases & Data Platforms:** Microsoft SQL Server, Snowflake, AWS Redshift, AWS S3, AWS Athena, AWS QuickSight
- **Reporting & Excel:** Microsoft Excel, Pivot Tables, VLOOKUP/XLOOKUP, Power Query, Data Modeling, Business Reporting, Recurring Reports.
- **Data Preparation & ETL:** Alteryx, Jupyter Notebook, Data Transformation, ETL Concepts, Data Quality Checks, Dashboard Refresh Validation.
- **Business & Collaboration Tools:** Jira, Confluence, Agile/Scrum, Requirement Gathering, Stakeholder Communication, Dashboard, Inventory Optimization, Data Quality, Data Governance, Business Reporting.
- **Business Analytics:** KPI Tracking, Operational Reporting, Sales Analysis, Inventory Reporting, Campaign Analysis, Google Analytics, Process Improvement.
